## PART I.
## STATISTICAL.

### Weather and Crop Report for the week ending 8 a. m.. Monday, the 4th December, 1939.

This report deals with the following districts only :—Hissar, Rohtak, Gurgaon, Ambala, Jullundur, Ferozepore, Lahore, Amritsar, Sialkot, Shahpur, Rawalpindi, Mianwali, Lyallpur, Multan and Dera Ghazi Khan.

No abnormal conditions are reported from other districts.

| No. | Reporting Station. | Rain. | 1. Supply of fodder. 2. Water supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Retail prices in seers per rupee. | Prospects of Autumn. | Prospects of Spring. |
|---|---|---|---|---|---|---|
| 1 | Hissar .. | Nil .. | 1. There is great scarcity of fodder in barani areas of Sirsa, Fatehabad, Hissar and Hansi tahsils and Bagar tract of Bhiwani tahsil, i.e., Siwani circle, where crops have dried up due to want of rain. In other parts of Bhiwani tahsil it is available to some extent. Arrangements have been made to distribute fodder taccavi in the district.<br>2. (a) Drinking water is sufficient in Nahri villages, but it is scarce in Bagar and barani tracts. In a few villages of Bhiwani tahsil the tanks have also dried up.<br>(b) Perennial canal in Sirsa tahsil is flowing by rotation. The closure of canal in Hansi tahsil is keenly felt. Ghaggar canals are dry.<br>3. Condition of cattle is poor for want of fodder except in most villages of Bhiwani tahsil, where they are a bit better. About 15,000 cattle are being maintained by Government on fodder taccavi. No cattle disease is reported. | Wheat, 9 to 9<br>Gram, 9½.<br>Barley, 14.<br>Jowar, 12.<br>Bajra, 10. | Condition of standing crops below average to average on irrigated area. Picking of cotton and pressing of sugarcane continue on irrigated area. | Rain is needed. On irrigated area in Sirsa and Fatehabad tahsil sowing of wheat and barley continues and in Hansi tahsil sowings of wheat and gram are in progress. On unirrigated area in Hissar tahsil there are some crops. In Sirsa tahsil the crops have been sown in the bed of the Ghaggar. |
| 2 | Rohtak .. | Nil .. | 1. Scarcity of fodder in unirrigated tracts continues.<br>2. (a) Drinking water for cattle in ponds of barani villages has been exhausted.<br>(b) Perennial canals are flowing by rotation and the supply of water is adequate.<br>3. Generally satisfactory in Nahri tracts and poor in unirrigated area. | Wheat 9½ ..<br>Gram, 9.<br>Barley, 12.<br>Jowar, 12.<br>Bajra, 10½.<br>Gochni, 9½. | Condition of sugarcane is good. Pressing of sugarcane is in progress and its outturn is estimated to be average. | Sowing of rabi oilseeds continues. Condition of standing crops good on irrigated and below average on unirrigated areas. |

| No. | Reporting Station. | Rain. | 1. Supply of fodder.<br>2. Water supply for—<br>(a) Drinking.<br>(b) Canal irrigation.<br>3. Condition of cattle. | Retail prices in seers per rupee. | Prospects of Autumn. | Prospects of Spring. |
|---|---|---|---|---|---|---|
| 3 | Gurgaon .. | *Nil* .. | 1. Scarce except in Palwal, Ballabgarh, and Gurgaon and in villages irrigated by canal in Nuh and Firozpur-Jhirka tahsils.<br>2. (a) Drinking water in wells and ponds is generally dry in Rewari tahsil.<br>(b) Canal flowed in Palwal, Firozpur-Jhirka, Nuh and Ballabgarh tahsils.<br>3. Generally fair. | Wheat, 8½ to 9½<br>Gram, 8¾ to 9½.<br>Barley, 12 to 12¼.<br>Jowar, 12.<br>Bajra, 10 to 10½. | Condition of cotton and sugarcane average on irrigated and poor to below average on unirrigated areas. Picking of cotton and harvesting of jowar and bajra continue. Yield is average on irrigated and poor to below average on unirrigated areas. | Sowing of wheat, barley and sarshaf continues. Condition of standing crops average on irrigated and poor to below average on unirrigated areas. |
| 4 | Ambala .. | *Nil* .. | 1. Sufficient ..<br>2. (a) Do.<br>(b) Western Jumna canal is flowing.<br>3. Generally good. | Wheat, white, 10<br>Wheat, red, 10¼.<br>Gram, 9¾.<br>Barley, 13. | Condition of standing crops average on irrigated and below average on unirrigated areas. Picking of cotton and pressing of sugarcane continues. Yield of cotton is below normal and that of sugarcane is normal. | Rain is badly needed. Condition of standing crops good on irrigated and average on unirrigated areas. Sowing of wheat continues. |
| 5 | Jullundur .. | *Nil* .. | 1. Insufficient. Import of white bhusa from the colony districts is in progress.<br>2. (a) Sufficient.<br>3. Generally good. | Wheat, white, 10¼<br>Wheat, red, 10½.<br>Gram, 9½.<br>Maize, 13. | Condition of standing crops average on irrigated and below average on unirrigated areas. Picking of cotton and pressing of sugarcane continue. Outturn is average. | Rain is badly needed. Sowing of wheat, gram, oilseeds, etc., continues. |
| 6 | Ferozepore .. | *Nil* .. | 1. Sufficient except in 12 villages of Moga tahsil.<br>2. (a) Sufficient.<br>(b) Sirhind canal is flowing with normal supply of water.<br>3. Generally good. | Wheat, 9¾ to 10¼<br>Gram, 9½.<br>Barley, 11¾. | Condition of standing crops average on irrigated and below average on unirrigated areas. The yield of maize, rice, sugarcane, bajra and cotton is 75 per cent. of the normal. | Rain is badly needed. Condition of standing crops average on irrigated and below average on unirrigated areas. Sowing of wheat, gram, barley and oilseeds continue. |
| 7 | Lahore .. | *Nil* .. | 1. Sufficient ..<br>2. (a) Do.<br>(b) Canals are flowing by rotation and the supply of water was adequate.<br>3. Generally good. | Wheat, 11 ..<br>Gram, 9.<br>Barley, 15¾. | Condition of standing crops average. Picking of cotton, and pressing of sugarcane continue. Outturn of cotton is below normal and that of sugarcane normal. | Sowing of wheat continues. Condition of wheat, gram and barley is average. |
| 8 | Amritsar .. | *Nil* .. | 1. Sufficient ..<br>2. (a) Do.<br>(b) Canals are flowing by rotation and the supply of water is sufficient.<br>3. Good. | Wheat 11 ..<br>Gram, 9¼ | Condition and expected yield of standing crops good in Amritsar and average elsewhere. Picking of cotton, and pressing of sugarcane continue. | Sowing of wheat and barley continues. Harvesting of toria is in progress. |
| 9 | Sialkot .. | *Nil* .. | 1. Ample ..<br>2. (a) Sufficient.<br>(b) Upper Chenab canal is flowing but its branches are closed.<br>3. Generally satisfactory. | Wheat, white, 10½<br>Wheat, red, 10¾.<br>Gram, 9½.<br>Maize, 14.<br>Rice, ordinary, 9½. | Condition of standing crops average on irrigated and below average on unirrigated areas. Picking of cotton, and pressing of sugarcane continue. Yield is average on irrigated and below average on unirrigated areas. | Sowing of wheat, barley and fodder continues. |
| 10 | Shahpur .. | *Nil* .. | 1. Sufficient except in Khushab tahsil.<br>2. (a) Do.<br>(b) Lower Jhelum canal is flowing with adequate supply of water.<br>3. Generally fair. | Wheat, 10 to 11½...<br>Gram, 10 to 10¼.<br>Barley, 16.<br>Bajra, 12 to 13.<br>Jowar, 12 to 18.<br>Maize, 12 to 15. | Condition of standing crops average to good on irrigated and below average to average on unirrigated areas. Picking of cotton, pressing of sugarcane and harvesting of bajra continue. Yield of American cotton is below average and of other crops is average. | Sowing of wheat, gram and fodder continues. |

| No. | Reporting Station. | Rain. | 1. Supply of fodder. 2. Water supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Retail prices in seers per rupee. | Prospects of Autumn. | Prospects of Spring. |
|---|---|---|---|---|---|---|
| 11 | Rawalpindi ... | Nil ... | 1. Sufficient ... 2. (a) Do. 3. Generally fair. | Wheat, 11 ... Gram, 9½. Barley, 14. Maize, 15. Jowar, 12. Bajra, 16. | Condition of standing crops below average. | Rain is needed. |
| 12 | Mianwali ... | Nil ... | 1. Scarce except in Thal tracts of Mianwali and Bhakkar tahsils and sufficient elsewhere. 2. (a) Sufficient excepting Thal tract of Isakhel. (b) Nammal canal in Mianwali and Kurram canal in Isakhel are flowing with normal supply of water. 3. Generally fair. | Wheat, 12½ ... Gram, 10. Barley, 13. Bajra, 12. Jowar, 12. | Condition and expected yield of standing crops average on irrigated and below average rather poor on unirrigated areas. Harvesting continues. | Rain is badly needed. Sowings continue. |
| 13 | Lyallpur ... | Nil ... | 1. Sufficient ... 2. (a) Do. (b) Canals are flowing satisfactorily. 3. Generally good. | Wheat, 11 ... Gram, 10. | Condition of standing crops on the whole normal. Complaints of premature opening of bolls of American cotton continue throughout the district. Picking of cotton and pressing of sugarcane continue. Outturn of Desi cotton is below normal and of sugarcane normal. | Sowing of wheat continues. Condition of standing crops on the whole normal. |
| 14 | Multan ... | Nil ... | 1. Generally sufficient except in Khushab tahsil. 2. (a) Sufficient. (b) Lower Bari Doab canal and perennial canals from Sutlej are flowing by rotation while non-perennial canals from Sutlej and Haveli Project are dry. The Haveli Project perennial canals are flowing regularly. 3. Good. | Wheat, 11⅝ Gram, 9½. Barley, 16. Jowar, 15. Bajra, 12¾. Maize, 12. | Condition and expected yield of standing crops generally average except cotton crop of Multan, Kabirwala, Lodhran, Mailsi and Khanewal tahsils which is below average due to inadequate supply of water of Nili Bar canals only and damage by *kaki* and *tela* diseases. Condition of jowar crop of Khanewal tahsil is also below average due to damage by jowar borer. Picking of cotton, pressing of sugarcane and harvesting of other crops continue. | Sowing of wheat, barley, etc., continues. Germination is good. |
| 15 | Dera Ghazi Khan. | Nil ... | 1. Sufficient except in Pachadh tracts. 2. (a) Do. (b) Manka canal is flowing with sufficient supply of water and Nurdhundi, Qutabdhundi, Shoria, Saiban and Karya Gamun canals are flowing by rotation with sufficient supply of water. 3. Generally good. | Wheat, 13½ Jowar, 17. Bajra, 13¾. Gram, 11½. | Condition and expected yield of standing crops average except in Rajanpur tahsil where the crops are below average due to damage by unfavourable winds and insects. | Sowings continue |

*REMARKS.*

WEATHER remained dry. Rain is needed. Condition of standing crops (sugarcane, cotton, wheat, barley, gram and oilseeds) is generally average on irrigated and below average on unirrigated areas. Premature opening of bolls of American cotton is reported from Gujrat, Shahpur, Montgomery, Lyallpur and Multan. Sowing of spring crops is in progress. Picking of cotton, pressing of sugarcane continue and their probable yield is generally below normal to normal. Fodder and drinking water are generally sufficient except in parts of the south-east and south-west. Supplies of canal water are generally adequate in Northern Administration and Sirhind, Indus inundation, and Haveli canals and insufficient elsewhere. Condition of cattle is generally fair except in Hissar and unirrigated tracts of Rohtak. Retail prices in seers per rupee as follows :—

## PART I.

## STATISTICAL.

**Weather and Crop Report for the week ending 8 a. m., Monday, the 11th December, 1939.**

This report deals with the following districts only :—Hissar, Rohtak, Gurgaon, Ambala, Jullundur, Ferozepore, Lahore, Amritsar, Sialkot, Shahpur, Rawalpindi, Mianwali, Lyallpur, Multan and Dera Ghazi Khan.

No abnormal conditions are reported from other districts.

| No. | Reporting Station. | Rain. | 1. Supply of fodder. 2. Water supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Retail prices in seers per rupee. | Prospects of Autumn. | Prospects of Spring. |
|---|---|---|---|---|---|---|
| 1 | Hissar .. | Nil .. | 1. There is a great scarcity of fodder in barani areas of Sirsa, Fatehabad, Hissar and Hansi tahsils and Bagar tract of Bhiwani tahsil, i.e., Siwani circle, where crops have dried up due to want of rain. In other parts of Bhiwani tahsil it is available to some extent. Arrangements have been made to distribute fodder taccavi in the district.<br>2. (a) Drinking water is sufficient in Nahri villages, but it is scarce in Bagar and barani tracts. In some villages of Bhiwani and Fatehabad tahsils village tanks have dried up.<br>(b) Perennial canals remained closed. The Ghaggar canals are dry.<br>3. Condition of cattle is poor for want of fodder except in most villages of Bhiwani tahsil, where they are a bit better. About 15,000 cattle are being maintained by the Government on fodder taccavi. | Wheat, 8 to 8½ ..<br>Gram, 8.<br>Barley, 12.<br>Jowar, 11½.<br>Bajra, 9. | Condition of standing crops below average to average. Picking of cotton and pressing of sugarcane continue on irrigated area. | Rain is badly needed. Condition of standing crops average on irrigated area except in Hansi tahsil where it is below average due to closure of canals and absence of rain. On unirrigated area there are some crops in a few villages of Hissar tahsil. In Sirsa tahsil they have been sown in the bed of the Ghaggar. |
| 2 | Rohtak .. | Nil .. | 1. Scarcity of fodder in unirrigated tracts continues.<br>2. (a) Drinking water for cattle in ponds of barani villages has been exhausted.<br>(b) Perennial canals are not flowing by rotation owing to canal cuts and the people are complaining that the supply is inadequate.<br>3. Generally satisfactory in Nahri and poor in unirrigated tracts. | Wheat 9½<br>Gram, 9½.<br>Barley, 12.<br>Jowar, 11½.<br>Bajra, 9½.<br>Gochni, 9. | .. Condition of sugarcane is good on irrigated area. Its pressing continues. Probable yield is average. | Condition of standing crops good on irrigated and below average on unirrigated areas. Sowings continue on irrigated area in some villages. Unirrigated sown area is very small. |

| No. | Reporting Station. | Rain. | 1. Supply of fodder.<br>2. Water supply for—<br>(a) Drinking.<br>(b) Canal irrigation.<br>3. Condition of cattle. | Retail prices in seers per rupee. | Prospects of Autumn. | Prospects of Spring. |
|---|---|---|---|---|---|---|
| 3 | Gurgaon .. | Nil .. | 1. Scarce except in Palwal, Ballabgarh, Gurgaon and in villages irrigated by canal in Nuh and Firozpur-Jhirka tahsils.<br>2. (a) Drinking water in wells and ponds is generally dry in Rewari tahsil.<br>(b) Canal flowed in Palwal, Firozpur-Jhirka, Nuh and Ballabgarh tahsils.<br>3. Generally fair. | Wheat, 8 to $9\frac{1}{2}$<br>Gram, $8\frac{3}{4}$ to $9\frac{1}{2}$.<br>Barley, 12.<br>Jowar, 12.<br>Bajra, 10. | Condition of standing crops average on irrigated and poor to below average on unirrigated areas. Picking of cotton and harvesting of jowar and bajra continue. Yield is average on irrigated and poor to below average on unirrigated areas. | Condition of standing crops average on irrigated and poor to below average on unirrigated areas. Sowing of wheat barley and sarshaf continues. |
| 4 | Ambala .. | Nil .. | 1. Sufficient ..<br>2. (a) Do.<br>(b) Western Jumna canal is flowing.<br>3. Generally good. | Wheat, white, 10<br>Wheat, red, $10\frac{1}{2}$.<br>Gram, $9\frac{3}{4}$.<br>Barley, 13. | Condition of standing crops average on irrigated and below average on unirrigated areas. Picking of cotton is in progress in Ambala and Rupar tahsils only. Yield is below normal. Pressing of sugarcane continues. Yield is normal. | Rain is badly needed. Condition of standing crops good on irrigated and average on unirrigated areas. |
| 5 | Jullundur .. | Nil .. | 1. Insufficient. Import of fodder on Railway concession rates is in progress.<br>2. (a) Sufficient.<br>3. Generally good. | Wheat, white, 10<br>Wheat, red, $10\frac{1}{2}$.<br>Gram, $9\frac{1}{2}$.<br>Barley 13.<br>Maize, $13\frac{1}{2}$. | Condition of standing crops average on irrigated and below average on unirrigated areas. Picking of cotton and pressing of sugarcane continue. Outturn of sugarcane is average and of cotton much below average. | Rain is badly needed. Condition of standing crops average on irrigated below average on unirrigated areas. Sowing of wheat continues. |
| 6 | Ferozepore .. | Nil .. | 1. Insufficient in 12 villages of Moga tahsil sufficient elsewhere.<br>2. (a) Sufficient.<br>(b) Sirhind canal is flowing with normal supply of water.<br>3. Generally good. | Wheat, $9\frac{3}{4}$ to $10\frac{1}{2}$<br>Gram, $9\frac{1}{2}$.<br>Barley, $11\frac{3}{4}$. | Condition of standing crops average on irrigated and below average on unirrigated areas. Crops on unirrigated area are nominal on account of scarcity of rain. Yield of maize, rice, sugarcane, bajra and cotton is 75 per cent. of normal on irrigated areas. | Rain is badly needed. Condition of standing crops average on irrigated and below average on unirrigated areas. Sowing of wheat, gram, barley and oil-seeds continues. |
| 7 | Lahore .. | Nil .. | 1. Sufficient ..<br>2. (a) Do.<br>(b) Canals are flowing by rotation and the supply of water is inadequate.<br>3. Generally satisfactory. | Wheat, $10\frac{1}{2}$ ..<br>Gram, 9.<br>Barley, $15\frac{1}{2}$. | Condition of standing crops average. Picking of cotton and pressing of sugarcane continue. Outturn is below normal. | Condition of wheat, gram and barley average. Sowing of wheat and fodder continues. |
| 8 | Amritsar .. | Nil .. | 1. Sufficient<br>2. (a) Do.<br>(b) Canals are flowing by rotation and the supply of water is sufficient.<br>3. Good. | Wheat 11 ..<br>r m, 9 | Condition and expected yield of standing crops average. Picking of cotton, pressing of sugarcane and harvesting of toria continue. | Condition of standing crops average. Sowing of wheat, barley and fodder continues. |
| 9 | Sialkot .. | Nil. .. | 1. Ample ..<br>2. (a) Sufficient.<br>(b) Upper Chenab canal is flowing but its branches are closed.<br>3. Generally satisfactory. | Wheat, white, $10\frac{1}{2}$<br>Wheat, red, $10\frac{3}{4}$.<br>Gram, $8\frac{1}{2}$<br>Maize, $13\frac{3}{8}$.<br>Rice, ordinary, $9\frac{1}{2}$. | Condition of standing crops average on irrigated and below average on unirrigated areas. Picking of cotton and pressing of sugarcane continue. | Condition of standing crops average on irrigated and below average on unirrigated areas. Sowing of wheat, barley and fodder continues. |
| 10 | Shahpur .. | Nil .. | 1. Sufficient except in Khushab tahsil.<br>2. (a) Do.<br>(b) One branch of Lower Jhelum canal is flowing with adequate supply of water.<br>3. Generally fair. | Wheat, 11 to $11\frac{1}{2}$ ..<br>Gram, 10 to $10\frac{1}{4}$.<br>Barley, 15 to 17.<br>Bajra, 12 to $12\frac{1}{2}$.<br>Jowar, 14 to 16.<br>Maize, 11 to 15. | Condition of standing crop average to good on irrigated and below average to average on unirrigated areas. Picking of cotton, pressing of sugarcane and harvesting of bajra continue. Outturn of American cotton is below average on account of damage by *tela* and of other crops average. | Sowing of wheat and fodder is in progress on irrigated area. |

| No. | Reporting Station. | Rain. | 1. Supply of fodder. 2. Water supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Retail prices in seers per rupee. | Prospects of — Autumn. | Prospects of — Spring. |
|---|---|---|---|---|---|---|
| 11 | Rawalpindi ... | *Nil* ... | 1. Sufficient ... 2. (a) Do. 3. Generally fair. | Wheat, 11½ ... Gram, 8½. Barley, 14½. Maize, 14½. Bajra, 12. Jowar, 13. | Condition of standing crops below average. | Rain is needed. |
| 12 | Mianwali ... | *Nil* ... | 1. Scarce in Thal tracts of Mianwali, Isakhel and Bhakkar tahsils. 2. (a) Sufficient except ing Thal tracts of Isakhel tahsil. (b) Nammal canal in Mianwali is closed while Kurram canal in Isakhel is flowing with normal supply of water. 3. Generally fair. | Wheat, 11½ ... Gram, 9½. Barley, 12½. Bajra, 11½. Jowar, 13. | Condition of standing crops average on irrigated and below average rather poor on unirrigated areas. Harvesting finished in Mianwali and Isakhel tahsils and continues in Bhakkar tahsil. | Rain is badly needed. Sowing of wheat continues and that of other crops finished. |
| 13 | Lyallpur ... | *Nil* ... | 1. Sufficient ... 2. (a) Do. (b) Canals are flowing satisfactorily by rotation. 3. Generally good. | Wheat, 11 ... Gram, 10. | Condition of standing crops on the whole normal. Complaints of premature opening of bolls of American cotton continue throughout the district. Picking of cotton and pressing of sugarcane continue. Outturn of Desi cotton is below normal and of sugarcane normal. | Condition of standing crops on the whole normal. Sowing of wheat is in progress. |
| 14 | Multan ... | *Nil* ... | 1. Generally sufficient except in Khanewal tahsil. 2. (a) Sufficient. (b) Lower Bari Doab canal and perennial canals from Sutlej are flowing by rotation while non-perennial canals from Sutlej and Haveli Project are dry. The Haveli Project perennial canals are flowing regularly. 3. Good. | Wheat, 11½ ... Gram, 9½. Barley, 16. Jowar, 15. Bajra, 12½. Maize, 11½. | Condition and probable yield of standing crops generally average except cotton crop of Multan, Kabirwala, Lodhran, Mailsi and Khanewal tahsils where the condition of the crops is below average due to inadequate supply of water from Sutlej Valley Project canals and damage by *tela* and *kaki* diseases. Picking of cotton, pressing of sugarcane and harvesting of other crops continue. | Sowing of wheat, barley and fodder continues. Germination is good. |
| 15 | Dera Ghazi Khan. ... | *Nil* ... | 1. Sufficient except in Pachadh tracts. 2. (a) Do. (b) Nurdhundi, Qutabdhundi, Shoria, Saiban and Karya Gamon canals are flowing by rotation and Manka canal with sufficient supply of water. There is complaint of short supply of water in Rajanpur tahsil. 3. Generally good. | Wheat, 12½ ... Jowar, 14. Bajra, 12½. Gram, 10½. | Condition and expected yield of standing crops average except in Rajanpur tahsil and of unirrigated crops of Jampur tahsil which are below average. | Sowings continue. |

## *REMARKS.*

WEATHER remained dry. Condition of standing crops (sugarcane, cotton, wheat, barley, gram and oilseeds) is generally average on irrigated and below average on unirrigated areas. *Tela* has damaged cotton in parts of Multan. Premature opening of bolls of American cotton is reported from Gujrat, Shahpur, Montgomery, Lyallpur and Multan. Picking of cotton, pressing of sugarcane and sowing of spring crops are in progress. Probable yield of cotton is generally below normal and that of sugarcane below normal to normal. Fodder and drinking water are generally sufficient except in parts of the south-east and south-west. Supplies of canal water are generally adequate in Northern Administration and Sirhind, Indus inundation, and Haveli canals and insufficient elsewhere. Condition of cattle is generally fair except in Hissar and unirrigated tracts of Rohtak. The daily average number of workers at test works in progress in Rohtak was 6,600. Retail prices in seers per rupee as follows :—

Notes.—Prices of rice as shown in the statement are for the quality in common demand.
Variations in prices are due to fluctuations in imports and exports.
*No wholesale salt sold.
‡‡Statement not received.
§Not procurable.
††Under enquiry.
Not sold.

The price of "Bathi" and "Missar" at Simla during the fortnight ending 30th November, 1939, was 12 seers 0 chhatank and 6 seers 8 chhataks per rupee, respectively.

The grades of salt for which quotations are given in this statement are as follows:—

| | |
|---|---|
| Hissar ... ... ... ... | Didwána. |
| Rohtak, Gurgaon and Karnal ... ... ... | Sambhar. |
| Remaining districts .. .. .. | Rock or Sendha. |

OFFICE OF DIRECTOR OF LAND RECORDS, PUNJAB:
Lahore, dated the 12th December, 1939.

MOHAMMAD ISMAIL,
HEAD ASSISTANT OF STATISTICS,
Office of Director of Land Records, Punjab.

GRAPH SHOWING THE COST OF LIVING OF WORKING CLASSES FOR THE YEAR 1939

# SUMMARY OF METEOROLOGICAL CONDITIONS IN THE PUNJAB AND THE NORTH-WEST FRONTIER PROVINCE DURING SEPTEMBER, 1939.

*The chief feature of the month was the weak monsoon and the consequent deficiency of rainfall over the provinces.* During the first six days there was practically *no monsoon and rainfall was mostly confined to the east Punjab hills and the adjoining plains.* Associated with a Bay depression which disappeared over the west United Provinces on the 8th. there was a revival of the monsoon activity and rainfall became more widespread in the east and north Punjab, and on occasions locally heavy in the Punjab hills and the adjoining plains between the 7th and 11th, Rawalpindi recording 4″ on the 9th; rainfall extended to the North-West Frontier Province also on the 9th and 10th. On the 12th nearly general rain fell in the North-West Frontier Province and the north and central Punjab. After this date the monsoon may be said to have withdrawn from the provinces. Weather during the rest of the month was generally dry except for occasional falls of rain in the Punjab hills and the North-West Frontier Province between the 15th and 18th and on the 30th.

The total rainfall of the month was in large excess at Rawalpindi and Dera Ismail Khan, in moderate excess at Khushab and Dalhousie, in slight excess at Simla and normal or in defect elsewhere. Cloud amount was in excess at Ludhiana and Lahore, and normal or in defect elsewhere. Humidity was normal or in defect. Both maximum and minimum temperatures were normal or in excess.

## PART I.
## STATISTICAL.

**Weather and Crop Report for the week ending 8 a. m., Monday, the 18th December, 1939.**

This report deals with the following districts only :—Hissar, Rohtak, Gurgaon, Ambala, Jullundur, Ferozepore, Lahore, Amritsar, Sialkot, Shahpur, Rawalpindi, Mianwali, Lyallpur, Multan and Dera Ghazi Khan.

No abnormal conditions are reported from other districts.

| No. | Reporting Station. | Rain. | 1. Supply of fodder.<br>2. Water supply for—<br>(a) Drinking.<br>(b) Canal irrigation.<br>3. Condition of cattle. | Retail prices in seers per rupee. | Prospects of Autumn. | Prospects of Spring. |
|---|---|---|---|---|---|---|
| 1 | Hissar .. | Nil .. | 1. There is great scarcity of fodder in barani areas of Sirsa, Fatehabad, Hissar and Hansi tahsils and Bagar tracts of Bhiwani tahsil, i.e., Siwani circle, where crops have dried up due to want of rain. In other parts of Bhiwani tahsil it is available to some extent. Arrangements have been made to distribute fodder taccavi in the district.<br>2. (a) Drinking water is sufficient in Nahri villages, but it is scarce in Bagar and barani tracts. In a few villages of Bhiwani, Fatehabad and Hansi tahsils the tanks have also dried up.<br>(b) Perennial canals are flowing by rotation.<br>3. Condition of cattle is poor for want of fodder except in most villages of Bhiwani tahsil, where they are a bit better. About 15,000 cattle are being maintained by the Government on fodder taccavi. Cattle disease has been reported in a few villages of Hissar tahsil. | Wheat, 8 to 8½ ..<br>Gram, 8.<br>Barley, 11.<br>Jowar, 11.<br>Bajra, 9. | Condition of standing crops below average to average on irrigated area. Picking of cotton and pressing of sugarcane continue on irrigated area. | Condition of standing crops average on irrigated area. On unirrigated area there are some crops in a few villages of Hissar tahsil, but their condition is bad. In Sirsa tahsil crops have been sown in bed of the Ghaggar and their condition is below average. Sowing of wheat and barley continues on irrigated area in Sirsa and Fatehabad tahsils. Sowing of wheat also continues in Hansi tahsil on irrigated area. |
| 2 | Rohtak .. | Nil .. | 1. Scarcity of fodder in unirrigated tracts continues.<br>2. (a) Drinking water for cattle in ponds of the barani villages has been exhausted.<br>(b) Perennial canals are not flowing owing to canal cuts and the people are complaining that the supply is inadequate.<br>3. Generally satisfactory in Nahri and poor in unirrigated tracts. | Wheat 9½ ..<br>Gram, 9½.<br>Barley, 12.<br>Jowar, 11½.<br>Bajra, 10½.<br>Gochni, 9. | Condition of sugarcane is good on irrigated area. Pressing of sugarcane continues. Probable outturn is average. | Condition of standing crops good on irrigated and below average on unirrigated areas. Sowings continue in a few villages on irrigated area and unirrigated sown area is very small. |

| No. | Reporting Station. | Rain | 1. Supply of fodder.<br>2. Water supply for—<br>(a) Drinking.<br>(b) Canal irrigation.<br>3. Condition of cattle. | Retail prices in seers per rupee. | Prospects of Autumn. | Prospects of Spring. |
|---|---|---|---|---|---|---|
| 3 | Gurgaon ... | *Nil* ... | 1. Scarce except in Palwal, Ballabgarh, Gurgaon and villages irrigated by canal in Nuh and Firozpur-Jhirka tahsils.<br>2. (a) Sufficient in wells. Pools are generally dry.<br>(b) Canal flowed in Nuh, Firozpur-Jhirka, Ballabgarh and Palwal tahsils.<br>3. Generally fair. | Wheat, 8½ to 9½.<br>Gram, 8¾ to 9½.<br>Barley, 12.<br>Jowar, 12.<br>Bajra, 10 to 10¼. | Condition of standing crops average on irrigated and poor to below average on unirrigated areas. Picking of cotton and harvesting of jowar and bajra continue. Yield is average on irrigated and poor to below average on unirrigated areas. | Rain is needed. Condition of standing crops average on irrigated and poor to below average of unirrigated areas. Sowing of wheat and rapeseed continues. |
| 4 | Ambala ... | *Nil* ... | 1. Sufficient ...<br>2. (a) Do.<br>(b) Western Jumna canal is flowing.<br>3. Generally good. | Wheat, white, 9¾.<br>Wheat, red, 9[illegible].<br>Gram, 9½.<br>Barley, 11¼. | Condition of standing crops average on irrigated and below average on unirrigated areas. Pressing of sugarcane continues. Yield is normal. | Rain is badly needed. Condition of standing crops good on irrigated and average on unirrigated areas. |
| 5 | Jullundur ... | *Nil* ... | 1. Insufficient. Import of white bhusa on concession rates from the Colony Districts is in progress.<br>2. (a) Sufficient.<br>3. Generally good. | Wheat, white, 10¼.<br>Wheat, red, 10½.<br>Gram 9½.<br>Barley 12½.<br>Maize, 13½. | Condition of standing crops average on irrigated and much below average on unirrigated areas. Picking of cotton and pressing of sugarcane continue. Outturn of cotton is below average and that of sugarcane average. | Rain is badly needed. Condition of standing crops average on irrigated and much below average on unirrigated areas. |
| 6 | Ferozepore ... | *Nil* ... | 1. Insufficient in 12 villages of Moga tahsil sufficient elsewhere.<br>2. (a) Sufficient.<br>(b) Sirhind canal is flowing with normal supply of water.<br>3. Generally good. | Wheat, 9½ to 10½.<br>Gram, 9½.<br>Barley, 12½. | Condition of standing crops average on irrigated and below average on unirrigated areas. Crops on unirrigated area are nominal. Yield of maize, rice, sugarcane, bajra and cotton is 75 per cent. of the normal. | Rain is badly needed. Condition of standing crops average on irrigated and below average on unirrigated areas. Sowing of wheat, barley, gram and oilseed continues on irrigated area. |
| 7 | Lahore ... | *Nil* ... | 1. Sufficient ...<br>2. (a) Do.<br>(b) Canals are flowing by rotation and the supply of water is inadequate.<br>3. Generally good. | Wheat, 11 ...<br>Gram 9.<br>Barley, 14. | Condition of standing crops average. Picking of cotton and pressing of sugarcane continue. Yield is normal. | Condition of standing crops average. Sowing of fodder is in progress. |
| 8 | Amritsar ... | *Nil* ... | 1. Sufficient ...<br>2. (a) Do.<br>(b) Canals are flowing by rotation and the supply of water is sufficient.<br>3. Good. | Wheat 10¾ ...<br>Gram, 8½. | Condition and expected yield of standing crops average. Picking of cotton and pressing of sugarcane continue. | Condition of standing crops average. Harvesting of toria is in progress. |
| 9 | Sialkot ... | *Nil* ... | 1. Ample ...<br>2. (a) Sufficient.<br>(b) Upper Chenab canal is flowing but its branches are closed.<br>3. Generally satisfactory. | Wheat, white, 10½.<br>Wheat, red, 10½.<br>Gram, 8½.<br>Maize, 12½.<br>Rice, ordinary, 9½. | Condition of cotton and sugarcane average on irrigated and below average on unirrigated areas. Pressing of sugarcane and picking of cotton continue. | Condition of standing crops average on irrigated and below average on unirrigated areas. Sowing of wheat and barley continues in parts of the district. |
| 10 | Shahpur ... | *Nil* ... | 1. Sufficient except in Khushab tahsil.<br>2. (a) Do.<br>(b) Lower Jhelum canal is flowing with adequate supply of water.<br>3. Generally fair. | Wheat, 11 to 12 ...<br>Gram, 9½ to 10.<br>Barley, 14 to 15.<br>Bajra, 12 to 12½.<br>Jowar, 14 to 16.<br>Maize, 13½ to 14. | Condition of standing crops below average to good on irrigated and below average to average on unirrigated areas. Picking of cotton, pressing of sugarcane and harvesting of bajra are in progress. Yield of Desi and American cotton is average. | Condition of standing crops below average to average on irrigated and below average to average on unirrigated areas. Sowing of wheat and [illegible] fodder is in progress on irrigated area. |

| No. | Reporting Station. | Rain. | 1. Supply of fodder. 2. Water supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Retail prices in seers per rupee. | Prospects of — Autumn. | Prospects of — Spring. |
|---|---|---|---|---|---|---|
| 11 | Rawalpindi ... | Nil ... | 1. Sufficient ... 2. (a) Do. 3. Fair. | Wheat, 11 ... Gram, 9. Barley, 15. Jowar, 14. Maize, 15. Bajra, 11½. | Condition of standing crops below average. | Rain is badly needed. Condition of standing crops below average. |
| 12 | Mianwali ... | Nil ... | 1. Scarce in Thal tracts of Mianwali, Isakhel and Bhakkar tahsils and sufficient elsewhere. 2. (a) Sufficient excepting Thal tract of Isakhel tahsil. (b) Nammal canal in Mianwali is closed while Kurram canal in Isakhel is flowing with normal supply of water. 3. Generally fair. | Wheat, 11½ ... Gram, 9½ Barley, 12½. Bajra, 11½. Jowar, 13. | Crops have been harvested. | Rain is badly needed. Sowing of wheat and other crops finished. Condition of standing crops average on irrigated and below average rather poor on unirrigated areas. |
| 13 | Lyallpur ... | Nil ... | 1. Sufficient ... 2. (a) Do. (b) Canals are flowing by rotation. 3. Generally good. | Wheat, 10½ Gram, 9½. | Condition of standing crops except cotton is normal. Picking of Desi cotton has almost finished. Picking of American cotton and pressing of sugarcane continue. Outturn of both varieties of cotton is below normal and that of sugarcane normal. Premature opening of bolls of American cotton is reported. | Condition of standing crops normal. Sowing of wheat has nearly finished. |
| 14 | Multan ... | Nil ... | 1. Generally sufficient except in Khanewal tahsil. 2. (a) Sufficient. (b) Lower Bari Doab and perennial canals from Sutlej are flowing by rotation while non-perennial canals from Sutlej and Haveli Project are dry. The Haveli Project perennial canals are flowing regularly. 3. Good. | Wheat, 11½ ... Gram, 9½. Barley, 15. Jowar, 15. Bajra, 11½. Maize, 11½. | Condition of standing crops generally average except cotton crop of Multan, Kabirwala, Lodhran and Mailsi tahsils where its condition is below average due to inadequate supply of water from Sutlej Valley Project canals and damage by *tela* and *kaki* diseases. Picking of cotton, pressing of sugarcane and harvesting of til continue. Outturn generally normal except of cotton crop in Multan, Kabirwala, Lodhran and Mailsi tahsils where it is below normal. | Sowing of wheat, barley and fodder etc., continues. Germination is good. |
| 15 | Dera Ghazi Khan. | Nil ... | 1. Sufficient except in Pachadh tracts. 2. (a) Do. (b) Nurdhundi, Qutabdhundi, Shoria, Saiban and Karia Gamon canals are flowing by rotation and Manka canal with insufficient supply of water. There is complaint of about short supply in Rajanpur tahsil. 3. Generally good. | Wheat, 12½ ... Jowar, 14. Bajra, 12½. Gram, 10½. | Condition and expected yield of standing crops average except in Rajanpur tahsil and of unirrigated crops of Jampur tahsil which are below average. | Sowings continue. |

*REMARKS.*

Weather remained dry. Rain is needed. Condition of standing crops (sugarcane, cotton, wheat, barley, gram and oilseeds) is generally average on irrigated and below average on unirrigated areas. Cotton has been damaged by *Tela* in parts of Multan. Premature opening of bolls of American cotton is reported from Gujrat, Shahpur, Montgomery, Lyallpur and Multan. Picking of cotton, and pressing of sugarcane continue. Probable yield of cotton is generally below normal and that of sugarcane below normal to normal. Sowing of spring crops is in progress. Fodder and drinking water are generally sufficient except in parts of the south-east and south-west. Supplies of canal water are adequate in Sirhind, Muzaffargarh and Indus inundation, and Haveli canals and insufficient elsewhere. Condition of cattle is generally fair except in Hissar and unirrigated tracts of Rohtak. The daily average number of workers at test works in progress in Rohtak was 7,976. Retail prices in seers per rupee are as follows :—

canal raingauge stations.
have been fixed.

KANTI RAM,
SUPERINTENDENT,
Office of Director of Land Records, Punjab.

# Notes on the condition and prospects of crops, etc., in each district of the Punjab for the month of November, 1939.

## 1.—Hissar District.

Season remained cold and dry. Rain is badly needed. In irrigated areas of Sirsa and Fatehabad tahsils sowing of wheat, barley and gram continued. In other tahsils sowings of wheat and gram have been in progress. In a few villages of Hissar tahsil the crops have been sown to some extent and in Sirsa tahsil those have been sown in the bed of the Ghaggar. The condition of standing kharif crops is below average to average while rabi crops are being sown in the district. Picking of cotton and pressing of cane continued. The estimated outturn of cotton is 70 per cent and that of sugarcane 75 per cent of the normal. There are no kharif crops now and rabi crops are in growth. Condition of cattle is poor for want of fodder except in most villages of Bhiwani tahsil where they are a bit better. There is a great-scarcity of fodder in barani areas of Sirsa, Fatehabad, Hissar and Hansi tahsils and bagar tracts of Bhiwani tahsil, *i.e.*, Siwani circle where there were no kharif crops in 1939. In other parts of Bhiwani tahsil fodder is available. Arrangements have been made to distribute fodder taccavi in kind in the affected parts of the district. About 15,000 cattle are being maintained by the Government on fodder taccavi. Public health is generally good. Perennial canals went on running on their rotational turns but their was a general complaint of short supply of canal water. The closure of canal in the last week of the month in Hansi tahsil is being felt much. The Ghaggar canals remained dry during the month. Drinking water is sufficient in nahri villages but it is scarce in barani tracts. In a few villages of Bhiwani tahsil the tanks have dried up. Famine relief works were in progress at 13 centres in the district. Prices of food stuffs have risen owing to speculation in business.

## 2.—Rohtak District.

No rain fell during the month under report. Sowing of gram, wheat, barley and sarshaf continued in the canal and well irrigated tracts of the district. Germination is good. Area sown is very small in the unirrigated and below average in irrigated tracts. Condition of irrigated crops is good while that of unirrigated is below average. Harvesting of jowar, bajra and other kharif crops was completed. Their probable outturn is average except of jowar which was damaged by stem borer. Scarcity of foder in the unirrigated tracts of the district still continues. Foot-and-mouth and other contagious diseases were reported from a few villages of the district but the general condition of cattle is on the whole satisfactory in the nahri and poor in the unirrigated tracts of the district owing to scarcity of fodder. Public health has been satisfactory during the month under report. Supply of canal water has been adequate. Ponds have gone dry in most of the barani villages of the district.

## 3.—Gurgaon District.

There was no rainfall during the month under report. Rain is badly needed. Condition of standing kharif crops, *i,e.*, sugarcane and cotton is below average to average on irrigated and poor to below average on unirrigated areas. The rabi standing crops, *i. e.*, wheat, barley, gram and sarshaf are average on irrigated and poor to below average on unirrigated areas. Picking of cotton and harvesting of bajra, jowar and gowar are going on and the yield is below average to average on irrigated and poor to below average on unirrigated areas. Wheat, gram, barley and sarshaf were sown on irrigated and unirrigated lands but the sowing was not an extensive one owing to the lack of rain. Food-grains are available except in Nuh and Firozpur-Jhirka tahsils. Fodder was also scarce in the district except Palwal and Ballabgarh tahsils. Drinking water was sufficient in the district. Ponds are generally dry in the Rewari tahsil. Condition of cattle remained fair. Scarcity of fodder has affected them. Foot-and-mouth disease was also reported from a few villages of the district. Canal flowed in Nuh, Firozpur-Jhirka, Ballabgarh and Palwal tahsils by rotation. Supply of water was insufficient. General state of public health remained satisfactory.

## 4.—Karnal District.

There was no rain during the month under report. Rain is badly needed. Sowing of wheat and other rabi crops still continues and the condition of standing irrigated rabi crops is average and that of unirrigated poor. The yield expected of kharif crops is normal on irrigated and much below normal on the unirrigated areas. The condition of cattle is satisfactory on the whole. Outbreak of foot-and-mouth disease has been reported from some villages of Kaithal tahsil. Public health is satisfactory on the whole, but disease of smallpox and fever is reported from some villages of Kaithal, Karnal and Panipat tahsils. Canals worked satisfactorily according to their programme. Prices have risen.

5.—AMBALA DISTRICT.

No rain fell during the month. It is badly wanted generally in the whole district. Sowing of rabi crops finished. Condition of standing crops of both harvests is average on irrigated and below average on unirrigated area. Germination of rabi crops is not so bright in many parts of the district as it ought to be. Picking of cotton finished. Crushing of sugarcane commenced in a few parts of the district. Yield is normal. Condition of cattle is generally satisfactory. Public health is generally good. Western Jamna canal is flowing. Prices are rising daily.

6.—SIMLA DISTRICT.

Sowing completed. Condition of crops average in Kotkhai tahsil and in Simla tahsil. The crops have not so far spring up for want of rainfall. Condition of cattle is good. Public health is good. Water in hill streams is sufficient.

7.—KANGRA DISTRICT.

There was no rainfall during the month. It is badly wanted, especially in the unirrigated tracts. Some area was sown with wheat, barley, gram and sarshaf. Standing crops are in fair condition. Cattle are in fair condition. Fodder is sufficient. Foot-and-mouth, rinderpest and hæmorrhagic septicæmia cattle diseases existed in some parts of the district. Public health is fair. Smallpox is reported from two villages of Kangra tahsil. Water in streams and kuhls was sufficient for irrigation purposes. Prices are stationary.

8.—HOSHIARPUR DISTRICT.

No rain fell during the month. Rabi sowings completed. The scarcity of rainfall has adversely affected the rabi crops. If there is no rain in the near future the crops will be severely damaged by the dry season in the frost. The frost will damage the sugarcane as well and the expected yield will be lowered in percentage of expected yield per acre. Cattle diseases were reported from a few villages of Una tahsil otherwise they are in good condition. The scarcity of rainfall will cause the scarcity of fodder in future months in case there is no rain in the near future. Public health is generally good with the exception of smallpox cases reported from a few villages of Una tahsil. Shahnahr continued working during the month normally. There is remarkable rise in the prices which is due to the scarcity of rainfall and war.

9.—JULLUNDUR DISTRICT.

There has been no rainfall during the month throughout the district. Rain is badly needed. Sowing of wheat, gram, oilseeds and other rabi crops has been in progress. Condition of the standing irrigated crops is average and that of unirrigated below average. Picking of cotton and crushing of sugarcane are in progress. Outturn is average. Cattle are generally in good condition. Fodder scarcity is being felt throughout the district and the import of white bhusa has commenced on a wide scale from the colony districts. Public health is generally good.

10.—LUDHIANA DISTRICT.

Rain is badly needed. The sowing of rabi crops is in progress. The condition of the standing crops is below average both on irrigated and unirrigated areas due to the scarcity of rainfall. The yield is expected to below normal both on irrigated and unirrigated areas. The condition of the cattle remained satisfactory on the whole but the fodder and grazing is not available in sufficient quantity. The state of public health is satisfactory. Sirhind canal has been flowing regularly.

11.—FEROZEPORE DISTRICT.

No rain fell during the month. It is badly wanted throughout the district. Condition of standing crops is average in the irrigated and below average in the unirrigated areas. The crops on the unirrigated area are nominal on account of scarcity of rain. Season has been dry throughout. Condition of cattle is satisfactory. Fodder and drinking water are sufficient. Public health is good. The yield of irrigated crops, such as maize, bajra, cotton, sugarcane is about 75 per cent of the normal. Rabi crops, such as wheat, barley, gram, chari and oilseeds are being sown in the district.

12.—LAHORE DISTRICT.

There was no rainfall throughout the district during the month under report. Wheat, gram and fodder are being sown normally. Condition of standing crops is average. Cotton is being picked and sugarcane is being pressed. The outturn is below normal and normal, respectively. General condition of the cattle on the whole remained satisfactory. General condition of public health is good. Sutlej Valley Project canals

are closed. The rest of the canals remained working by rotation. The water supply was inadequate. In tahsil Lahore the zamindars protest against warabandi, as the person on whose turn the canal stops cannot avail of his turn, when the canal flows.

13.—AMRITSAR DISTRICT.

There has been no rainfall during the month. Rain is badly needed. The condition and expected yield of standing crops is good in irrigated and average in unirrigated areas on the whole. Sowing of wheat, gram, berrar and fodder is going on. Condition of cattle is good. Public health is good. Canals are working by rotation and the supply is sufficient.

14.—GURDASPUR DISTRICT.

No rain during the month has been reported throughout the district. Wheat and barley were sown throughout the district. Condition of the standing crop is reported to be average in the irrigated and below average in the unirrigated areas owing to the absence of rains. Condition of cattle is generally good excepting slight complaint of foot-and-mouth disease in one village of Batala tahsil and of hæmorrhagic septicæmia in some villages of Batala, Pathankot and Gurdaspur tahsils. Public health is generally good. A few cases of small pox have been reported in one village of Shakargarh tahsil and preventive measures have already been adopted. Government canals are closed.

15.—SIALKOT DISTRICT.

No rain fell during the month. Condition of standing crops is average in the irrigated and below average in the unirrigated areas on the whole. Yield of cotton and sugarcane is average in the irrigated and below average in the unirrigated areas on the whole. Sowing of wheat, barley, masur and fodder continued in the district. Condition of cattle is generally satisfactory but there has been a complaint of hæmorrhagic septicæmia, small-pox and foot-and-mouth diseases in certain villages in the district. The public health is generally satisfactory. Upper Chenab canal is running but its branches are closed.

16.—GUJRANWALA DISTRICT.

The month remained dry throughout. Sowings of wheat and barley have nearly come to an end. Condition of standing crops is generally average on irrigated and below average on unirrigated lands. American cotton is reported to have been affected by *tela* in a few villages of tahsil Hafizabad. Picking of cotton continues. Gur is being made in a few places only. Condition of cattle is satisfactory with the exception that hæmorrhagic septicæmia remained prevalent in two villages of tahsil Gujranwala and *daba* disease in one village of tahsil Wazirabad. Bhusa is sufficient. Sugarcane is being used as fodder in many places owing to scarcity of green fodder. Public health is satisfactory except that small pox was reported from a village in Gujranwala tahsil. Canals are flowing by rotation. There has been no complaint of insufficient supply of canal water.

17.—SHEIKHUPURA DISTRICT.

The month under report remained dry. The condition of the standing crop is reported to be normal but there is a general complaint of 'tirk' to the American cotton. The amount of the loss thus caused has not hitherto been reported. The condition of cattle and the public health are both satisfactory. Canals kept running rotationally.

18.—GUJRAT DISTRICT.

The whole of this month passed off dry. Sowing of wheat was continued in the canal and well irrigated areas. The necessity of rain is badly being felt in the unirrigated areas. The condition of standing crops was fair to good in both the irrigated and unirrigated areas. Some complaints of attack of *tela* and bad opening to the balls of American cotton were, however, received from the irrigated tracts of the district but the exact damage is not yet known. The young plants of wheat are drying in the unirrigated tracts for want of rain and moisture. Picking of cotton and pressing of sugarcane were continued with average outturns with the exception of American cotton the exact outturn of which is not known. Cattle were generally in fair condition. Fodder and drinking water were sufficient. Public health was generally good. Some cases of pneumonia were, however, reported from a few villages. Canals remained flowing and there were no complaints about water supply. Stocks of foodstuffs were sufficient in markets and with big zamindars. The prices of agricultural commodities have risen to a certain extent.

### 19.—SHAHPUR DISTRICT.

No rain fell during this month. Condition of standing crops except cotton is average to good on irrigated and ordinary to average on unirrigated areas. Sowing of wheat, barley and gram is in progress. Outturn of cotton (*desi*) is average but that of American is poor owing to *tela* disease in all kinds of soils. Cattle is generally in fair condition. Public health remained satisfactory. Fodder is sufficient except in Khushab tahsil. Southern and northern brarches of Lower Jhelum canal remained flowing at intervals with adquate water supply. Rural development scheme remained in progress in Shahpur tahsil.

### 20.—JHELUM DISTRICT.

No rain fell during the month under report. Rain is badly needed. The area which retained some moisture has been sown. The condition of the standing crops is good on the irrigated while below average on the unirrigated areas. The condition of cattle is generally fair. The state of the public health is generally good. Prices are gradually rising.

### 21.—RAWALPINDI DISTRICT.

There was no rainfall during the month. Rain is badly needed. The sowing of wheat and other crops have not been totally carried out. Condition of standing kharif crops is below average. The yield is considered to be below average. The condition of cattle is fair throughout the district except some villages in tahsils Gujarkhan from where black-quarter and in Kahuta and Murree tahsils from where foot-and-mouth disease are reported. The public health is fair throughout the district. Prices are rising.

### 22.—ATTOCK DISTRICT.

No rain fell during the month. It is badly needed. The condition of standing crops in irrigated area is average but in unirrigated area it is below average. Average yield is expected. The condition of cattle is fair on the whole. Public health is satisfactory on the whole but only 4 cases and one death occurred from small-pox in 4 villages of the district. No canal runs in this district. The prices are stationary. Stocks of food-stuffs were sufficient.

### 23.—MIANWALI DISTRICT.

No rain fell during the whole month. It is badly needed. Sowings of rabi crops continue throughout the district. Condition and expected yield of kharif crops is average on irrigated areas but below normal rather poor on unirrigated areas. Condition of cattle has been fair on the whole excepting complaints of hæmorrhagic septicæmia and foot-and-mouth disease from a few places. Fodder is scarce in the Thal tracts of Bhakkar and Mianwali tahsils. Elsewhere it is sufficient. State of public health remained satisfactory on the whole. Nammal canal in Mianwali and Kurram canal in Isakhel are watering lands in adequately for shortage of water in them due to want of rains.

### 24.—MONTGOMERY DISTRICT.

Sowing of rabi crops continued during the month. Condition of standing crop is about average. The American cotton has been affected by 'tirk' in some parts of the district, and is not expected to yield the average outturn. The condition of cattle is satisfactory. The public health of the district has remained free from all epidemics excepting smallpox which has remained prevalent causing 59 cases with 14 deaths. Vaccination staff attended to all the infected villages carrying out vaccination and revaccination in addition to the routine vaccination work according to the programme. They performed 4,378 vaccination operations in the infected localities (628 primary and 3,700 revaccination). The Sutlej Valley Project and Lower Bari Doab Canal have been flowing satisfatorily.

### 25.—LYALLPUR DISTRICT.

No rain fell during the month. Sowing of gram finished and that of wheat continues. The condition of standing crops on the whole is normal. Picking of cotton continues. Outturn of desi is below normal. Complaint of 'tirk' disease is reported throughout the district. Pressing of sugarcane is in progress. Outturn is normal. The condition of cattle is generally good except in Samundri and Jaranwala tahsils wherein the disease of galghotu is reported to have spread out and the disease of 'zaharbad' is reported to have spread out in a village of Lyallpur tahsil. Public health is generally good except in two villages wherein the disease of smallpox is reported to have spread out. Canals are working by rotation due to which the sowing of rabi crop is slightly delayed.

### 26.—JHANG DISTRICT.

There was no rain during the month. Condition of standing crops is average except that of cotton which is badly damaged by 'tirk' disease. Wheat, masur, matar,

senji and methra have been sown during the month. Cotton is being picked up. The yield is 40 per cent of the normal. There is no complaint of cattle disease. Scarcity of fodder is being felt. Public health is satisfactory. Rivers have gone down and canals are working as usual.

27.—MULTAN DISTRICT.

No rain fell during the month. Sowings of maize, sathri, gram, turnips, barley, jandal, wheat, taramira, senji and methra continued. Germination is good. Condition of standing crops was generally average except cotton crop of Multan, Kabirwala, Khanewal, Lodhran and Mailsi tahsils the condition of which was below average due to damage by tela and tirk diseases and inadequate supply of water from Nili Bar canals. The condition of jowar crop of Khanewal tahsil was also below average due to damage by jowar borer. Harvesting of rice, vegetables, jowar, chillies, bajra, china, mash, til, picking of cotton and crushing of sugarcane continued. Outturn is generally normal except cotton crop of Khanewal, Multan, Kabirwala, Lodhran and Mailsi tahsils and jowar crop of Khanewal tahsil the outturn of which was below normal for the reason explained above. Condition of cattle was generally good. Supply of fodder was also generally sufficient except in Khanewal tahsil where it was insufficient due to damage to jowar crop by jowar borer. Two cases and two deaths from enteric fever were reported from Multan Municipal Committee during the month otherwise the district on the whole remained quite free from all other epidemics. Lower Bari Doab canal and perennial canals from Sutlej were running by rotation while non-perennial canals from Sutlej and Haveli Project were almost dry. The Haveli Project perennial canals were flowing regularly. Stock of food-grains and drinking water was sufficient.

28.—MUZAFFARGARH DISTRICT.

No rain fell during the month. It is badly needed. Sowings of wheat, barley and gram were in progress. The standing crops are in average condition on both classes of soil. Bajra and sugarcane were harvested with normal outturn but in the case of cotton the returns were 80 per cent of the normal. Complaints of hæmorrhagic septicæmia were received from various parts of the district. White bhusa and grazing were available except in Leiah tahsil, where 800 sheep are reported to have died on account of the scarcity of fodder and grazing. Malaria is prevalent. The canals on the Indus series are running by rotation with insufficient supplies of water. Prices are rising.

29.—DERA GHAZI KHAN DISTRICT.

No rain fell during the month. Sowing of rabi crops is in hand. The condition and expected yield of the standing crops are average in Sanghar. Dera Ghazi Khan and Jampur tahsils and below average in Rajanpur tahsil. The crops in Rajanpur tahsil were damaged by insects and unfavourable flow of winds. There was no complaint of cattle disease and the condition of the cattle was on the whole good. The fodder was sufficient except in Pachahd tracts. There was complaint of smallpox disease in a village of Sanghar tahsil and of malaria fever in Dera Ghazi Khan tahsil otherwise the public health was on the whole good. Only Manka, Nurdhundi and Qutabdhundi canals are flowing with sufficient supply of water. The latter two canals flowed by rotation. The prices are rising.

SUPPLEMENT TO

# The Government Gazette, Punjab.

**Published by Authority.**

No. 52 LAHORE, FRIDAY, DECEMBER 29, 1939.

## PART I.
## STATISTICAL.

**Weather and Crop Report for the week ending 8 a. m., Monday, the 25th December, 1939.**

**This report deals with the following districts only :—Hissar, Rohtak, Gurgaon, Ambala, Jullundur, Ferozepore, Lahore, Amritsar, Sialkot, Shahpur, Rawalpindi, Mianwali, Lyallpur, Multan and Dera Ghazi Khan.**

**No abnormal conditions are reported from other districts.**

| No. | Reporting Station. | Rain. | 1. Supply of fodder. 2. Water supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Retail prices in seers per rupee. | Prospects of Autumn. | Prospects of Spring. |
|---|---|---|---|---|---|---|
| 1 | Hissar .. | Report not received. | | | | |
| 2 | Rohtak .. | Nil .. | 1. Scarcity of fodder in unirrigated tracts continues. 2. (a) Drinking water for cattle in ponds of barani villages has been exhausted. (b) Perennial canals are not flowing by rotation owing to cuts and the people are complaini… water… | Wheat 9 .. Gram, 9½. Barley, 11. Jowar, 11½. Bajra, 10. Gochni, 9. | Condition of sugarcane good. Pressing of sugarcane continues and its probable outturn is average. | Condition of standing crops good on irrigated and below average on unirrigated areas. Unirrigated sown area is very small. Sowing of crops continues on i… |

| No. | Reporting Station. | Rain. | 1. Supply of fodder. 2. Water supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Retail prices in seers per rupee. | Prospects of Autumn. | Prospects of Spring. |
|---|---|---|---|---|---|---|
| 3 | Gurgaon | *Nil* | 1. Scarce except in Palwal, Ballabgarh, Gurgaon and villages irrigated by canal in Nuh and Firozpur-Jhirka tahsils. 2. (a) Drinking water in wells is sufficient. Ponds are generally dry. (b) Canal flowed in Firozpur-Jhirka, Ballabgarh and Palwal tahsils. 3. Generally satisfactory. | Wheat, 8½ to 9½. Gram, 8½ to 9½. Barley, 12. Jowar, 12. Bajra, 10 to 10½. | Condition of standing crops average on irrigated and poor to below average on unirrigated areas. Picking of cotton and harvesting of jowar and bajra continue. Yield is average on irrigated and poor to below average on unirrigated areas. | Condition of standing crops average on irrigated and poor to below average on unirrigated areas. Sowing of wheat, rapeseed, etc., continues. |
| 4 | Ambala | *Nil* | 1. Sufficient. 2. (a) Do. (b) Western Jumna canal is flowing. 3. Generally good. | Wheat, white, 9¾. Wheat, red, 9$\frac{11}{16}$. Gram, 9½. Barley, 11½. | Condition of standing crops average on irrigated and below average on unirrigated areas. Pressing of sugarcane continues. Yield is below normal. | Rain is badly needed. Condition of standing crops good on irrigated and average on unirrigated areas. |
| 5 | Jullundur | *Nil* | 1. Insufficient. Import of fodder from the Colony districts on concession rates is in progress. 2. (a) Sufficient. 3. Generally good. | Wheat, white, 10½. Wheat, red, 10½. Gram, 9½. Barley 12½. Maize, 13. | Condition of standing crops average on irrigated and below average on unirrigated areas. Picking of cotton and pressing of sugarcane continue. Outturn is average. | Rain is badly needed. Condition of standing crops average on irrigated and below average on unirrigated areas. |
| 6 | Firozepor | *Nil* | 1. Insufficient in 12 villages of Moga tahsil. Sufficient elsewhere. 2. (a) Sufficient. (b) Sirhind canal is flowing with normal supply of water. 3. Generally good. | Wheat, 9½ to 10½. Gram, 9½. Barley, 12½. | Condition of standing crops 75 per cent. of the normal on irrigated and 50 per cent. on unirrigated areas. The crops on unirrigated area are nominal owing to scarcity of rainfall. Yield of maize, rice, sugarcane and bajra is 75 per cent. of the normal on irrigated area. | Rain is badly needed. Condition of standing crops 75 per cent. of the normal on irrigated and 50 per cent. on unirrigated areas. Sowing of wheat, barley, gram and oilseed continues. |
| 7 | Lahore | *Nil* | 1. Sufficient. 2. (a) Do. (b) Canals are flowing by rotation and the supply of water is inadequate. 3. Generally good. | Wheat, 11. Gram, 9. Barley, 15. | Condition of standing crops average. Picking of cotton and pressing of sugarcane continue. Outturn of cotton is below normal and that of sugarcane normal. | Condition of standing crops average. Sowing of fodder continues. |
| 8 | Amritsar | *Nil* | 1. Sufficient. 2. (a) Do. (b) Canals are flowing by rotation and the supply of water is sufficient. 3. Good. | Wheat, 10½. Gram, 8½. | Condition and expected yield of standing crops average. Picking of cotton and pressing of sugarcane continue. | Condition of standing crops average. Harvesting of toria is in progress. |
| 9 | Sialkot | *Nil* | 1. Ample. 2. (a) Sufficient. (b) Upper Chenab canal is flowing but its branches are closed. 3. Generally satisfactory. | Wheat, white, 10½. Wheat, red, 10½. Gram, 8¾. Maize, 12$\frac{11}{16}$. Rice, ordinary, 9½. | Condition of standing crops average on irrigated and below average on unirrigated areas. Picking of cotton and pressing of sugarcane continue. Yield is average on irrigated and below average on unirrigated areas. | Condition of standing crops average on irrigated and below average on unirrigated areas. Sowing of wheat, barley and fodder continues. |
| 10 | Shahpur | *Nil* | 1. Sufficient except in Khushab tahsil. 2. (a) Do. (b) Lower Jhelum canal is flowing with adequate supply of water. 3. Generally good. | Wheat, 10½ to 12. Gram, 9½ to 10. Barley, 14½ to 15. Bajra, 12. Jowar, 13 to 14. Maize, 11½ to 14. | Condition of standing crops below average to good on irrigated and below average to average on unirrigated areas. Picking of cotton continues. Yield of Desi cotton is average and of American cotton below average. | Condition of standing crops below average to good on irrigated and below average to average on unirrigated areas. Sowing of wheat and fodder on irrigated area continues. |

| No. | Reporting Station. | Rain. | 1. Supply of fodder. 2. Water supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Retail prices in seers per rupee. | Prospects of — Autumn. | Prospects of — Spring. |
|---|---|---|---|---|---|---|
| 11 | Rawalpindi ... | *Nil* ... | 1. Sufficient ... 2. (a) Do. 3. Generally fair. | Wheat, 11 ... Gram, 9. Barley, 15. Jowar, 14. Maize, 15. Bajra, 12. | Condition of standing crops below average. | Rain is badly needed. Condition of standing crops below average. |
| 12 | Mianwali ... | *Nil* ... | 1. Scarce in Thal tracts of Mianwali and Bhakkar tahsils. Sufficient elsewhere. 2. (a) Sufficient excepting Thal tract of Isakhel tahsil. (b) Nammal canal in Mianwali is closed while Kurram canal in Isakhel is flowing with normal supply of water. 3. Generally fair. | Wheat, 12 Gram, 9½ Barley, 13. Bajra, 11. Jowar, 12. | ... | Rain is badly needed. Condition of standing crops average in Mianwali and Isakhel tahsils and above average in Bhakkar tahsil on irrigated and below average in Mianwali, average in Bhakkar and poor in Isakhel on unirrigated areas. |
| 13 | Lyallpur ... | *Nil* ... | 1. Sufficient ... 2. (a) Do. (b) Canals are flowing by rotation. 3. Generally good. | Wheat, 10 Gram, 9. | Condition of standing crops except cotton is normal. Picking of American cotton and pressing of sugarcane continue. Outturn of both varieties of cotton is below normal and that of sugarcane normal. Premature opening of bolls of American cotton is reported. | Condition of standing crops normal. Sowing of wheat has nearly finished. |
| 14 | Multan ... | *Nil* ... | 1. Generally sufficient 2. (a) Sufficient. (b) Lower Bari Doab and perennial canals from Sutlej are flowing by rotation while non-perennial canals from Sutlej and Haveli Project are dry. The Haveli Project perennial canals are flowing regularly. 3. Good. | Wheat, 11 Gram, 9½. Barley, 15. Jowar, 15. Bajra, 11½. Maize, 11½. | Condition of standing crops generally average except cotton crop of Multan, Lodhran Mailsi and Kabirwala tahsils where its condition is below average due to inadequate supply of water by Sutlej Valley Project canals and damage by *tela* and *kali* diseases. Picking of cotton, pressing of sugarcane and harvesting of til, etc., continue. Outturn is generally normal except of cotton crop of Multan, Lodhran Mailsi and Kabirwala tahsils where it is below normal. | Sowing of wheat and barley continues. Germination is good. Some complaints of damage to wheat crop by white ant due to shortage of canal water are reported from Khanewal tahsil. |
| 15 | Dera Ghazi Khan. | *Nil* ... | 1. Sufficient except in Pachadh tracts. 2. (a) Do. (b) Nurdhundi, Qutabdhundi, Shoria, Saiban and Karya Gaman canals are flowing by rotation and Manka with sufficient supply of water. There is a complaint of short supply of water in Rajanpur tahsil. 3. Generally good. | Wheat, 12½ Jowar, 14. Bajra, 12½. Gram, 10½. | Condition and expected yield of standing crops average except in Rajanpur tahsil and of unirrigated crops of Jampur tahsil which are below average. | Sowings continue. |

*REMARKS.*

Weather remained dry. Rain is needed. Condition of standing crops (sugarcane, cotton, wheat, barley, gram and oilseeds) is generally average on irrigated and below average on unirrigated areas. Premature opening of bolls of American cotton is reported from Gujrat, Shahpur, Montgomery, Lyallpur and Multan. Picking of cotton and pressing of sugarcane continue. Probable yield of cotton is generally below normal and that of sugarcane below normal to normal. Sowing of spring crops is in progress. Harvesting of toria has commenced in a few districts. Fodder and drinking water are generally sufficient except in parts of the south-east and south-west. Supplies of canal water are generally sufficient in Sirhind, Upper Bari Doab and Haveli canals and insufficient elsewhere. Condition of cattle is generally fair except in Hissar and unirrigated tracts of Rohtak. The daily average number of workers at test works in progress in Rohtak was 7,616. Retail prices in seers per rupee are as follows :—

LAHORE, FRIDAY, FEBRUARY 10, 1939.

## PART II.

### GENERAL.

### Review of the annual report of the Civil Veterinary Department, Punjab, for the year 1937-38.

THE Veterinary Department of the province has suffered a great loss in the death of Mr. T. F. Quirke in January, 1938. He had been in control of veterinary work in the province for almost 18 years and became the first Director when the Veterinary Department was separated from the Agricultural Department in 1928. It is largely owing to his expert guidance and enthusiasm that the Department has achieved a position not excelled by that of the Veterinary Department of any other province in India. In him Government have lost a very experienced officer and the people of the province a most sympathetic friend. Government are fortunate in finding in Captain Walker a successor whose long experience of the Department gives promise of the same high standard being maintained.

BREEDING OPERATIONS.

2. (i) *Government Cattle Farm, Hissar.*—The year has been a period of trial and stress for the Farm because of the second successive failure of the monsoon in 1937 as well as that of the winter rains. A steady supply of canal water has been the only redeeming feature. Although the fodder reserve at the end of the year was slightly larger than that at the end of the previous year, the position by the end of August, 1937, had become so acute that there was only a 15 days' supply of rations between 10,000 animals and starvation.

GGP

The live-stock on the Farm increased from 9,324 animals last year to 9,882 animals. 987 animals, including 507 pedigree bulls and 204 approved bulls, were issued for breeding purposes, mainly to District Boards. The total value of this stock was Rs. 2,44,025, but to encourage breeding it was sold for Rs. 74,692. Thus a sum of Rs. 1,69,333 was contributed by Government for improvement of animal husbandry. Apart from this, the Farm issued 1,724 animals against 1,429 animals in the previous year for breeding and draught purposes.

Owing to financial considerations the scheme to increase the Farm herds to enable the issue of 1,000 pedigree bulls a year has been held in abeyance. To meet the keen demand of breeders, approved young bulls are being purchased by the Department from areas of the Hariana tract which have long been served by pedigree bulls. These bulls are then reared on the Farm and issued as approved bulls on attaining the age of 2½ years. These purchases supply a welcome addition to the income of the zamindars and foster their interest in breeding high class animals. Incidentally, experience of approved bulls shows that pedigree bulls, born and bred on the Farm, are by far superior to 'approved bulls.'

The Farm Dairy made satisfactory progress. 172 cows yielded more than 1,000 lbs of milk as against 162 last year. As many as 100 cows yielded 2,000 lbs or more as against only 78 last year.

Much valuable work has been started on sheep and goat breeding partly with the help of provincial funds and partly through the generosity of the Imperial Council of Agricultural Research.

The Farm has been free from any serious epidemic disease. The mortality from contagious diseases was only 23 animals against 44 last year.

(*ii*) *Grantee Cattle Farms.*—There are five grantee cattle farms in the Lower Bari Doab Canal Colony and all are worked satisfactorily. Some excellent records of milk yield from cows have been established : for example, 18 cows gave over 7,000 lbs of milk, 8 indeed over 8,000.

The Farm of Khan Sahib Chaudhri Allah Dad Khan has gained an all-India reputation in cattle-breeding, five animals bred on it winning first or second prizes at the All-India Cattle Show held at New Delhi in February, 1938.

(*iii*) *Cattle-breeding in special tracts.*—Both the Hariana and the Dhanni Cattle Breeding Schemes continue to make progress. In the Hariana tract there were 2,392 pedigree bulls at the close of the year as compared with 2,281 the previous year. In the Dhanni tract there were 110 District Board bulls and 347 subsidy bulls as compared with 87 and 269 bulls, respectively, the previous year. The Dhanni Scheme is steadily growing in importance and popularity and deserves all possible encouragement, as the Dhanni breed is one of the principal potential assets of the infertile northern Punjab. It is significant that the demand for Dhanni bulls is getting acute, and that a bull of this breed was sold at the All-India Cattle Show for the handsome price of Rs. 500. Government have increased the annual grant for this scheme by a sum of Rs. 10,000.

(*iv*) All the other special schemes for promoting cattle breeding, including the Montgomery Village Cattle Breeding Scheme, the Dajal Cattle Breeding Scheme, Dera Ghazi Khan, the Malwa Cattle Breeding Scheme, the Kangra District Cattle Breeding Scheme, etc., have completed a year of successful work. General cattle breeding in districts through the agency of District Boards has also made substantial progress. At the end of the year there were 5,962 District Board bulls in the province as compared to 5,370 in the previous year.

3. In spite of the progress made, a great deal still remains to be done. The total cow population of the province 2,653,056 requires over 26,600 stud bulls, but at present only 11,302 approved bulls are registered with the Department.

4. With the help of the Department, buffalo-breeding, horse-breeding, camel-breeding and sheep and goat breeding have been steadily encouraged in various tracts. The co-operation of District Boards in these various schemes is a welcome feature.

Very little specific work has been done on poultry-breeding although much propaganda has been done by veterinary subordinates during their tours. Disease control is the main problem here, and every possible effort should be made to solve it, as poultry have a very definite part to play in the economy of small holdings. For this, however, much research is needed.

5. Considerable propaganda was done by the Department at various cattle and horse fairs and shows. The number of cattle fairs held increased from 252 last year to 294.

### Diseases among Live-stock.

6. The two formidable diseases of Rinderpest and Hæmorrhagic Septicæmia continue to claim the greatest percentage of mortality. Total mortality from contagious diseases amounted to 33,696 as against 31,063 in the previous year. These figures have to be judged against a total cattle population of nearly 16 millions. Rinderpest accounted for 52 per cent. of the total death-roll. Prompt reporting and segregation are essential for minimising the ravages of these diseases. Reporting has been satisfactory both from British territory and adjoining Indian States.

The introduction of Goat-Virus vaccine against Rinderpest has been a great step forward in the control and prevention of this disease, and it is highly satisfactory to note that 805,000 animals were inoculated as against 169,000 the year before.

7. Four new hospitals were opened during the year, but many more are required. To meet the deficiency, which it must take time to remedy, outlying dispensaries are being established and there were 1,216 at the end of the year. The total number of patients treated in the veterinary hospitals was 1,704,578 against 1,637,507 in the previous year. Medicines were also supplied for more than 200,000 animals not brought to hospital.

### Veterinary Education.

8. The Punjab Veterinary College, Lahore, maintained its popularity. This is evidenced by the fact that as many as 228 candidates applied for admission against 87 vacancies. Of the admitted candidates 38 were statutory agriculturists. Altogether 79 candidates passed the various annual examinations against only 29 in the previous year. This is all to the good as the College is still unable to meet the demand for L.V.Ps.

The College hospital was busier than ever, the average daily attendance of patients rising from 173 to 214.

Much valuable research work has been done at the College during the year, and Government are gratified to note that the College Hospital Surgeon, Chaudhri Mushtaq Ahmad, secured a gold medal awarded by the All-India Veterinary Association in appreciation of the useful veterinary instruments and appliances invented by him.

The total expenditure on the College has risen from Rs. 1,98,769 to Rs. 2,12,927.

9. The total expenditure of the Department amounted to Rs. 23,52,000 against Rs. 21,47,000 in the previous year. To this District Boards contributed 8·94 lakhs and Government 14·58 lakhs.

10. The Report describes in detail the effect given to the recommendations of the Royal Commission on Agriculture during the calendar years 1936 and 1937. Steady progress has been made on all fronts.

11. The high standard of work done by the Punjab Veterinary Department is reflected in the various prizes and medals won by different Punjab breeds of cattle at the All-India Cattle Show—the first of its kind in India—held at New Delhi last February under the distinguished patronage of His Excellency the Viceroy.

12. Government desire to thank Captain Walker for his very interesting report and endorse his appreciation of the work done by the College staff and the district officers.

By order of the Punjab Government,

*The 21st January, 1939.* M. L. DARLING,

*Secretary to Government, Punjab,*
*Development Department.*

REVIEW OF THE PROGRESS REPORT ON THE FOREST ADMINISTRATION FOR THE YEAR 1937-38.

**Proceedings of the Government of the Punjab in the Forest Department, No. 729-C., dated the 11th February, 1939.**

READ :—

Progress Report on the Forest Administration for the year 1937-38.

Financially the year was one of slowly returning prosperity to the forests of the Punjab, and the Punjab Government observes with satisfaction that after seven years, in which the department has shown a deficit, a profit of Rs. 75,185 has been made during the year under report. This is partly due to the decision to debit expenditure to capital account unless it has been financed with borrowed money. In consequence it is no longer necessary to debit the accounts with interest charges which were not in fact being incurred.

2. The year has, however, also been one of exceptional prosperity to the resin industry due to conditions in the European market, a profit of Rs. 1,32,740 having been made on the Jallo Rosin Factory. Another factor, which has proved lucrative, is the price now prevailing for fuel wood, which has been rising for some years and has now reached a high level. The reasons for this are not altogether clear; but it is believed that these prices are to some extent due to the decreasing supplies of fire ood in the Punjab. These diminishing supplies are the justification for the extensive irrigated plantations in the south-west Punjab and should make them much more profitable than they have been in the past.

3. This problem of diminishing supplies of firewood is also related to the wider problem of erosion in the Punjab foot hills, to which the Punjab Government has been steadily devoting increasing attention, since the report of the Erosion Committee in 1932 first brought this question into prominence. For the first time the annual report of the Department contains a special sub-section on this subject and throughout the report there are references to the increased pressure on the f dder resources of the province which the steadily mounting population both of men and animals has produced. The problem is one of vital importance to the Punjab, depending as it does for its canal irrigation upon the supplies in its rivers which in turn depend on the catchment areas from which they spring. The problem is being intensively studied in the light of the experience gained in America and other countries, which have to face a similar problem. It is proposed to constitute a special Circle with a full staff to devote itself to the conservation of the soil. The work is one of considerable difficulty because it is essential to work with the co-operation of the owners of the soil, and it is not always easy to persuade them that it is for their ultimate benefit that their land should be closed to grazing and browsing. Nevertheless, with the appointment of a special officer in the Hoshiarpur district in 1934 (a result of the Erosion Committee) and, more recently of special officers in the Jhelum, Ambala, Gurgaon and Rawalpindi districts a beginning has been

made, and in Hoshiarpur, where Mr. A. P. F. Hamilton worked for some years with conspicuous ability and tact, the results are most promising. When the anti-erosion circle comes into being, it is confidently expected that further progress in re-afforestation, the construction of protective *bunds* and the stopping of fissures in the hill-sides likely to develop into dangerous landslides will make substantial progress. Technical assistance in engineering work is to be provided by the Drainage Circle of the Public Works Department (Irrigation Branch).

4. The difficulties are as much, or even more, psychological than technical, for it is by persuasion and propaganda alone that the co-operation of the graziers and tillers of the soil, whose interests are ultimately affected, can be achieved and the same may, to a very large extent, be said of forest as of soil conservation.

5. The Chief Conservator has mentioned a steady increase in forest offences. This is symptomatic of the increasing difficulty of harmonising the interests of Government and people in the forests when population is rapidly growing. Largely because of this the present Government, as one of its earliest acts, appointed a Committee with Mr. C. C. Garbett, C.S.I., C.M.G., C.I.E., I.C.S., in the chair assisted by the M.L.As. representing the districts in which the problem was most acute, *viz.*, Rawalpindi, Attock, Jhelum and Kangra all of which the Committee visited during the winter of 1937-38. The terms of reference were as follows :—

(1) What difficulties are experienced by those who live in and near forests as a result of the existing system of forest administration ?

(2) How can these very people best be interested in the conservation of the forests ?

(3) How can their co-operation with the Forest Department be encouraged and secured ?

6. The Committee did not confine itself to criticism of the Forest Department as the Chief Conservator of Forests' report perhaps suggests. On the contrary, the Committee recognised that the Forest Department had reached a high degree of technical efficiency in the management of the valuable properties in their charge, an opinion which the Punjab Government fully endorses. At the same time it suggested that its work could be rendered more effective by increasing the co-operation of the people in it. The Committee's recommendations, therefore, most of which have been accepted by Government are, in general, inspired by the desire to associate the people with Government for their common advantage, in forest and soil conservation. They emphasized in their report that every effort must be made by patient propaganda and education to remove any antagonism which may have arisen where, as not infrequently happens, it is difficult to reconcile the interests of the two parties. This cannot be done overnight and the problem, like all problems involving the close co-operation of a large number of people, is one which will take many years of patient labour to resolve. One of the Committee's most important

recommendations is that an endeavour should be made to assist the village communities in the management of their common lands (which are not at present under the control of the Forest Department and are often severely denuded) for fodder and grazing purposes and to create a system of village forests managed by the village communities themselves, in their best interests. This too will require patient and sympathetic administration for many years. It is of good augury that the Punjab Government is already actively interesting itself in measures to revivify the *Panchayat* system, and should this end be achieved, *Panchayats* may in time become a potent force in the better management of forest pasture and soil conservation.

7. At the suggestion of the Government of India a Fodder and Grazing Committee has been created during the year under report and it is hoped that its labours, which are yet in their initial stages, will ultimately prove to be of very great benefit in dealing with these problems.

8. It is gratifying that the forest exhibit at the All India Exhibition held during the winter 1937-38, was visited by over three lakhs of people. The forest pavilion was attractively designed and must have served well to demonstrate to those who visited it the importance of its forests in the prosperity of the province as a whole.

9. The management of these forests is a charge of great responsibility, affecting as it does most vitally the welfare of a province in which millions depend for their very existence upon the water received from the hills; and it requires unceasing study and vigilance on the part of the controlling staff and constant touring under solitary and often laborious conditions. The Punjab Government, therefore, desires to express its cordial appreciation to Mr. Parker who held the post of the Chief Conservator of Forests throughout the year, and to the officers of the department for their successful administration and to associate itself with the commendations for good work given to certain of his officers and subordinates by the Chief Conservator of Forests in his report.

---

*Order.*—Ordered that a copy of the foregoing be forwarded to the Chief Conservator of Forests, Punjab, for information.

Ordered also that the review be published in the *Punjab Gazette* and be circulated with the report and that copies be sent to the Government of India in the Department of Education, Health and Lands.

By order,

M. L. DARLING,

***Secretary to Government, Punjab,***

***Development Department.***

**Published by Authority.**

LAHORE, FRIDAY, MARCH 3, 1939.

## PART II.

### GENERAL.

**Speech of the Hon'ble Mr. Manohar Lal, M.A., Barrister-at-Law, Finance Minister, Punjab, introducing the Budget Estimates of the Punjab for the year 1939-40 in the Punjab Legislative Assembly on Monday, the 27th February, 1939.**

THE only art of the prophet that a Finance Minister may practise is to make his estimates with scrupulous caution and minute attention to detail. But his forecasts, particularly in an agricultural province where both revenues and expenditure depend largely on nature's vagaries, are apt to be unexpectedly disturbed. Finances arranged with the utmost prudence and planned with meticulous regard for stability may be dislocated by hailstorm or drought or other visitations of unkindly nature. In the circumstances a provincial government can, during any given year or run of years, only hope in humility and prayer that its finances will remain unscathed. As these disasters are, however, far from exceptional or of infrequent occurrence, proper and well-calculated

provision has to be made based over a spread of years to withstand their worst effects. The duty is also cast upon a provincial government of exercising the most vigorous vigilance in husbanding the resources of the province and of studying every possible method of securing immunity for its people from the ever possible menace of natural calamity. This is government's paramount duty. Judged thus, I trust that the watchfulness and foresight of the Ministry to-day will commend itself to the whole-hearted approval of this Assembly and of the province whose welfare it is the prime obligation of this Assembly to safeguard. The requirements of exigent finance have been fully respected and the principles of sound finance strictly observed. In the year's working famine has caused much unavoidable dislocation, and the next year's estimates are affected by this calamity even in a greater measure. But heroic efforts have been made to alleviate immediate distress, and plans have been matured to obviate its rigours in the future. I rise to-day to make my statement in the happy consciousness of these efforts and these plans.

In my statement, I propose to avoid detail, because this is gathered easily in the Explanatory Memorandum of the Finance Secretary, but I am also anxious to-day to be as simple and brief as possible for it is thus alone that honourable members can form a sure and intelligible picture of our finances.

I must address myself now, according to established usage, to accounts and estimates of the three years with which we are particularly concerned—the year 1937-38 for which final accounts are now available, the current year, 1938-39, for which revised estimates can now be exhibited, and the next financial year, 1939-40, for which the budget is to be presented.

*1937-38.*

The revenue accounts show a realized surplus of Rs. 32 lakhs (32·28 lakhs to be more precise). When the budget for the year was presented, the estimates showed only a small revenue surplus of Rs. 1·72 lakhs. It will be within the recollection of the honourable members that the year started with a most disastrous hailstorm in several parts of the province and large revenue remissions and other relief to the agriculturists were provided by the Government, on the very first day of their entering upon office, in a strikingly courageous manner and with unprecedented rapidity, while very substantial additions were made to expenditure on beneficent departments at the same time. It was calculated at the time that the two operations involved a sum of nearly Rs. fifty lakhs. But as the year progressed a welcome surplus came into sight, and at the time of the presentation of the current year's budget when revised figures were available for 1937-38 the position had so far improved that the surplus could be estimated at Rs. 50 lakhs in the revenue accounts. The total surplus

estimated was Rs. 61 lakhs composed of our revenue surplus of Rs. 50 lakhs and the Government of India contribution of Rs. 11·04 lakhs. Eventually the actual payment by the Government of India was only Rs. ten lakhs. This large surplus was in the main transferred to the extent of Rs. 55 lakhs to that Special Development Fund which constituted a significant feature of our last budget as it strengthened the true foundations of a comprehensive programme of beneficent activity in the countryside.

Before the accounts closed, the position had so far further improved that the revised surplus of Rs. 6 lakhs, after making a provision for the big Special Development Fund within the year resulted in an actual surplus of Rs. 32 lakhs. In one word in the year 1937-38 our finances were in a most prosperous condition. Liberal provisions were made for beneficent departments registering an advance of over Rs. 21 lakhs on the previous year, a big fund was created for initiating a policy of development and reconstruction, and withal a large revenue surplus of Rs. 32 lakhs was realised. This takes no account of the Extraordinary Receipts of Rs. 30 lakhs against which there was a capital expenditure of only a little over Rs. 11 lakhs. The total improvement was thus of Rs. 51 lakhs. I venture to affirm that given normal conditions of rainfall and water supplies in our canals, this particular year's working represents a fairly true present position of our provincial finances.

*1938-39.*

When the budget was presented last year, we provided a small revenue surplus of a little over Rs. 5 lakhs. This did not include the amount of Rs. 12 lakhs to be received from the Government of India. If, therefore, nothing exceptional had happened during the year, the revised estimates would to-day have shown a surplus of Rs. 17 lakhs. On the other hand, these estimates actually show a deficit of Rs. 27 lakhs. In the understanding of this disparity lies the secret of the understanding of our finances during the current year. It will be within the recollection of honourable members that they have already agreed to considerable additional expenditure as contained in the two Supplementary Estimates of June and November, 1938.

The following are some of the more important entirely new items in the Supplementary Estimates as now revised :—

| | Lakhs. Rs. |
|---|---|
| (1) Forests—Final payment in connection with the acquisition of complete rights in the Jallo Rosin and Turpentine Factory .. | 3·39 |
| (2) Order Police—refund of excess recovery made in 1937-38 .. | 1·00 |

| | | Lakhs. Rs. |
|---|---|---|
| (3) Decrease in the amount recoverable under Order Police .. | | 1·18 |
| (4) Guarantee to the North-Western Railway for the Kangra Valley and Shahdara-Narowal Railways .. | | 4·20 |
| (This last exceptional item resulted from certain changes in accounting procedure). | | |
| (5) Grant to the Lahore Municipal Committee .. | | 3·00 |
| (6) Grant to the Lahore Improvement Trust .. | | ·25 |
| (7) Survey of Lahore urban areas .. | | ·67 |
| (8) Legislative Assembly .. | | 1·42 |
| November Supplementary | 75,000 | |
| Revised Estimate .. | 52,000 | |
| Additional .. .. | 15,000 | not included in the revised. |
| (9) Water-logging investigations .. | | 1·00 |
| (10) Gurgaon Settlement .. | | ·79 |
| (11) Karol Tube-wells .. | | ·32 |
| Total .. | | 17·22 |

These items are entirely distinct from expenditure due to famine. They could not be anticipated at the time of the presentation of the Budget as decisions with regard to them were not reached till subsequently. It is further necessary to bear in mind that the major part of these items constitute exceptional expenditure of a wholly non-recurring nature and it was unfortunate that the expenditure was forced upon us in a year of acute distress and intense famine in a large part of the province.

I must now refer to the effect of the famine conditions in a large part of the south-eastern Punjab and particularly in the Hissar district on the year's finances. It will be remembered that the winter rains in 1937 were defective in the extreme in the Hissar and Gurgaon districts, the monsoon of 1938 in that part of the province failed almost completely, and there has been a total absence of winter rains in 1938 and in the early part of this year. Such a continued failure of rains in a part of the province dependent almost entirely on rains began to show itself in fodder scarcity early in 1938, and as the year advanced provision for the supply of fodder and the opening of Test Works for the relief of famine stricken people had to be undertaken on an extensive scale, till, towards the close of the year, Hissar had to be declared to be a famine area, though in spite of scarcity conditions Gurgaon, Rohtak and Karnal have escaped from the extreme disastrous conditions technically so described.

During the year the revised estimate for direct expenditure because of famine and scarcity conditions amounts to Rs. 25·44 lakhs and to this has to be added a sum of Rs. 1¾

lakhs in the Veterinary Department for the purchase of fodder for the Hissar Cattle Farm due entirely to famine, making an aggregate of Rs. 27·19 lakhs (Hissar's responsibility is the largest being over Rs. 19 lakhs). This is as regards direct expenditure. But the famine has been responsible for a considerable loss in land revenue and Abiana charges. Suspensions of land revenue amount to Rs. 24·86 lakhs (Rabi Rs. 4·13 lakhs and Kharif Rs. 20·73 lakhs), while remissions of land revenue in the famine districts amount to Rs. 7·41 lakhs (Rabi Rs. 5·61 lakhs and Kharif Rs. 1·80 lakhs). In other words, suspensions and remissions in the four districts of Hissar, Rohtak, Gurgaon and Karnal amount to no less a sum than Rs. 32·27 lakhs in the year 1938-39. If we take into account the fact that normal suspensions and remissions in these districts apart from famine estimated on the basis of an average of the last four years would be Rs. 14 lakhs, it follows that Rs. 18·27 lakhs is the direct loss in land revenue caused by famine. To this we have to add the loss during the year of water rates in these districts amounting to Rs. 11 lakhs and as the average remission in water rate is only about two-thirds of a lakh per annum, famine is responsible for a loss of no less than Rs. 10 lakhs. The total loss then in land revenue and water rates directly resulting from famine during the year under consideration is Rs. 28 lakhs. The famine thus has caused a deterioration in the year's finances of no less a sum than Rs. 55 lakhs— Rs. 27·19 lakhs in direct expenditure and Rs. 28 lakhs in loss in land revenue and water rate. As a part of the famine expenditure was met by a transfer from the Famine Relief Fund, completely exhausting the Fund, of Rs. 9 lakhs beyond the normal amount provided in the budget, the net total effect on the finances of the year is Rs. 46 lakhs. As against this, the deficit in the revised estimate is Rs. 27 lakhs. If famine conditions had not obtained, the year's working would have shown instead of a deficit of Rs. 27 lakhs a surplus of Rs. 19 lakhs and the Famine Relief Fund would have also remained intact. It is important to bear this in mind to judge of our normal financial position. We would have been able to meet the whole of the additional expenditure, of which some major portions were set forth in our supplementaries, and yet would have had a revenue surplus of Rs. 19 lakhs but for the famine. I have not referred to the indirect deterioration which our finances suffered because of the famine. That is bound to happen in a variety of ways where scarcity conditions obtain and trade and commerce suffer.

Grave as the effects of the famine on the year's working have been, honourable members would note that we have in our extraordinary receipts a plus item of over Rs. 21 lakhs as against which there is no expenditure in the revised estimates. As these extraordinary receipts are kept distinct only for certain technical accounting purposes but are

otherwise really a part of the revenues of the province, the final result on our balances is to cause a loss of only Rs. 6 lakhs.

For a correct appreciation of the financial position during the year it is also necessary to note that there are certain other items of substantial expenditure, to which no reference has hitherto been made, and this is expenditure which was not in the original Budget, and provision for this expenditure had to be made in the Supplementary Estimates. These constitute an aggregate of about Rs. 16 lakhs. The major items in these are some of those in the Supplementary Estimates presented to-day :—

| | (*Approximately*). Rs. (lakhs). |
|---|---|
| (1) Interest on Debt and other obligations .. .. | 4 |
| (2) Superannuation Allowances, etc. .. .. | 4 |
| (3) Administration of Justice .. | 2½ |
| (4) General Administration excluding certain accounting transfers .. .. | 1¼ |
| (5) Medical .. .. | ¾ |
| Total .. | 12½ |

These could not be provided for in the Budget, because they could not be anticipated with any certainty, though several of them unlike those which I mentioned earlier are of recurring nature.

To sum up: The year 1938-39 but for the famine would have yielded a surplus of Rs. 19 lakhs even after meeting large expenditure of a wholly non-recurring and exceptional nature amounting to no less than Rs. 16 lakhs. If this expenditure had not to be incurred during the year, and it has been incurred once for all, our surplus would have been Rs. 35 lakhs (and this again is apart from the saving in extraordinary receipts of Rs. 21 lakhs) and our Famine Relief Fund would have remained intact.

## *1939-40.*

An examination of the financial position during the years 1937-38 and 1938-39 establishes beyond all doubt the essential soundness of our finances. On the working of the two years taken together, there is a large real surplus ; but even taking the year 1938-39 by itself across which lies the heavy shadow of an acute famine of immense magnitude, there is no deficit that need trouble us if we also take extraordinary receipts into consideration ; and such deficit as is there on merely revenue account is more than explained by abnormal and heavy famine expenditure, in spite of much exceptional and non-recurring expenditure provided since the Budget, there would have been a substantial surplus but for the famine.

Now I come to the year 1939-40 for which the Budget is being presented to-day. The total estimated revenue receipts are Rs. 11,67 lakhs and expenditure Rs. 11,96 lakhs providing for a deficit of Rs. 29 lakhs. As can be easily foreseen, this deficit is entirely due to famine, which again dominates the finances of the year. It is estimated that the direct expenditure on famine would be Rs. 38·85 lakhs including Rs. 1½ lakhs in the Veterinary budget for the purchase of fodder for the Hissar Cattle Farm. Of this expenditure, as in the previous year, the major portion (Rs. 29¼ lakhs) is on account of Hissar alone. It is difficult to estimate exactly the likely loss in land revenue and in Abiana, because the data for such estimation are not fully available. There is yet a possibility of some relief if winter rains come, and ample monsoon during the year 1939 may change the whole aspect of the situation. But even on an optimistic basis and assuming that the Kharif of 1939 will be normal, suspensions and remissions in land revenue are likely to be not less than Rs. 16 lakhs, and allowing for a normal Rabi suspension (Rs. .5 lakhs) the estimated loss is Rs. 11 lakhs, while remissions of Abiana are likely to cost Rs. 5 lakhs. The total effect of famine in 1939-40 is thus Rs. 55 lakhs—Rs. 38·85 in direct expenditure and Rs. 16 lakhs in reduced revenue—as against a budgeted deficit of Rs. 29 lakhs; but for the famine there would have been no deficit at all, and under normal conditions a surplus of Rs. 26 lakhs may have been expected. And, we must remember that even as it is the extraordinary receipts during the year are estimated at Rs. 35 lakhs with no corresponding expenditure and therefore the real effect of the year's working on our financial position is not in any minus direction. Taking the normal revenue receipts and the extraordinary receipts technically so called together there would on the present estimates be actually a surplus of Rs. 6 lakhs. This establishes the essential soundness of our financial position. While it is necessary to study every possible economy, and I might intimate to the House that this has been kept very strictly in view in estimating expenditure during the year, and husbanding our resources to the fullest possible extent, there is no occasion to be disturbed about our financial position.

I do not propose to compare variations in the budget estimate from the revised figures of the current year as these have been duly exhibited in the Explanatory Memorandum of the Finance Secretary. No noticeable variations of any particular significance exist. There is a fall in our net Irrigation receipts in spite of the fact that working expenses are being steadily reduced. There is a slight increase in net land revenue, because we are proceeding on the basis

of normal Kharif in 1939, further unlike the budget estimates of the current year we have already included a sum of Rs. 13½ lakhs as a contribution from the Government of India constituting an increase of Rs. 1½ lakhs on the revised figures. A characteristic of our revenue in recent years has been a steady decline in our income from Stamps. This is a feature which seems to have come to stay.

It is necessary further to refer only to an increase on the receipt side of Rs. 8 lakhs under Beneficent Departments due mainly to a larger transfer from the Special Development Fund. The increase under Civil Works is accounted for by a bigger contribution from the Central Road Development Fund, but a significant item to which particular attention must be drawn is under Other Taxes and Duties, where an increase of Rs. 6½ lakhs is registered. This is due entirely to the proposed duty on motor spirits and lubricants. This is a measure to secure permanent addition to our revenues and is in accordance with similar measures in other provinces. I might intimate to honourable members that we have in contemplation a number of other additional sources of revenue but they are still at the stage of examination. The main principles in regard to them that will have to be borne in view will be to secure as far as possible equity and equality in the burden of taxation.

The increase in the Provincial Excise is a result of enhancement in the issue prices of excise opium and the levy of a transport pass fee on Charas. On the other side, there is a decrease due to the Famine Relief Fund having been exhausted, there is a consequent absence of any transfer from the fund. There is also a decrease on account of smaller investments in treasury bills. In this connection a reference may be made with justifiable pride that the Finance Department itself was responsible during the year 1938-39 for an income of Rs. 1·42 lakhs by careful short period investments of all available money not required for the immediate needs of the province. The Finance Department is not an earning department and yet it has been able to add its small quota to the year's revenues.

On the expenditure side a reference to the Explanatory Memorandum would show that while there is a fall of Rs. 5¼ lakhs under Civil Administration and Rs. 7·39 lakhs under Civil Works, the two main items of increase are Famine (Rs. 14 lakhs) and Beneficent Departments (Rs. 17 lakhs). It is not necessary to comment on the unfortunate increase under Famine, but honourable members would note with pleasure that under the Beneficent Departments a most gratifying further increase is provided, and the total expenditure now stands at the very considerable figure of Rs. 3,44 lakhs. This is a higher figure than ever attained in the past and

that such a large increase on the budgeted provision of 1938-39 is being made in a year of grave scarcity, when direct Famine expenditure stands at the huge figure of Rs. 39 lakhs, and when famine is further bound to cause a big loss in revenue, is a striking proof of the real solicitude of your Ministry for the welfare of the people. The advance on the previous year is in every single branch of beneficent activity whether Education, Medical and Public Health, Agriculture, Veterinary, Co-operation or Industries. The Schedule of New Expenditure which had to be devised with particular care in view of famine conditions was conceived in a most liberal spirit so far as these departments are concerned. Under 'Education' while there is enlargement of activity in several directions attention continues particularly to be focussed on the expansion of girls' education. Large provision is made for new schools—three new middle schools and 180 new primary schools are to be opened and additional staff for many of the existing schools has been provided. Arrangements for the training of women teachers are also being extended. Grants for vernacular education have substantially increased, and a start in attacking the problem of illiteracy definitely made. In some parts of the province, particularly in the Multan Division, noticeable work in the campaign against illiteracy appears to be already done. Plans also for raising the standard of at least one school in each tahsil to furnish a model for other schools have been carried a stage further. Under 'Medical' there is an increase in the staff of qualified women doctors, and the Hospital for Women at Hazro is to be provincialised. Three Tahsil headquarters hospitals are also to be taken over by Government and placed on a satisfactory basis. Due to the philanthropy of a donor at Lahore a Radium Institute, a very necessary adjunct to a therapeutic establishment, is to be opened. Several fresh schemes for more extensive medical aid are contemplated, such as opening subsidized dispensaries in rural areas and the employment of part-time private practitioners, as also a scheme for making pure quinine available in rural and urban areas. Public Health continues to engage the special attention of the Ministry, and in the new expenditure a provision of Rs. 5 lakhs has been made for sanitary schemes. Schemes for the improvement of drinking water supply have received particular attention, and a sum of Rs. 10,000 has been specially earmarked for wells for Scheduled Castes. Attention is also to be invited to the fact that arrangements for drainage and paving of streets in nearly 286 villages are also to be made. Under 'Agriculture' the work of demonstration is to take a more intensified form, and research in the water requirements of various crops is to be undertaken. The important Veterinary needs of the province have also been kept in view; four new Veterinary hospitals are to be established by increase in the grants to the District

Boards. The Co-operative Department will be able to carry forward its good work in the consolidation of holdings by further grants and its other activities are also to be helped by increased assistance. Under 'Industries' we have to note a departure which I trust will be welcomed in this House and throughout the province. We have to have a Provincial Stores Purchase Department of our own and not rely any longer on the good offices of the Central Stores Department. This would enable larger attention being paid to our own industries—a matter of no small importance to a province like ours. A scheme for improving the pottery industry, for which this province is favourably situated, is also to be initiated. Organisation of industrial work in the province is being helped by an increase in the number of Assistant Superintendents, while provision is being made for normal assistance under the Punjab State Aid to Industries Act, as also under the Industrial Loans Act.

References have frequently been made in this House and outside to the necessity of grappling with the problem of corruption. Apart from the steps taken to meet individual cases of corruption with the utmost severity, a regular machinery is being now established to investigate complaints generally in the public services so as to attack the problem in a more comprehensive and effective manner. It is hoped that the appointment of an officer for the special purpose would go at least some distance in removing the worst features of this old malady in our public life.

TRANSFER FROM GRANTS AND FUNDS.

On page 3 of the Finance Secretary's Explanatory Memorandum there is an important statement showing transfers from certain grants made by the Government of India and from certain funds created by the provincial Government. These transfers tend to swell our normal annual revenue position and have to be borne in view in determining the year's actual revenues.

FAMINE EXPENDITURE.

Much information has been made available to honourable members in answer to Assembly questions about finance in connection with the famine. I have made references to it in part while dealing with the current year and the estimates for 1939-40. It would be an advantage if the whole position is put together as follows :—

| | | *1938-39.* | *1939-40.* |
|---|---|---|---|
| | | Rs. (in lakhs). | Rs. (in lakhs). |
| Direct expenditure | .. | 27 | 39 |
| Remissions and suspensions | .. | 28 | 16 |
| Taccavi Loans .. | .. | 37 | 38 |
| Total | .. | 92 | 93 |

The total for the two years taken together amounts to Rs. 1,85,00,000.

THE THREE YEARS.

Some authorities on budgetary procedure have emphasized the desirability of conceiving estimates over a period of three years rather than proceeding on the basis of annual estimates. Whether Governments can adopt such a course or not is a matter that is still in the region of unsettled controversy. But Governments have to plan ahead and Governments have undoubtedly to consider their position over a period of years. In this connection we might well reflect on our three budgets : in 1937-38 a surplus of Rs. 32 lakhs was realized while providing for a Special Development Fund of Rs. 55 lakhs ; in 1938-39 we were confronted by a terrible famine in a large part of the province and our finances permitted a direct expenditure on the famine of Rs. 27 lakhs and a direct loss in our revenue caused by the famine is Rs. 28 lakhs and yet the deficit was all but wiped out by our extraordinary receipts even though we were able during the year to meet heavy exceptional non-recurring expenditure of the magnitude of Rs. 16 lakhs. In the year 1939-40 were it not for the persistence of the famine causing a loss of Rs. 16 lakhs in revenue and involving a direct expenditure of Rs. 39 lakhs there would have been a revenue surplus of Rs. 26 lakhs, not taking into account extraordinary receipts amounting to Rs. 35 lakhs. Taking the three years, of which the two are famine years, our finances show, after making most liberal provisions for beneficent expenditure, a real and substantial surplus ; abundant proof of the soundness of our finances judged by whatever standard we may choose to apply and tested by whatever theories we may hold about provincial finance.

I must, however, strike a note of warning. The satisfactory position that has been obtained on the whole is due in a very large measure to drastic reductions in expenditure. As soon as it was realised that famine was going to place serious and heavy burden on provincial finances, the urgent problem of retrenchment was immediately taken in hand. During the current year it was not possible to do much as the exact magnitude of famine expenditure could not be gauged till some time late in November, 1938, and the time then left to effect economies was too short to permit of any extensive or radical steps. All that was possible to do was to reduce Irrigation working expenditure including Maintenance and Repairs to the extent of Rs. 7¼ lakhs and to curtail expenditure on Civil Works by postponing certain works and by slowing down progress on other works. The saving thus effected came to about Rs. 14 lakhs. In 1939-40 economy has been pursued with greater

vigour and has afforded larger results. These can be briefly stated as follows :—

| | Lakhs. |
|---|---|
| | Rs. |
| Reduction in leave salary, travelling allowance and contingencies .. .. .. | 12·30 |
| Lump sum cuts in certain departments .. | 3·12 |
| Reduction in Irrigation maintenance and repairs .. .. .. .. | 4·50 |
| Postponement of civil works and saving in repairs .. .. .. | 11·13 |
| Total .. | 31·05 |

It is obvious that drastic reductions of this character applied at short notice in a large number of directions must affect administration and reduce efficiency, but the circumstances left no option and I trust that the action taken will fully commend itself to the House. So narrow and inelastic are the finances of a province in India that the imperious need of conserving resources cannot be ignored for an instant without serious consequences. The margin of safety is always small, and the demands for additional expenditure persistent and pressing. The path of financial rectitude in these circumstances is beset with difficulties and pitfalls.

### Hydro-Electric Schemes.

The net receipts under the Hydro-Electric Schemes have steadily gone up since the year 1933 when the period of 'construction' was over and that of 'operation' actually started. To take into consideration only the more recent years—in 1936-37 the net receipts amounted to Rs. 15·09 lakhs, in 1937-38 they rose to Rs. 18·36 lakhs. In the year 1938-39 a change was introduced in the system of accounting and from the net receipts deductions were made on account of depreciation charges duly transferred to receipts under the deposit head " Depreciation Reserve Fund for Hydro-Electric Scheme ". In the year 1938-39 (revised) the real net receipts were Rs. 13·90 lakhs plus Rs. 7·42 lakhs (transferred as depreciation charges to the deposit head " Depreciation Reserve Fund for Hydro-Electric Scheme"), that is, an aggregate of Rs. 21·32 lakhs. As against this, an interest charge of Rs. 26·35 lakhs is payable, leaving a gap of only Rs. 5·03 lakhs. This shows an improvement on the figures as presented in the budget of 1938-39 of Rs. half a lakh.

In the budget estimate of 1939-40 the real net income is Rs. 14·67 lakhs plus Rs. 11·23 lakhs (transferred as depreciation charges) making an aggregate of Rs. 25·90 lakhs with an interest liability of Rs. 27·77 lakhs, leaving a gap of only Rs. 1·87 lakhs. The hope entertained by me when the budget

for the year was presented that the time is not distant even with a slower rate of progress when the Hydro-Electric Schemes would cease to be even an indirect burden on the finances of the province is all but realized. If economy in husbanding our resources receives watchful attention and all due care is exercised in regard to future extensions, there can be no doubt that the date when the scheme may enter upon the stage of genuine profit is not far.

### IRRIGATION PROJECTS.

In July, 1937, when presenting this Government's first Budget I said " The Haveli Project has now emerged as a finally sanctioned enterprise and this year the stage of actual 'construction' is to be entered upon............". The total cost of the project was then estimated at Rs. 5,36 lakhs and it was then anticipated that construction would be completed in four years. The project was sanctioned by the Government only in April, 1937, that is, after the present Government came into office, and earthwork in the Weir area actually started in September, 1937, and the foundation stone was laid by Sir Herbert Emerson as recently as the 10th of February, 1938. By the end of next month, that is in about four weeks' time from now, all works in connection with the Barrage, the main line including lining, the remodelling of the Sidhnai Weir, the remodelling and linking of the Sidhnai and Chenab Inundation Canals, the Rangpur Canal on the right bank including the distributaries will be completed as also the Montgomery-Pakpattan link. The opening ceremony of the Barrage and the canals is to take place on the 2nd of April, 1939. No commentary is needed on the expeditiousness with which our Engineers have completed this large project which had been previously under consideration for years. Every credit is due to Mr. J. D. H. Bedford, the Chief Engineer in charge and his many enthusiastic associates, who have established an uncontestable claim to the gratitude of the province. Instead of the four years which I was able to mention in July, 1937, when not a sod had been broken and no work was actually in hand, in less than a year and eight months from the starting of the earthwork and a little over a year from the laying of the foundation stone, water will actually be running down these canals. This is a notable enough achievement, for it brings the blessings of water more than two years earlier than originally contemplated to an arid and thirsty part of our province. But another fact is even more striking and fills the heart of the Finance Minister with rejoicing. On the original estimates of Rs. 5,36 lakhs reached after the minutest examination and as a result of the study by our whole engineering faculty, a saving in money of Rs. one crore and eighty-six lakhs has been effected and this after spending no less a sum than Rs. thirty lakhs on the lining of the canals not included in the original project. In other words, a

project of the utmost importance and of the highest benefit to the State has been completed in less than half the time originally contemplated and with a remarkably large saving in expenditure. This is a record, I am sure, unparalleled in the annals of irrigation not only in this province but anywhere in the country—I think I might almost say anywhere in the world. It is not for me to say what share of credit for this achievement might be claimed by your Government—you would be able to judge better, but it is a matter of the highest gratification to this Government that it should have been given to them to assist in the accomplishment of such a big enterprise thus expeditiously and so economically. This one proof of the solicitude of the present Ministry for the welfare of this province in the study of those needs which would bring permanent and enduring solution of some of our economic difficulties cannot fail to leave an indelible impress on the history of modern Punjab. I wish to enter upon no details as regards this project, if an achieved fact need be called a project any further. Every Punjabee interested in our advance is familiar with the magnitude of good that it is going to bring to us.

THE THAL AND THE BHAKRA.

I would refer now to the two other projects — the Thal and the Bhakra. It is the keenest desire and the most cherished ambition of the present Ministry that in the remainder of the term of the present Assembly definite and substantial steps may be taken in proceeding with these projects.

In July, 1937, referring to the Thal Project I said that it was still at the stage of examination, with a view to seeing if it was likely to prove remunerative and the Government was carrying on the examination with the utmost of expeditiousness consistently with its magnitude and complicated character. To-day I am able to intimate that we have moved far beyond that position. The stage of examination might well be said to be over. The execution of the project is to be taken in hand and the construction is going to begin at a very near date. It was thought at one time that this might begin as early as next May but technical considerations have stood in our way, but even so the competing dates are no further than October this year or April, 1940. In the meantime as an earnest of our determination to see that the project is not delayed even by a day a Survey Party has already been employed to carry out detailed enquiry as to the final location of the various parts of the canal and the survey is expected to save several months in the actual starting of construction work. The estimates of the cost of the project vary as they depend in part on a consideration of the proposals for lining of the main canal and of some of the branches. But these are matters which will not be allowed to cause any delay. When this project is executed, it will bring the blessings of water to some of the most arid parts of the pro-

offer an effective solution of the many problems caused by what might be called the normal scarcity of rainfall in these districts.

THE BHAKRA DAM.

On the occasion of the last budget in February, 1938, no definite reference could be made even to the Thal Project, the position had not advanced much beyond what I had stated it to be in July, 1937. Now I am happy to be able to speak in definitely hopeful terms even of the Bhakra Dam Scheme. The plans to-day bid fair to emerge into a stage when construction may be said to be well in sight. The Project, it will be recollected, was originally prepared in 1919, and the estimated cost was Rs. 14½ crores. In 1926, the estimate was revised in the light of the rates that obtained during the execution of the Sutlej Valley Project, and it went up to Rs. 23 crores. Later, suggestions were made to raise the height of the Dam from 400 to 500 feet. Now for reasons of practical policy, the scheme for the higher Dam has been abandoned, and the whole scheme has been so revised that agreement with regard to its actual adoption by all the various parties concerned may be shortly completed. The scheme has been fully examined by geological experts and engineering authorities and is free from all technical objections. Among other things it has been found on a thorough examination of data available over a long period that the construction of the Dam will not affect adversely the Inundation Canals in Sind. Thereby the objections to the scheme by a neighbouring province have disappeared. Negotiations are now on foot with one of the Hill States into the details of which I cannot enter, but I hope they would result in a manner satisfactory to both parties. As soon as this happens, it is the earnest desire and the firm determination of this Government to take all necessary steps immediately to proceed to the work of construction. In fact in order that no time may be lost a Survey Party has already been deputed to conduct preliminary surveys, and experienced engineers are being sent to America in a few weeks to familiarize themselves with problems of engineering involved in the designing and construction of dams.

In the final form as now contemplated the Project is estimated to cost Rs. 12 crores ; incidentally I might remark that the reduction in the revised estimates makes the Project financially more feasible.

The scheme is to provide irrigation for areas where no irrigation exists at present and where the lack of irrigation has been strikingly brought home to us during the past twelve months. When the Bhakra scheme materializes, famine shall have lost its worst terrors in the districts of Hissar and Rohtak, and the settled populations of those districts will be able to proceed with the even tenor of their lives undisturbed by the fear of sudden seasonal privations.

than two years. The position with regard to Thal and Bhakra is as I have briefly described it. With these three achieved, it would be literally correct to say that every available ounce of water in our rivers shall have been utilized; the Punjab will for the first time bear truly and fully the title of the land of five rivers. The theme can be interpreted only in the impassioned utterance of a poet, it lies beyond the powers of a Finance Minister in the course of a budget speech to depict. It is said that the new Jerusalem cannot be built overnight in the wilderness. In many of the vast desert tracts of the province the saying is about to be falsified. While the dust of discontent is being raised by the thoughtless in many quarters, the good work proceeds apace bringing hope and contentment and rejoicing to myriads of Punjabee families. These schemes will bring untold relief to east and west and even the favoured centre. What a record of actual achievement, and of further blessings about to arrive. Is it too much to affirm that these constitute this Government's unchallengeable title to be regarded the most loyal and efficient servants of the province that history has known, I was going to say that history shall ever record? Certain it is, that no finer proof of the high possibilities of Provincial Autonomy can be adduced, and if the goal of freedom is gained or won for India, the record of your present Government in this great and beloved province of ours shall mark the most effective milestones in the march of advance. And this first Assembly shall have its full share of the honours, for in our shining endeavour to build and to serve, we all stand shoulder to shoulder.

I should say here that with the completion of these projects, the future irrigation schemes will have to depend entirely on storage arrangements and on tube wells. That apart from Bhakra which probably is the best storage site on our rivers, other suitable sites exist on the various rivers and their tributaries — they are within Government's view, and these sources of water supply would be developed as occasions arise or circumstances favour. Tube-well schemes in more than one district are already in operation, and with time may be largely extended.

POPULATION AND STANDARD OF LIVING.

Sir John Megaw speaking recently in London on the pressure of population in India drew attention to the alarming fact that over half the Indian people, at least, in the rural areas, fall below a minimal standard of nutrition even on the frugal scale of a warm Oriental country, and he stressed the need of improvement in economic output in default of which the increasing pressure of population is likely still further to depress the average standard of life. It is well known that the standard of nutrition is higher in the Punjab than elsewhere—the best evidence is in the physique of the Punjabee and his mode of life. But persistent endeavour is being made here

Department that is responsible for so much remarkable achievement in this direction in recent years continues to add to the wealth of the province in introducing improved seeds and by breaking fresh ground in resisting plant disease and showing the way to newer and more effective methods of cultivation. Our industries also are showing marked signs of progress—Government is keen to help, and enterprise among the people is rapidly developing. These are encouraging features of our economic life, particularly as problems of industrial labour have not assumed here the disquieting aspect that they bear in other parts of the country. In the comparative quiet of our freedom from disturbing movements we yet have a chance to attend to vital economic questions. Is it too much to hope that with our attachment to the realistic and our appreciation of the practical we may continue to build up true strength ?—for political advance and true freedom must wait on such strength and to think otherwise is to build upon sand and indulge in vain imaginings.

Our fiscal system, because of the inevitable force of circumstances, provides for little elasticity. It is necessary therefore to preserve our resources unimpaired and not part with revenues while greater strength has not been firmly secured and at any rate not till our proposed big irrigation projects are completed. The Thal and the Bhakra are estimated to cost anywhere between Rs. 20 and 24 crores—the heavy interest charge during the period of construction and for several years after has to be borne by our ordinary finances. As I read our finances in their broad and essential lineaments, I hear the call of Thal and of Bhakra, the extension of hydro-electric power, and of tube-well irrigation. May I as one who reflects anxiously and every day on our provincial finance warn the House that this imperious call is the voice of wisdom, let none of us be deflected for one instant from the clear path of prudence by empty and false promptings howsoever alluring. Let us build surely and gain strength and security before we listen lightly to the voice of any temptress—for then alone shall we be able with certainty to pursue the many ideals which lie close to our heart. We want to win success and eschew failure ; to this end let us strive unremittingly with our whole energy and courage.

My last words must be an expression of appreciation of the work of the officers and the staff of the Finance Department. It is to their trained application and zealous devotion to duty that we owe the accurate picture of our finances presented to-day. Their work is onerous and of the highest responsibility, though it is unpretentious and lies beyond the ken of honourable members. Were it not due to their daily minute attention to detail, the danger of falling into error that might prove at once embarrassing and expensive could not be averted. During the year the destinies of the department have remained in the capable and thorough hands of Mr. H. D. Bhanot, and his well-known qualities of hard and unsparing work and close application to minutiæ have been of great value in the discharge of the duties of his office. In a year when scarcity and famine conditions have prevailed over a large part of the

complexity with their inevitable repercussions on finances, it has been a great advantage to us that our finances were immediately watched over by one who had recent and expert knowledge of our revenue problems. I have been able throughout to rely unhesitatingly on his judgment and advice, and I look forward with his help to enforce those traditions of respect for sound exchequer control that are essential for the proper functioning of all governments.

I must refer to two other officers by name. Their work is unobtrusive; honourable members are probably not familiar even with their faces, as they are seldom in evidence, and are completely immersed in the dry and uninspiring details of financial precedent trying laboriously to discover some helpful principle in this confusing labyrinth. Our Deputy Secretary, Mr. H. J. Pearson, is an expert in our Public Works Finance, and he owes our special gratitude for the quickness with which he prepared cases in connexion with the Haveli Project. Rai Sahib Lala Lal Chand, the Assistant Secretary, had his services recognised by the grant of a title during the year. His abundant knowledge of procedure, his general familiarity with past tradition, his unbounded desire to help continue to be of great advantage to the department.

My appreciation of the excellent work of our Superintendents and Assistants continues unabated. I have come to know several of them personally, I have established direct relations with them in connexion with the larger questions in their particular charge—though I am afraid that thereby I might be offending against the narrow susceptibilities of the Secretariat. They have given us of their best, and as I said last year no small part of the successful functioning of the department is due to their zealous co-operation, sense of duty and efficient work.

Before I resume my seat, I must record the Government's tribute to the help received from the two Accountant-Generals who have presided during the year over our accounts. Mr. J. G. Bhandari retired soon after the year's budget was presented after a distinguished career in the service of the Crown in India. His counsel and guidance, I was going to say continual admonition, was of great value to us in the initial stage of the introduction of provincial autonomy. His successor, Mr. Brij Lal Nehru, now exercises a vigilant watch over our accounts and practises the rôle of an unbending critic. On our part we do not surrender our position readily, and I trust the examination that emerges from the controversy is of benefit to the Province. I am anxious once again to say that the advice and authoritative counsel of Sir Ernest Burdon, the Auditor-General for India, has throughout been of the utmost advantage to Government. Our thanks are also due to Mr. A. C. Badenoch, who acted during a part of the year as Auditor-General in Sir Ernest Burdon's place. He was particularly helpful in a conference on the accounts of the Haveli Project.

Sir, I beg to present to the Assembly the Budget for the year 1939-40.

## A.—Revenue Receipts of the Punjab Government.

(In thousands of rupees.)

| | Budget, 1939-40. |
|---|---|
| **REVENUE RECEIPTS.** | |
| **Principal Heads of Revenue.** | |
| IV—Taxes on Income other than Corporation Tax .. .. | 13,50 |
| VII—Land Revenue (Gross) .. .. .. .. | 4,62,87 |
| *Deduct*—Portion of Land Revenue due to Irrigation .. .. | —1,86,29 |
| Net Land Revenue .. | 2,76,58 |

## DEBT OF THE PUNJAB GOVERNMENT

| When raised. | Amount.* | Rate of interest per cent. | Object. | | Arrangements for repayment. |
|---|---|---|---|---|---|
| **A.—Loans raised in the market.** | | | | | |
| | Rs. | | | | |
| 1933 .. | 3,12,47,200 | 4·00 | Conversion Loan . | In 1948 | Arrangements have been made, with the sanction of the Government of India, whereby the amounts which the Punjab Government is setting apart annually for the amortization of the loan within 50 years from the date of issue of the loan, is being utilized for the purchase of its own Bonds in the market. |
| 1937 .. | 1,04,14,400 | 3·00 | Conversion Loan .. | In 1952 | The Punjab Government sets aside annually a sum equal to 1½ per cent of the amount of the loans which forms a fund to be used for the purchase and cancellation of these Bonds at any time except in the case of 1952 bonds which can be purchased only when their market value falls below the issue price. |
| 1938 .. | 1,00,11,700 | 3·00 | Irrigation Haveli Project | In 1958 | (as above) |
| **B.—Loans from the Central Government.** | | | | | |
| Preautonomy (Consolidated Debt). | 16,59,63,034 | 4·00 | | | The amount is to be repaid in 45 years in semi-annual equated instalments. |
| Preautonomy (excluded from consolidation). | 10,00,00,000 | 3·5 | Irrigation Capital Expenditure. | | The amount is repayable at the option of the Punjab Government with the concurrence of the Government of India. |

* Balance on 1st April, 1939.

NOTE.—The original amount of Loans from the public was—

| | Rs. |
|---|---|
| Punjab Bonds, 1948 .. .. .. .. | 3,28,61,100 |
| Punjab Bonds, 1952 .. .. .. .. | 1,04,14,400 |
| Punjab Bonds, 1958 .. .. .. .. | 1,00,11,700 |

| 1938-39—Budget Estimate | 11,41 | 11,36 | +5 | 31 | 13 | 18 | 11,72 | 11,49 | +23 | 0·6 |
| 1938-39—Revised Estimate | 11,43 | 11,70 | —27 | 21 | .. | .. | 11,64 | 11,70 | —6 | 1,22 |
| 1939-40—Budget Estimate | 11,67 | 11,96 | —29 | 35 | .. | .. | 12,02 | 11,96 | +6 | —71 |

The variations between the revised estimate of 1937-38 and accounts of the same year and between budget 1938-39 and the revised estimate of that year and details of Budget 1939-40 will be explained in the appropriate sections of this memorandum. What meets the eye immediately is :—

(*a*) 1937-38 was a good year in that, in spite of creating the Special Development Fund with 55 lakhs, the revenue account showed a surplus of 32 lakhs and the closing balance rose from 1,95 to 2,79 lakhs.

(*b*) The year 1938-39 presents a different picture. It opened well and the prospects at the time of framing the budget were good, but famine in the south-eastern districts has converted the anticipated surplus of 5 lakhs in the revenue accounts into a deficit of 27 lakhs. The closing balance, however, is expected to be 1,22 lakhs compared with the budget figure of 0·6 lakhs. This is due to a better opening balance and the loan of one crore raised during the year, but it is obvious that even without the loan the provincial resources were sufficient to finance the entire expenditure on famine (27 lakhs), on capital works (2,36 lakhs) and loans and advances (75 lakhs). The loan was raised for the Haveli Project and was taken in August, 1938, in order to meet temporary gaps between receipts and disbursements at certain periods of the year and to maintain an adequate balance to meet the requirements of the lean months of April, May and June, for which a balance of 22 lakhs would be absolutely inadequate.

(*c*) Revenue expenditure in 1938-39 has increased by 34 lakhs, but considering that 11 lakhs was sanctioned in the first instalment of supplementary estimates in June, and 29 lakhs in the second instalment in November, the increase is not as much as it should have been.

*It has been assumed in writing this memorandum that the reader will constantly refer to the *pro forma* a ccount on the opposite page and to the General Abstract of Receipts and Disbursement at pages 12 to 23 of the Budget Volume for 1939-40.

When the first instalment of supplementary estimates was voted it was not known that expenditure on famine would exceed the budget allotment. Intimation had also been received that the share of the province from income-tax was likely to be 10 lakhs in 1938-39. Out of 11 lakhs chargeable to revenue, in this instalment of supplementary estimates, 4½ lakhs was for schemes to be financed from the grants expected (since received) from the Central Government, such as rural reconstruction and industrial schemes. The burden on the provincial revenues was to be 6½ lakhs. The anticipated surplus of 5 lakhs and the expected share of income-tax (according to the latest information 12 lakhs) fully covered the additional expenditure.

By the time the second instalment was presented to the Legislative Assembly it was suspected that expenditure on famine was likely to be fairly heavy. Out of 29 lakhs chargeable to revenue, voted in this instalment, 19 lakhs was for famine (18 lakhs under "54—Famine" and 1 lakh under "41—Veterinary"). The remaining 10 lakhs was for absolutely essential purposes such as—

| | *Lakhs.* |
|---|---|
| Grant to the Lahore Municipality for its drainage scheme .. .. .. .. | 3·00 |
| Guarantee to the North-Western Railway for the Kangra Valley and Shahdara-Narowal Railways .. | 4·00 |
| Grant to the Lahore Improvement Trust .. | 0·25 |
| Travelling and daily allowances to the members of the Legislative Assembly .. .. .. | 0·75 |
| Extension of the period of the second Commission for the trial of election petitions .. .. | 0·47 |
| Opening of a workshop at the Hosiery Institute, Ludhiana .. .. .. .. | 0·40 |
| Establishment for the Hydro-Electric Construction Divisions .. .. .. .. | 0·27 |
| Total .. | 9·14 |

Almost the entire expenditure voted in both the instalments is non-recurring.

(*d*) Expenditure on famine will continue in 1939-40 and provision has been made in the Budget for the first five months, *i.e.*, April to July. The deficit of 29 lakhs in the revenue account and a minus balance of 71 lakhs is, therefore, not surprising; but in considering this minus balance it may be remembered that the year provides for 39 lakhs direct expenditure on famine, 1,68 lakhs capital expenditure and 68 lakhs on account of loans and advances—mainly advances to cultivators.

(*e*) If extraordinary receipts are taken into consideration, the deficit of 27 lakhs in 1938-39 is reduced to 6 lakhs ; and of 29 lakhs in 1939-40 is converted into a surplus of 6 lakhs.

Extraordinary receipts figure in the revenue account, but a principle has been established, with the concurrence of the legislature, that they should be devoted to the avoidance of debt by using them to meet capital expenditure and loans and advances by Government. They are essentially of capital nature being the result of realizing one of the assets of the province, *viz.*, its land. If they are used in any emergency to come to the rescue of an adverse revenue account, this does not violate the principles of sound finance, for it is in effect a borrowing from our own capital to meet ordinary revenue expenses instead of borrowing from an outside source. This is what has been done in 1938-39 and 1939-40, as will be seen from columns 6 to 10 of the table above, by debiting no capital expenditure to extraordinary receipts.

(*f*) Revenue receipts in the revised estimate of 1938-39 and budget estimate of 1939-40 are not so high as in 1937-38, but they are higher than the budget estimate of 1938-39 although famine should have caused a decrease. Transfers from the deposit section of accounts in respect of certain grants received from the Government of India and in respect of certain funds created by the provincial Government have been as follows :—

(IN THOUSANDS OF RUPEES.)

| Fund. | Accounts, 1937-38. | Budget, 1938-39. | Revised, 1938-39. | Budget, 1939-40. |
|---|---|---|---|---|
| Road Development Fund .. .. | 12,43 | 29,80 | 20,73 | 25,22 |
| Other grants from the Government of India for (*a*) Rural Reconstruction schemes, (*b*) Handloom industry fund, (*c*) Veterinary and Agricultural Research Fund, (*d*) Sugar Excise Fund .. .. .. | 5,82 | 4,33 | 8,37 | 5,43 |
| Famine Relief Fund .. .. | 10,42 | 1,44 | 10,52 | .. |
| Special Development Fund .. | .. | 6,00 | 3,94 | 14,17 |
| Industrial Research Fund .. | .. | .. | .. | 20 |
| Total .. | 28,67 | 41,57 | 43,56 | 45,02 |

The accounting procedure for these funds and grants is that they are first credited to the deposit section. The amount required in any one year is transferred to the revenue account both on the receipts and expenditure side of the department concerned. Transfer from these funds is therefore not a real increase in receipts.

Excluding these transfers the revenue receipts would have been—

| | | | | *Lakhs.* |
|---|---|---|---|---|
| Accounts, 1937-38 | .. | .. | .. | 11,39 |
| Budget, 1938-39 | .. | .. | .. | 11,00 |
| Revised, 1938-39 | .. | .. | .. | 11,00 |
| Budget, 1939-40 | .. | .. | .. | 11,22 |

According to these figures the budget and revised estimates of the current year are the same although it will be seen subsequently (paragraph 6) that famine has caused a decrease of 28 lakhs in land revenue and Irrigation receipts. This has fortunately been counterbalanced by receipt of 12 lakhs from the Government of India as our share of income-tax and an increase of 16 lakhs in receipts under other heads.

Similarly excluding transfers from the deposit section the Budget estimate of 1939-40 shows an increase of 22 lakhs compared with the revised estimate of 1938-39. It is anticipated that the effect of famine on the land revenue and Irrigation receipts in 1939-40 will be 12 lakhs less than the estimated loss during the current year (paragraph 6, *i.e.*, 16 lakhs instead of 28 lakhs). The balance of 10 lakhs includes 6 lakhs anticipated receipts from a new tax on motor spirit and lubricants and 1½ lakhs increased share of income-tax expected next year. The remaining small increase is the net result of increases and decreases under other heads.

2. Referring now to column 5 of the *pro forma* account opposite the first page of this memorandum it will be observed that the minus balance in the revenue account was 1,47 lakhs in 1932-33. By careful finance, in spite of the prevailing economic depression, it was brought down to 10 lakhs at the end of 1937-38. It is unfortunate that just when the minus balance was about to be wiped off entirely, heavy emergent and unforeseen expenditure had to be incurred raising the minus balance to 37 lakhs in the revised estimate of 1938-39 and 66 lakhs in the Budget estimate of 1939-40. It is still less

than what it was at the end of 1935-36. The autonomous Government inherited a minus balance of 42 lakhs on the 1st April, 1937, and is likely to add only 24 lakhs to it at the end of three years' working, in spite of having had to meet in two years an expenditure of the magnitude which has no parallel since the introduction of the Reforms.

**Effect of Famine.**

3. The current year illustrates very clearly the extent to which the Budget of an agricultural province depends on seasonal conditions. In spite of a net work of irrigation channels in the province a failure of the rains can still wreck the budget prospects. Owing to the failure of winter rains in 1937-38 fodder scarcity began to be felt in the Hissar and Gurgaon districts early in 1938 and concessions in the railway freight of fodder imported into these districts were sanctioned early in February, 1938. By August and September, 1938, owing to the failure of the monsoon, similar concessions had to be sanctioned for the Rohtak and Karnal districts. Conditions in Hissar were distinctly worse and scarcity of fodder was so severe that special arrangements for the import of fodder had to be made by the appointment of a Fodder Adviser to Government early in September. Test works were also opened for the relief of the famine-stricken populace. The attendance on test works in the Hissar district became so large that on the 1st December, 1938, it was declared a famine area. Gurgaon, Rohtak and Karnal are still scarcity areas.

4. Expenditure on Famine is therefore very heavy during the current year and, with the complete failure of winter rains once more, is likely to continue during at least the first five months of the next financial year and will cease only if the monsoon is good. It is hoped, however, that the recent rainfall would, to some extent, make the situation easier. Provision for expenditure on Famine Relief under the head "54—Famine" in the two years is—

| | | *Lakhs.* |
|---|---|---|
| Revised, 1938-39 | .. .. .. | 25·44 |
| Budget, 1939-40 | .. .. .. | 39·35 out of which 2 lakhs is for the recoupment of Famine Relief Fund. |

The details of this expenditure are shown in the tables below—

1938-39.

| Item of Expenditure. | Hissar. | Rohtak. | Gurgaon. | Karnal. | Total. |
|---|---|---|---|---|---|
| | Rs. | Rs. | Rs. | Rs. | Rs. |
| Fodder Adviser and his establishment .. .. | .. | .. | .. | .. | 48,000 |
| Test and Relief Works .. | 10,70,000 | 1,00,000 | 30,000 | 20,000 | 12,20,000 |
| Spinning Centres .. .. | 1,90,000 | 40,000 | 2,000 | .. | 2,32,000 |
| Gratuitous Relief .. .. | 2,35,000 | .. | .. | .. | 2,35,000 |
| Maintenance of stud bulls .. | 20,000 | 20,000 | .. | .. | 40,000 |
| Concentration camps for cattle.. | 3,27,900 | .. | .. | .. | 3,27,900 |
| Concentration camp for cattle at the Hissar Cattle Farm .. | 68,000 | .. | .. | .. | 68,000 |
| Miscellaneous .. .. | 1,000 | .. | .. | .. | 1,000 |
| Freight concessions on Fodder .. | .. | .. | .. | .. | 3,53,500 |
| Provision for other districts .. | .. | .. | .. | .. | 18,200 |
| Total .. | 19,11,900 | 1,60,000 | 32,000 | 20,000 | 25,43,600 |

1939-40.

| Item of Expenditure. | Hissar. | Rohtak. | Gurgaon. | Karnal. | Total. |
|---|---|---|---|---|---|
| | Rs. | Rs. | Rs. | Rs. | Rs. |
| Fodder Adviser and his establishment .. | .. | .. | .. | .. | 1,00,000 |
| Test and Relief Works .. | 17,50,000 | 1,50,000 | 1,00,000 | .. | 20,00,000 |
| Spinning Centres .. .. | 2,10,000 | 40,000 | 4,000 | .. | 2,54,000 |
| Gratuitous Relief .. | 5,00,000 | .. | .. | .. | 5,00,000 |
| Maintenance of stud bulls .. | 20,000 | 20,000 | .. | .. | 40,000 |
| Concentration camps for cattle .. | 2,50,000 | .. | .. | .. | 2,50,000 |
| Concentration camp for cattle at the Hissar Cattle Farm .. | 47,000 | .. | .. | .. | 47,000 |
| Miscellaneous .. .. | .. | .. | .. | .. | .. |
| Freight concessions on fodder .. | .. | .. | .. | .. | 5,00,000 |
| Provision for other districts .. | .. | .. | .. | .. | 43,500 |
| Total .. | 27,77,000 | 2,10,000 | 1,04,000 | .. | 37,34,500 |

Besides this the Veterinary Budget includes 1·75 lakhs in 1938-39 and 1·50 lakhs in 1939-40 for the purchase of fodder for the Hissar Cattle Farm and this is entirely due to Famine. The expenditure on Famine chargeable to revenue is therefore :—

| | | *Lakhs.* |
|---|---|---|
| Revised, 1938-39 | .. .. .. | 27·19 |
| Budget, 1939-40 | .. .. .. | 38·85 |

It will be observed that the heaviest expenditure is on Test and Relief works. Wages on these works are paid on the principle that the wage scale should be the lowest amount sufficient to maintain healthy persons in health. This is calculated in the terms of *chhitaks* of grain per head and wages are paid in cash which will buy the specified quantity of grain at the current market rate. Wages calculated on this principle are shown in columns 3 and 4 of the statement below. The Punjab Government considered this an inadequate wage rate and raised it to that shown in column 5 with effect from the 19th October, 1938 :—

| Class of labour. | Wages in *chhitaks*. | Price in August, 1938, with wheat and *bajra* at 14 seers per rupee. | Prices now with wheat and *bajra* at 12½ seers per rupee. | Wages as are being paid. |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| | | Rs. A. P. | Rs. A. P. | Rs. A. P. |
| Special mates and special gangs .. | | One pice more than Class I. | | 0 2 3 |
| Class I.—Diggers .. .. | 18 | 0 1 4 | 0 1 5 | 0 2 0 |
| Class II.—Carriers .. .. | 14 | 0 1 0 | 0 1 3 | 0 1 6 |
| Class III.—Working children .. | 10 | 0 0 9 | 0 0 9 | 0 1 0 |
| Class IV.—Adult dependents and Rest Day wage. | 12 | 0 1 0 | 0 1 0 | 0 1 0 |
| Class V.—Non-working children— | | | | |
| (a) over 10 but under 14 years .. | 8 | 0 0 7 | 0 0 9 | 0 0 9 |
| (b) over 7 but under 10 years .. | 6 | 0 0 6 | 0 0 6 | 0 0 6 |
| (c) under 7, but not in arms .. | 4 | 0 0 3 | 0 0 3 | 0 0 3 |
| (d) in arms .. .. | 3 or one pice extra to mother. | 0 0 3 | 0 0 3 | 0 0 3 |

The average number of workers on these works during the week ending the 4th February, 1939, was 102,676, and the number of dependents was 42,963, making a total of 145,639 per day.

5. The financial loss to the province on account of Famine is not confined to the amount spent on Famine Relief. There has been a considerable loss of revenue and water rates.

The land revenue suspensions and remissions in the four districts of Hissar, Gurgaon, Rohtak and Karnal amount to Rs. 32·27 lakhs in 1938-39. The average of the last four years shows that 14 lakhs of land revenue was suspended or remitted in these districts. Thus, the suspension or remission of 18 lakhs is entirely due to Famine. The remission of water rates in these districts amounts to 11 lakhs. The average remissions amount to only 0·66 lakhs per annum. Famine here is responsible for 10 lakhs.

It is difficult to estimate the loss in land revenue and irrigation receipts due to Famine in 1939-40; but assuming that Kharif will not be effected, land revenue suspensions and remissions are likely to be 16 lakhs. Assuming further that 5 lakhs is normal suspension and remission in Rabi the loss due to Famine is likely to be 11 lakhs. Remission of Abiana is likely to be 5 lakhs after excluding the normal remission.

6. On the above basis it is now possible to work out the net effect of Famine on the revenue account.

*1938-39.*

| | | | Lakhs. |
|---|---|---|---|
| Expenditure on Famine Relief | .. | .. | 27 |
| Loss of Land Revenue receipts | .. | .. | 18 |
| Loss of Irrigation receipts | .. | .. | 10 |
| | Total | .. | 55 |

This is met to the extent of 10½ lakhs by transfer from the Famine Relief Fund leaving the net effect at 44½ lakhs. The anticipated deficit of the year is 27 lakhs. In other words, without the Famine there should have been a surplus of 17½ lakhs in the revenue account.

*1939-40.*

| | | | Lakhs. |
|---|---|---|---|
| Expenditure on Famine Relief | .. | .. | 39 |
| Loss of Land Revenue receipts.. | .. | .. | 11 |
| Loss of Irrigation receipts .. | .. | .. | 5 |
| | Total | .. | 55 |

There will be no transfer from the Famine Relief Fund because the balance in the Fund has been fully utilized. The anticipated deficit is 29 lakhs. Thus, without Famine there should have been a surplus of 26 lakhs which means that more new expenditure could have been sanctioned.

7. Another heavy item of expenditure during a famine is loans and advances to cultivators which are not charged to revenue. Provision for this purpose has been made as follows :—

| | (In lakhs of rupees.) | | |
|---|---|---|---|
| | Famine Districts. | Rest of the Province. | Total. |
| Revised, 1938-39 .. .. .. | 37 | 5 | 42 |
| Budget, 1939-40 .. .. .. | 38 | 4 | 42 |

**Famine Relief Fund.**

8. Under the old constitution, prior to the introduction of provincial autonomy, the provincial Government was required to maintain a Famine Relief Fund in accordance with the provisions contained in Schedule IV to the Devolution Rules. It was incumbent upon Government to provide every year in their budget Rs. 2 lakhs for famine

relief so long as the balance in the Fund was less than 20 lakhs ; and any portion of the assignment which was not so spent was transferred to the Famine Relief Fund. The fund was thus built up gradually and the accumulated balance on the 31st March, 1937, was Rs. 20,41,889. Under the new constitution this amount came to the provincial exchequer and it was for the provincial Government to decide whether to continue a famine relief fund, and at what sum. The average expenditure on famine relief during 17 years from 1921-22 to 1937-38 had been 1·64 lakhs per annum, the highest being 8·35 lakhs in 1930-31. It was, therefore, quite legitimately decided to set up a new fund with 10 lakhs as an opening balance. It was also decided that the expenditure on famine relief in any year would be met in the first instance from the Famine Relief Fund, but would be repaid from the revenue account in the following year subject to the proviso that in any one year the repayment would not exceed 2 lakhs, arrears being worked off at the rate of 2 lakhs a year until the fund was again complete at the figure of 10 lakhs. Relying on the figures of past expenditure quoted above it was decided to invest Rs. 9,08,660 in long term securities yielding an interest of Rs. 32,460 a year as explained in paragraph 7 of the memorandum on the current year's budget. This sum of Rs. 9,08,660 is made up as follows :—

| | Rs. |
|---|---|
| Actual cost of securities .. .. | 9,04,915 |
| Advance interest .. .. .. | 3,093 |
| Brokerage .. .. .. .. | 652 |
| Total .. | 9,08,660 |

In 1938-39 a withdrawal of Rs. 1,44,000 was provided for transfer to the revenue account to meet expenditure on famine relief. Owing to severe famine in the south-eastern districts the entire fund has been utilized. The securities had to be cashed and the transfer to the revenue account during the current year is 10·52 lakhs as follows :—

| | *Lakhs.* |
|---|---|
| Opening balance on 1st April, 1938 .. .. | 1·12 |
| Interest on securities .. .. .. .. | 0·33 |
| Encashment of securities .. .. .. | 9·07 |
| Total .. | 10·52 |

In the budget estimate of 1939-40 provision has been made for 2 lakhs to recoup the fund and this recoupment will continue till the fund again reaches the figure of 10 lakhs, unless it is decided to increase the fund.

**Retrenchment and New Taxation.**

9. The magnitude of expenditure on famine began to appear in the second half of November, 1938, and became certain by the beginning of December when the Hissar district had to be declared a famine area. Time available then was not sufficient to effect much economy in the expenditure of the current year chargeable to revenue, but whatever was possible was done by reducing Irrigation working expenses, including maintenance and repairs, to the extent of 7·75 lakhs. Expenditure on civil works has been reduced by 5·65 lakhs by postponing certain works, slowing down expenditure on others and by effecting a saving in repairs. Hydro-electric working expenses have been reduced by 0·38 lakh. All this has resulted in a saving of 13·78 lakhs in revenue expenditure of the current year.

It has been possible to effect more economy in 1939-40, *viz.* :—

| | *Lakhs.* |
|---|---|
| Reduction in leave salary, travelling allowance and contingencies .. .. .. .. | 12·30 |
| Lump sum cuts in certain departments .. .. | 3·12 |
| Reduction in Irrigation maintenance and repairs .. | 4·50 |
| Postponement of civil works and saving in repairs .. | 11·13 |
| Total .. | 31·05 |

This pruning of expenditure may prove somewhat drastic in some cases but it is obvious that economy in every direction will have to be effected throughout the year in order to reduce the deficit as much as possible.

The only tax proposed to be levied in the next year is a tax on the retail sales of motor spirit at the rate of Re. 0-1-3 per gallon and Re. 0-2-6 per gallon on lubricants used for motor vehicles. This tax will fall on a class of community which can well afford to bear it and is expected to yield gross receipts of 6½ lakhs and net receipts of 6 lakhs, after allowing for charges of collection.

During the current year excise duty on spirit contents of toilet preparations and perfumery and on medicinal preparations, which might be used for other than medicinal purposes, was raised from Rs. 5 to Rs. 17-8-0 per L. P. gallon. With effect from the 1st April, 1939, it has been decided to increase the rate of duty or fee on certain liquors and intoxicating drugs as follows :—

(*a*) Still head duty on ordinary spiced and special spiced spirit from Rs. 6-14-0 to Rs. 7-8-0 and Rs. 8-2-0, respectively, per L. P. gallon ;

(*b*) Issue price of excise opium from Rs. 70 to Rs. 80 per seer ;

(*c*) Transport fee on charas at Rs. 20 per seer ; and

(*d*) Fee on denatured spirit from Re. 0-12-0 to Re. 1 per imperial gallon.

**Land Revenue and Irrigation Receipts. Suspensions and Remissions.**

10. The revised estimate of land revenue (gross) receipts in 1938-39 is 4,60 lakhs and this has been arrived at after allowing for suspensions and remissions amounting to 1,23 lakhs as follows :—

(IN THOUSANDS OF RUPEES.)

| Nature of relief and cause. | Rabi. | Kharif. | Total. |
|---|---|---|---|
| 1. *Suspensions*— | | | |
| Famine Districts .. .. .. | 4,13 | 20,73 | 24,86 |
| Other Districts .. .. .. | 71 | 4,25 | 4,96 |
| Total Suspensions .. | 4,84 | 24,98 | 29,82 |
| 2. *Remissions*— | | | |
| (1) Out of the current demand— | | | |
| (*a*) Under the Ordinary Rules— | | | |
| (*i*) Hailstorms | 5 | 3 | 8 |
| (*ii*) Other causes .. .. | 47 | 6 | 53 |
| (*b*) Special Remissions— | | | |
| (*i*) Fall in prices .. .. | 4,58 | 4,88 | 9,46 |
| (*ii*) Other causes .. .. | .. | .. | .. |
| (*c*) Under the sliding scale of assessment | 31,20 | 35,68 | 66,88 |
| (*d*) Remission of fluctuating land revenue under the Kharaba Rules .. | 5,93 | 2,01 | 7,94 |
| (2) Out of suspended demand— | | | |
| (*a*) Famine Districts .. .. | 5,61 | 1,80 | 7,41 |
| (*b*) Other Districts .. .. | 71 | 41 | 1,12 |
| Total Remissions .. | 48,55 | 44,87 | 93,42 |
| Total Suspensions and Remissions .. | 53,39 | 69,85 | 1,23,24 |

The budget estimate of land revenue receipts in 1939-40 is 4,63 lakhs and this allows for suspensions and remissions to the extent of 1,21 lakhs as follows :—

| | Rs. |
|---|---|
| Suspension and remission of fixed land revenue out of the current demand .. .. .. | 30,00,000 |
| Remissions on account of fall in prices .. .. | 9,50,000 |
| Remissions under the sliding scale of assessment .. | 66,88,000 |
| Remission of fluctuating land revenue under the kharaba rules .. .. .. | 8,00,000 |
| Remission of suspended land revenue .. .. | 6,30,000 |
| Total .. | 1,20,68,000 |

The revised estimate of Irrigation direct receipts in 1938-39 is 4,32 lakhs after allowing for 30 lakhs remissions as follows :—

| | Rs. |
|---|---|
| Famine area .. .. .. | 10,97,831 |
| Scarcity of water .. .. .. .. | 2,910 |
| Hailstorm and pests .. .. .. | 2,99,035 |
| Ordinary kharaba remissions .. .. .. | 16,00,000 |
| Total .. | 29,99,776 |

The budget estimate of these receipts in 1939-40 is 4,27 lakhs and allows for remissions amounting to 26·74 lakhs as follows :—

| | Rs. |
|---|---|
| Special remissions .. .. .. .. | 1,40,210 |
| On account of unsatisfactory supplies in Rabi .. | 8,75,000 |
| Ordinary kharaba remissions .. .. | 16,59,195 |
| Total .. | 26,74,405 |

**New Expenditure and Beneficent Departments.**

11. It may be questioned why in the face of such heavy additional expenditure and the need for economy, expenditure to the extent of 78 lakhs has been included in the volume of New Expenditure. The explanation is easy and it is that the whole of this expenditure is not entirely new. It includes :—

(*a*) Essential items, *viz.*, expenditure on the continuance of existing establishment or activities, which was sanctioned by the legislature for a specified period, and must be continued with the specific sanction of the legislature.

(*b*) Minor works, *viz.*, expenditure on new works costing less than Rs. 10,000 in each case which are essential and cannot be stopped or postponed without risking serious loss or set back.

(*c*) Communications financed from the Central Road Fund. The expenditure corresponds to the credit from the Fund on the receipt side. This does not permit of any economy because expenditure cannot exceed receipts from the fund, and less the expenditure, lower are the receipts.

(*d*) Special Development programme. The expenditure corresponds to the transfer from the Special Development Fund on the receipt side.

The figures are as follows :—

| | *Lakhs.* |
|---|---|
| Essential items .. .. .. | 16 |
| Minor works .. .. .. .. | 12 |
| Expenditure debitable to the Central Road Fund .. | 16 |
| Special Development Programme .. .. | 8 |
| Total .. | 52 |

This leaves purely new expenditure, chargeable to revenue, of 26 lakhs, but half a lakh is to be met from a donation for the proposed Radium Institute. Out of the balance 16 lakhs, or 63 per cent, has been allotted to beneficent departments. The remainder, which is comparatively a very small amount, has been allotted for a few essential items.

Paragraph 1 of the last memorandum showed that the Budget estimate of expenditure on beneficent activities in 1938-39 was 3,28 lakhs and that this was 41 lakhs more than in 1936-37. The revised estimate is 3,27 lakhs and the Budget Estimate of 1939-40 is 3,44 lakhs. Thus, beneficent departments are certainly not being starved, thanks to the Special Development Fund. Even excluding the expenditure from the Fund which is 3 lakhs in the current year and just over 11 lakhs in the next year the expenditure on beneficent departments remains :—

| | *Lakhs.* |
|---|---|
| Revised, 1938-39 .. .. .. .. | 3,24 |
| Budget, 1939-40 .. .. .. .. | 3,33 |

and this is higher than in any year since 1928-29. The highest expenditure recorded in the past was 3,23 lakhs in 1929-30.

**Special Development Fund.**

12. The special intensive beneficent activities to be financed from the Special Development Fund of 55 lakhs, created last year, will continue unabated according to the programme outlined in paragraph 17 of the memorandum on the current year's budget. Unfortunately owing to the adverse and unforeseen circumstances narrated above the fund cannot be augmented this year. The following table shows the expenditure from the fund during the current year and that proposed for the ensuing year :—

| Department. | 1938-39. Budget. | 1938-39. Revised. | 1938-39. Unspent balance. | 1939-40. Regrant out of unspent balance of 1938-39. | 1939-40. Continuation of work in the tahsils selected in 1938-39. | 1939-40. New expenditure. | 1939-40. Total. |
|---|---|---|---|---|---|---|---|
| | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. |
| Consolidation of holdings—through the Revenue Department .. | 50,000 | 44,180 | 5,820 | 5,820 | 48,000 | 78,250 | 1,32,070 |
| Consolidation of holdings—through the Co-operative Department .. | 50,000 | 21,420 | 28,580 | 28,580 | 50,000 | 50,000 | 1,28,580 |
| Other Co-operative activities.. | 50,000 | 34,530 | 15,470 | 15,470 | 50,000 | 75,000 | 1,40,470 |
| Improvement of rural water supply .. | 1,00,000 | 34,800 | 65,200 | 65,200 | .. | 1,70,000 | 2,35,200 |
| Agricultural Improvement .. | 1,00,000 | 73,220 | 26,780 | 26,780 | 1,00,000 | 1,00,000 | 2,26,780 |
| Education .. .. | 50,000 | 50,000 | .. | .. | 50,000 | 50,000 | 1,00,000 |
| Industries .. .. | 50,000 | 25,420 | 24,580 | 11,330 | 52,190 | 27,830 | 91,350 |
| Veterinary activities .. | 50,000 | 34,030 | 15,970 | 15,970 | 30,500 | 69,500 | 1,15,970 |
| Public Health .. .. | 40,000 | 40,000 | .. | .. | .. | 40,000 | 40,000 |
| Medical .. .. | 10,000 | 5,300 | 4,700 | 4,700 | 10,000 | 35,000 | 49,700 |
| Commissioner, Rural Reconstruction .. | 3,300 | 2,830 | 470 | 470 | .. | 27,910 | 28,380 |
| Women's work .. .. | 14,445 | 13,010 | 1,435 | 1,435 | 23,750 | 18,560 | 43,745 |
| Discretionary grants by Deputy Commissioners .. | 14,000 | 13,500 | 500 | 500 | 14,000 | 21,750 | 36,250 |
| Miscellaneous .. .. | 2,094 | 2,020 | 74 | 74 | .. | 10,780 | 10,854 |
| Reserve for unforeseen charges | 16,161 | .. | 16,161 | 16,161 | .. | 21,420 | 37,581 |
| Total .. | 6,00,000 | 3,94,260 | 2,05,740 | 1,92,490 | 4,28,440 | 7,96,000 | 14,16,930 |

The provision for expenditure during 1939-40 is Rs. 14,16,930 but excluding the regrant of Rs. 1,92,490 it is Rs. 12,24,440. According to the programme provision should have been made for 12 lakhs. The additional Rs. 24,440 have been allotted to the Medical Department (actual allotment—Rs. 25,000) for a scheme for the sale of pure and cheap quinine. The fund will, however, be recouped to this extent by the sale-proceeds of quinine and the expenditure will remain 12 lakhs.

The details of new schemes to be financed in 1939-40 will be found in one place in Part II of the Volume of New Expenditure. Like the current year liberal allotment has been made for consolidation of holdings, improvement of rural water supply, Co-operative and Veterinary activities and for agricultural improvement. Women's work will also receive greater attention next year.

**Loans and Investments.**

13. The debt of the province consists of loans taken from the Central Government and loans raised in the market. The amount outstanding on the 1st April, 1938, was as follows :—

| | Rs. |
|---|---|
| Loans from the Central Government .. .. | 26,73,98,175 |
| Loans raised in the market .. .. .. | 4,20,78,650 |
| Total .. | 30,94,76,825 |

(a) *Loans from the Central Government.*—The sum of Rs. 26,73,98,175 due to the Central Government on the 1st April, 1938, includes the unconsolidated debt of 10 crores which carried interest at 3½ per cent and is repayable at the option of the Punjab Government and with the concurrence of the Government of India. The remaining amount, *viz.*, Rs. 16,73,98,175 is the consolidated debt according to Sir Otto Niemeyer's award and is repayable in 45 years in half-yearly equated instalments with interest at 4 per cent. The annual provision for these loans is Rs. 1,16,16,858. The amount of loan outstanding at the close of the current year will be :—

| | Rs. |
|---|---|
| Consolidated debt .. .. .. | 16,59,63,034 |
| Unconsolidated debt .. .. .. | 10,00,00,000 |
| Total .. | 26,59,63,034 |

(b) *Loans raised in the market.*—The details of the loans outstanding on the 1st April, 1938, are :—

| | Rs. |
|---|---|
| 6¼ per cent Punjab Bonds, 1933, raised in 1923 .. | 850 |
| 5¾ per cent Punjab Bonds, 1937, raised in 1925 .. | 1,56,500 |
| 4 per cent Punjab Bonds, 1948, raised in 1933 .. | 3,15,06,900 |
| 3 per cent Punjab Bonds, 1952, raised in 1937 .. | 1,04,14,400 |
| Total .. | 4,20,78,650 |

The Punjab Bonds, 1933 and 1937, ceased to earn interest with effect from the dates on which they were notified for discharge.

Another loan in the form of Punjab Bonds, 1958, was raised in the market during the current year for financing the Haveli Project. For the first time in the history of provincial loans the loan was underwritten. The issue price was fixed at Rs. 98-8-0 and the underwriters had to be paid a commission of eight annas per cent. The loan was over-subscribed within two hours and partial

allotments had to be made. The amount actually allotted was Rs. 1,00,11,700, although the loan was floated for one crore. The cost of raising this loan has been as follows :—

| | Rs. |
|---|---|
| Discount on the loan .. .. .. | 1,50,175 |
| Underwriting commission .. .. .. | 50,000 |
| Brokerage .. .. .. .. | 11,403 |
| Commission payable to the Imperial Bank of India on applications handled by it .. .. .. | 732 |
| Reserve Bank charges for flotation .. .. | 1,001 |
| Postage, telegraph and advertisement, etc., charges .. | 3,680 |
| Total .. | 2,16,991 |

In addition, management charges at the rate of Rs. 2,000 per crore per annum are payable to the Reserve Bank of India half-yearly.

For the Punjab Bonds, 1948, a sinking fund has been constituted for their amortization within 50 years from the date of flotation. For the Punjab Bonds, 1952 and 1958, a sum equal to 1½ per cent of the total amount of the loan is set aside annually to form a depreciation fund. The provision annually made for these funds, and for interest, is as follows :—

| | Rs. |
|---|---|
| Punjab Bonds, 1948 .. .. .. | 15,29,691 |
| Punjab Bonds, 1952 .. .. .. | 4,68,630 |
| Punjab Bonds, 1958 .. .. .. | 4,50,550 |
| Total .. | 24,48,871 |

The funds can be utilized for the purchase of bonds for cancellation at any time except in the case of Punjab Bonds, 1952, which, in accordance with the terms notified, can be purchased only when the market value falls below the issue price. During the current year 4 per cent Punjab Bonds, 1948, of the value of Rs. 2,59,700 have been purchased. Punjab Bonds, 1937, have been discharged to the extent of Rs. 48,550 and it is anticipated that these and the 1933 Bonds will be fully discharged. Accordingly the loans which will be outstanding on the 1st April, 1939, are as follows :—

| | Rs. |
|---|---|
| 4 per cent Punjab Bonds, 1948 .. .. | 3,12,47,200 |
| 3 per cent Punjab Bonds, 1952 .. .. | 1,04,14,400 |
| 3 per cent Punjab Bonds, 1958 .. .. | 1,00,11,700 |
| Total .. | 5,16,73,300 |

(c) *Investments.*—The cash balance at the beginning of the current year was 2,79 lakhs. This, combined with revenue accruing during the year and the loan raised, was sufficient to meet the transactions during the current year and it was not necessary to take any ways-and-means advances from the Reserve Bank or to float Treasury Bills. On the other hand, there were surplus balances available for short periods. Instead of keeping them idle with the Reserve Bank advantage was taken of investing them in Treasury Bills floated by the Government of India. The total amount thus invested during the year was 7,65 lakhs and the interest earned amounts to Rs. 1,42,000, a welcome addition to provincial revenues.

During the next year there is not much prospect of such investments. Owing to the depletion of the balance it may be necessary to take ways-and-means advances or to float Treasury Bills to meet temporary gaps between receipts and disbursements during the course of the year, but it is hoped that by a few very short-term investments it will be possible to earn Rs. 50,000 as interest and provision in the budget has been made accordingly.

**Loans and Advances by Provincial Government.**

14. The position of the provincial loans accounts as a whole and of *taccavi* loans is summed up in the table below :—

(IN THOUSANDS OF RUPEES.)

| —— | ALL LOANS. | | | | | *Taccavi* LOANS. | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | Up to 1937-38. | For 1938-39. | Up to 1938-39. | For 1939-40. | Up to 1939-40. | Up to 1937-38. | For 1938-39. | Up to 1938-39 | For 1939-40. | Up to 1939-40. |
| Total advances .. | 4,85,38 | 74,94 | 5,60,32 | 68,26 | 6,28,58 | 3,25,43 | 42,36 | 3,67,79 | 41,91 | 4,09,70 |
| Total recoveries .. | 3,58,05 | 17,21 | 3,75,26 | 14,89 | 3,90,15 | 2,27,65 | 11,04 | 2,38,69 | 8,86 | 2,47,55 |
| Total remissions .. | 44,55 | 1,93 | 46,48 | 3,05 | 49,53 | 44,48 | 1,93 | 46,41 | 3,00 | 49,41 |
| Loans outstanding at end of year .. | 82,78 | 55,80 | 1,38,58 | 50,32 | 1,88,90 | 53,30 | 29,39 | 82,69 | 30,05 | 1,12,74 |
| Total interest earned .. | 84,80 | 3,31 | 88,11 | 3,30 | 91,41 | 41,99 | 2,13 | 44,12 | 2,08 | 46,20 |

The figures up to 1937-38 are actuals. For 1938-39 and up to that year the figures are based on the revised estimate of that year. The figures for 1939-40 and up to that year are based on the budget estimate of that year. It will be observed that almost the entire remission is in *taccavi* loans. In fact remissions exceed the interest earned. So far as the provincial exchequer is concerned this means that the *taccavi* loans not only yield no interest but are a source of loss on account of bad debts.

## The Year 1937-38.

**The year's working.**

15. The year 1937-38 closed with a balance, on all accounts, of 2,79 lakhs compared with 1,95 lakhs expected at the time of preparation of revised estimates. The improvement of 84 lakhs was due to an increase in revenue receipts, decrease in revenue and capital expenditure and a betterment of 37½ lakhs in Debt, Deposits, Advances and Remittances heads as indicated in the following table :—

(IN LAKHS OF RUPEES.)

| —— | Revised estimate. | Actuals. | Difference between Revised and Actuals. | Net result on provincial Balance. |
|---|---|---|---|---|
| Revenue Receipts .. .. | 11,53 | 11,68 | +15 | +15 |
| Revenue Expenditure .. .. | 11,47 | 11,36 | —11 | +11 |
| Extraordinary Receipts .. .. | 31 | 30 | —1 | —1 |
| Capital Expenditure .. .. | 1,22 | 1,05 | —17 | +17 |
| Loans and Advances by Provincial Government (bearing interest) .. | 23 | 18 | —5 | +5 |
| Recoveries of Provincial Loans and Advances .. .. | 22 | 21½ | —½ | —½ |
| Debt, deposits and remittances—Receipts | 26,54 | 30,00 | +3,46 | +37½ |
| Debt, Deposits and Remittances—Disbursements .. .. .. | 25,94½ | 29,03 | +3,08½ | |
| | .. | .. | .. | +84 |

According to the revised estimates the ordinary revenue account was expected to end in a surplus of 6 lakhs, after the for mation of a Special Development Fund of 55 lakhs. The year pro ved more favourable than was anticipated and the final accounts disclosed a surplus of 32 lakhs. The betterment

of 26 lakhs in the ordinary revenue account is made up of an increase of 15 lakhs in receipts and a decrease of 11 lakhs in expenditure.

16. Land Revenue yielded 11 lakhs more than was expected owing to a larger area having matured in Kharif than was anticipated, and an increase in the rent of lands leased for one year or a single harvest. The receipts from Hydro-Electric scheme showed an improvement of half a lakh; but owing to a decrease in working expenses (establishment charges), which are accounted for not as expenditure but as reduction from revenue, the revenue account actually improved by 3 lakhs. Civil Administration and Beneficent Departments were responsible for an increase of 2 lakhs, and this was due to increased receipts of royalty from coal mines and oil fields of the Attock Oil Company, and refund by the Simla Municipal Committee of the unspent grant for the sewage scheme. These increases were set off by a decrease of 1 lakh under Taxes on Income due to a smaller amount having been assigned to the provinces from the divisible proceeds of income-tax.

17. The actual expenditure was 0·96 per cent less than the revised estimate. Civil Works were responsible for a decrease of 6 lakhs owing to slow progress on certain works, delay in receipt of debits for land acquisition and unforeseen transactions under "Suspense" which resulted in a greater minus balance. Irrigation revenue account showed a decrease of 2 lakhs due to less expenditure on maintenance and repairs, non-adjustment of debits in respect of land acquired for certain works and lower interest charges as a result of decrease in capital expenditure. Smaller expenditure in the Agricultural Department on purchase of pure and improved seed and in the Education Department on scholarships and grants-in-aid resulted in a drop of about 3 lakhs in Beneficent Departments. There was a drop of 1 lakh under Interest on Debt because certain bond-holders did not claim interest on their bonds during the year, but this was counter-balanced by an increase in pension charges.

18. The capital expenditure as originally budgeted was 1,10 lakhs and was increased to 1,22 lakhs in the revised estimates. The actual expenditure amounted to 1,05 lakhs. Irrigation works showed a decrease of 15½ lakhs. Out of this 13 lakhs was on the Haveli Project. Payments for buildings in the two Trimmu Divisions and for land acquired for the station and weir areas could not be made in time. Debits for cement and other material were also not received from the Indian Stores Department and other Departments. Smaller expenditure on the new Assembly chamber and on the improvement and metalling of certain roads resulted in a drop of about 2 lakhs in Civil Works charged to capital. Commutation of pensions showed a decrease of 1 lakh. This expenditure is of a variable nature and it is not possible to estimate it accurately. Against these decreases there was an increase of 1½ lakhs under Hydro-Electric due to *pro rata* distribution of establishment charges between revenue and capital expenditure.

19. Loans and advances by Government showed a decrease of 5 lakhs in expenditure. The main cause was that 4 lakhs provided for a loan to the Lahore Municipality for its drainage scheme was not utilized.

The net effect of transactions under debt, deposits and advances, and remittances heads was expected to be a surplus of 4½ lakhs according to the revised estimates, excluding the credit of 55 lakhs to the Special Development Fund. The accounts disclosed a surplus of 42 lakhs. This improvement of 37½ lakhs was mainly under Civil Deposits, Cheques and Bills and Remittances which resulted in an excess of receipts over outgoings, to the extent of 33 lakhs.

## The Year 1938-39.

**Revised Estimates compared with original Budget.**

20. When the Budget was framed it was estimated that the year w[illegible] close with a balance of 0·6 lakhs but according to th[illegible] vised estimate the anticipated closing balance is 1,22 showing an improvement of 1,21 lakhs. Out of [illegible] lakhs is due to increased actual opening balance (2,79 lakhs compar[illegible] 1,95 lakhs originally anticipated) and factors leading to this betterm[illegible] been explained above. The remaining improvement of 37 lakhs is in the transactions of the current year.

The following table shows in lakhs of rupees the more important variations between the original budget estimate and the revised estimate :—

| | Original estimate. | Revised estimate. | Difference. |
|---|---|---|---|
| **Receipts—** | | | |
| Ordinary Revenue Receipts .. .. | 11,41 | 11,43 | +2 |
| Extraordinary Receipts .. .. | 31 | 21 | —10 |
| Recoveries of Provincial Loans and Advances (bearing interest) .. | 20 | 19 | —1 |
| Total .. | 11,92 | 11,83 | —9 |
| **Expenditure—** | | | |
| Ordinary Revenue expenditure .. .. | 11,36 | 11,70 | +34 |
| Capital expenditure— | | | |
| (*i*) charged to revenue .. .. | 13 | .. | —13 |
| (*ii*) not charged to revenue .. .. | 2,17 | 2,36 | +19 |
| Provincial Loans and Advances (bearing interest) .. .. .. | 40 | 75 | +35 |
| Total .. | 14,06 | 14,81 | +75 |
| Net effect of transactions under Debt, Deposits and Advances and Remittances heads .. | +19 | +1,40 | +1,21 |

It will be observed that the improvement during the year, on all accounts, was due to an increase in the net effect of transactions under Debt, Deposits and Remittances heads. Otherwise there is a decrease in receipts and increase in expenditure due to famine. The increase of 75 lakhs in expenditure is large; but excluding expenditure resulting from famine, which is 27 lakhs for famine relief and 37 lakhs for Loans and Advances, there is an increase of 11 lakhs compared with the original estimate. Even this increase would have been more than covered by the receipts anticipated but lost, entirely due to famine.

21. The increase in revenue receipts is distributed as follows :—

**Revenue Receipts.**

| | In lakhs of rupees. |
|---|---|
| Taxes on income other than Corporation tax .. | +12 |
| Land Revenue (gross) .. .. .. | —19½ |
| Stamps .. .. .. .. | —6 |
| Forests .. .. .. .. | +1 |
| Registration, Motor Vehicles taxation and Other Taxes and Duties .. .. .. | +1 |
| Irrigation (Direct Receipts) .. .. .. | +2 |
| Effect of reduction in irrigation working expenses which are treated not as expenditure but as reduction of receipts .. .. .. | +7 |
| Interest .. .. .. .. | +1 |
| Administration of Justice .. .. .. | +1½ |
| Miscellaneous Departments .. .. | +1 |
| Beneficent Departments .. .. .. | —1½ |
| Civil Works .. .. .. .. | —8½ |
| Miscellaneous .. .. .. .. | +11 |
| | +2 |

The biggest decrease of 19½ lakhs is in Land Revenue receipts due to famine and drought. The suspensions and remissions in the famine stricken area have been heavy and there has been a decrease in cultivated area throughout the province owing to the failure of the rains. Remissions under the sliding scale of assessment and on account of the fall in prices have also been higher than anticipated.

The next decrease of 8½ lakhs occurs under " Civil Works " and is due to less expenditure on works financed from the Central Road Development Fund.

Stamps are responsible for a decrease of 6 lakhs which occurs mainly under Non-judicial and Court-Fee stamps owing to decrease in civil litigation as a result partly of economic depression but mainly of legislation in recent years for the relief of indebtedness. The actual receipts in 1936-37 were 89·85 lakhs. The revised estimate of 1937-38 was put at 90·59 lakhs and the Budget estimate of the current year at 90·74, assuming that the slight improvement would continue, but the actuals of 1937-38 show 90·36 lakhs and the progress of receipts during the current year does not justify more than 84·96 lakhs. The receipts from this source in 1928-29 were 1,21 lakhs and during the ten subsequent years have gradually fallen by 36 lakhs.

In Beneficent Departments the main decrease of 4 lakhs occurs under Agriculture on account of loss in the sale of improved and pure seeds owing to a fall in prices and purchase of a smaller quantity of seed due to scarcity of pure seed. Less purchase, of course, results in a corresponding decrease in the provision on this account on the expenditure side. This decrease is counterbalanced to a certain extent by increase under Industries, Education and Public Health leaving a net decrease of 1½ lakhs. The increase of 1 lakh under Industries is due to receipts from the workshop opened during the year at the Hosiery Institute, Ludhiana, recovery of outstanding bills in connection with the Lahore Exhibition and more transfers from the Deposit accounts of various grants given by the Government of India for the development of Industries. Under Public Health the increase of approximately one lakh is also due to a transfer from the Deposit section for rural water supply schemes financed from the Government of India grant. Under Education the increase of approximately one lakh is the result of an increase in the number of students in schools and colleges and the opening of new schools.

Of the increases in receipts the most important is 12 lakhs being the share of " divisible proceeds " of income-tax under section 138 (1) of the Government of India Act, 1935. Nothing was provided in the Budget estimate on this account because it was not then known definitely what amount, if any, would be available.

The increase of 11 lakhs under Miscellaneous is due mainly to the transfer of the entire amount in the Famine Relief Fund to the Revenue account for expenditure on famine relief during the year.

The increase of 7 lakhs caused by reduction in Irrigation expenses is the result of economy in expenditure of 5 lakhs in Maintenance and Repairs and 2 lakhs in Minor Works.

The Irrigation Receipts show an increase of 2 lakhs. This is due to an increase expected in Miscellaneous receipts. So far as water rates are concerned the Rabi harvest was better than the previous year, but recovery of water rates is likely to be less by about 2 lakhs than anticipated. Large remissions in Kharif and less realizations of arrears due to famine and scarcity conditions are responsible for this drop. Under Miscellaneous Receipts the increased turnover and probable profit on the year's working of the Central Workshops, Amritsar, is expected to yield 2 lakhs more while the increased recovery of seigniorage charges from the Bikaner Durbar for the water supplied to the Gang Canal will add another lakh. There are also other small increases. The cumulative effect is that the decrease of 2 lakhs in water rates is converted into an increase of 2 lakhs under Irrigation—Direct Receipts.

The increase of 1½ lakhs under Administration of Justice is the result of credits representing the sale-proceeds of unclaimed and escheated property, largely from one estate of Francis Smythe. The undisbursed amount in the

personal ledger accounts of the Preparation of Appeal Fund in connection with the first appeals, instituted before April, 1927, has also contributed towards the increase.

Forests show an increase of 1 lakh due to the larger outturn of *shisham* timber and firewood from the Chhanga Manga Plantation, better rates for firewood in the Khanewal and Miranpur Plantations and supply of more crude resin to the Jallo Factory. Larger profits received from the factory as a result of increased supply of resin made in 1937-38 and better rates obtained from the sale of rosin and turpentine are also responsible for the increase. Under Interest there is an increase of 1 lakh owing to the investment of the surplus cash balances in the treasury bills floated by the Central Government. The increase of 1 lakh under Miscellaneous Departments is due to better receipts from oilfields and under the Wild Birds and Wild Animals Protection Act. Other increases are of a minor nature and have been explained in detail in Part B of the memorandum.

**Extraordinary Receipts.**

22. The revised estimate for Extraordinary Receipts is 21 lakhs compared with 31 lakhs originally estimated — a drop of 10 lakhs. Sale-proceeds of nazul land account for 6 lakhs and this is the result of the postponement of the sale of nazul lands at Amritsar, Hissar and Jhelum and of the Fort lands at Lahore. The revised estimates of the sale-proceeds of town sites and of proprietary rights to Crown tenants show a decrease of about 1½ and 4 lakhs respectively. The sale of town sites at Jaranwala and Lyallpur has been postponed. The decrease in the sale-proceeds of proprietary rights occurs in the Montgomery and Lyallpur districts. The grantees are unable to pay because prices of agricultural produce remained low throughout the year. There is an increase in refunds. Certain villages owned by the Jaipur State were acquired for the site of New Delhi. The Jaipur Durbar was granted as compensation a land revenue assignment of Rs. 5,047 per annum on certain villages of the Gurgaon district. As the Government of India were liable for the compensation payable to the Jaipur Durbar they extinguished their liability to the Punjab Government by the payment of Rs. 1,00,940, being the capitalized value of the land revenue assignment. The Jaipur Durbar complained that the *jagir* granted to them as compensation had never yielded the anticipated revenue and they asked that the capitalized value which was paid by the Government of India to the Punjab Government might be given to them. This was agreed to. As the capitalized value was credited to Extraordinary Receipts the payment to the Jaipur Durbar has been treated as a refund from Extraordinary Receipts. These decreases are, however, set off to the extent of 3 lakhs by an increase in the sale-proceeds of undeveloped agricultural lands in colonies. Although the sale of the land near Pir Mahal and Kamalia has been postponed an increase is anticipated from the sale of 1,604 acres in the Renala Lift Area and 5,000 acres in the Nili Bar Colony.

**Revenue Expenditure.**

23. The following table shows the expenditure now estimated under the more important heads as compared with the budget estimates :—

| | IN LAKHS OF RUPEES. | | |
|---|---|---|---|
| | Budget Estimate. | Revised Estimate. | Difference. |
| Direct demands on the Revenue .. .. | 82 | 87 | +5 |
| Miscellaneous Irrigation Expenditure .. .. | 10 | 12 | +2 |
| Civil Administration .. .. .. | 3,28 | 3,34½ | +6½ |
| Beneficent Departments .. .. .. | 3,28 | 3,27 | —1 |
| Civil Works .. .. .. .. | 1,32½ | 1,19½ | —13 |
| Interest charges and reduction of debt (Heads 17, 22, 23 and 51) .. .. .. | 1,41 | 1,45 | +4 |
| Miscellaneous, including Famine expenditure .. | 1,14 | 1,44½ | +30½ |
| | | | +34 |

Under "Direct demands on the Revenue" are included Land Revenue, Excise, Stamps, Forests, Registration, Charges on account of Motor Vehicles Taxation Acts and other taxes and duties. The increase of 5 lakhs is made up of excess of half a lakh each under Land Revenue and Excise and of 4 lakhs under Forests. The real increase under Land Revenue is 1½ lakhs due mainly to the appointment of additional staff for the Jhelum Settlement, starting of the Gurgaon Settlement with effect from October, 1938, retention of the staff engaged in connection with the *Shamilat* problem in the hills of the Murree and Kahuta tahsils and the undertaking of the scheme for soil conservation in the Chakwal tahsil. The saving of 1 lakh on account of the classification of advances for well-sinking in the Nili Bar Colony under Loans and Advances instead of Land Revenue has reduced the excess to half a lakh. Under Excise the increased expenditure is mainly due to the payment of the purchase price of surplus stock of hill opium to the wholesale vendors of Kulu and Kot Khai at the rate of Rs. 5 per seer against Rs. 2-8-0 per seer, the price at which it has been sold to the Opium Factory, Ghazipur. The consumption of hill opium in the Punjab has been prohibited with effect from the 1st April, 1937. The stock of hill opium left with these wholesale vendors on the 31st of March, 1937, could not be sold any more. The prohibition was introduced in the interests of Excise administration. Government were therefore bound to avoid unnecessary loss to the wholesale vendors and purchased their stock at a reasonable price. The Ghazipur Factory, however, was not prepared to pay as much because of certain impurities in the hill opium. Under Forests the increase is accounted for by the payment of Rs. 3,39,000 to Sir Daya Kishen Kaul in the final settlement of dissolution of the Jallo Rosin and Turpentine Factory co-partnership and by the increased expenditure resulting from the collection of more resin for supply to the Jallo Factory and the supply of Fir sleepers to the North Western Railway, for which a further contract was obtained during the course of the year.

The increase in Miscellaneous Irrigation Expenditure is partly due to the undertaking of the Karol Tube-well Project which envisages the irrigation of about 30 square miles of area lying between the Ravi, the tail of the Shalimar distributary and Lahore City. It is also due to the observations and experiments being carried out in connection with water-logging investigations. These investigations, so far, show that a practical canal lining appears to be possible at Rs. 6 per hundred square feet against Rs. 25 previously assumed as a cheap rate. The increase in the *pro rata* share of establishment between revenue and capital expenditure is also responsible for a part of the increase.

"Civil Administration" consists of General Administration, Administration of Justice, Jails and Convict Settlements, Police and Miscellaneous Departments. Of the increase of 6½ lakhs, General Administration accounts for 3¾ lakhs, Administration of Justice ¾ lakh, and Police 2½ lakhs. In General Administration the increase of over 2 lakhs consists of the supplementary grants voted by the Legislative Assembly for village improvement schemes through the District Officers (Rs. 70,000), audit of colony receipts (Rs. 9,080), travelling and daily allowances of members of the Legislative Assembly (Rs. 75,000), and the second Election Petition Commission (Rs. 47,000). Further increase is expected in the travelling and daily allowances of members of the Legislative Assembly owing to the last special session held in January and in the contingent expenditure of the Assembly Office due to the move to the new building. A further extension of the period of the second Election Petition Commission and strengthening of the office establishment in the Civil Secretariat, of the Financial Commissioners' Office, and the District Establishment accounts for the remaining increase. Under Administration of Justice the increase chiefly occurs in diet and road money to witnesses in criminal courts, also in mufassil establishment where engagement of temporary Public Prosecutors has been necessitated by an unexpected increase in litigation including the prolonged Fatehwal Murder Case. A part of the increase is also due to the appointment of the Advocate-General and his Assistant to conduct special cases in courts other than the High Court, and to the payment now made to copyists in the District and Sessions Courts from general revenues instead of from fees realized from the applicants for copies. Under Police the decrease in the recovery made from the Railway Board on account of the cost of Order Police is mainly responsible for the increase. As a result of the recommendations of the Railway Police Expenditure Committee, 1937, the Patrol staff has been excluded from Order and in consequence of this

change a credit of Rs. 96,000 had to be afforded to the Railway Board on account of excess recovery made in 1937-38 and the current year's recovery has been reduced by Rs. 1,17,000. There are other increases, *e.g.*, expenditure in connection with process fees for the services of summonses in non-cognizable cases and Viceregal journey charges, but they are partly counterbalanced by the larger recovery from the Delhi Administration on account of the cost of Order Police in addition to Crime Police.

The decrease in the Beneficent Departments can be accounted for by the drop in Education expenditure. The increased grant of Rs. 30,000 to the Punjab University for the appointment of a wholetime paid Vice-Chancellor could not be utilised in full, because the post was not filled till the middle of the year. Savings also occurred owing to lapsed or vacant scholarships, retirements and delay in the opening of certain girls schools. There is an excess of about 4 lakhs in Public Health counterbalanced by a corresponding saving under Agriculture. The increase in Public Health is due to the grant-in-aid to the Lahore Municipality for its drainage and sewerage scheme (Rs. 3 lakhs) and the increase in the grant-in-aid to the Lahore Improvement Trust (Rs. 25,000) and the expenditure on the rural water supply schemes in the Hissar, Hoshiarpur and Kangra districts (Rs. 1,48,020). This is counterbalanced to the extent of Rs. 65,200, being the saving in expenditure on water supply schemes financed from the Special Development Fund. The rural water supply schemes in the districts mentioned above are being financed from the Government of India grant for rural reconstruction schemes. The expenditure on agriculture has decreased mainly on account of less expenditure on operations under improved seeds. It has not been possible to utilize the budget provision to the full extent, partly because the price of wheat has been lower than that on which the budget estimate was based, and partly because pure gram seed was not available owing to the prevalence of gram blight disease. There has also been scarcity of pure *toria*, cotton and *barseem* seed. The scheme for the development and improvement of the Minto Park for which Rs. 50,000 had been provided is not being carried out this year because it is not yet ripe for execution. The new development schemes were also started late. Under Veterinary the expenditure on the purchase of fodder for the live-stock at the Hissar Cattle Farm is expected to be Rs. 1,75,000, or a little more, on account of Famine, but there is a net increase of only Rs. 29,000 in the total expenditure because of savings anticipated by the non-utilization of the full amount provided for the construction of Veterinary hospitals and the non-purchase of fresh live-stock for the Hissar Cattle Farm. Postponement of indigenous goat breeding scheme and less expenditure on schemes financed from the Special Development Fund also contribute to reduce the excess. Expenditure under Co-operation also shows a decerease due to late filling of new posts and late starting of schemes financed from the Special Development Fund. This being the first year of the Special Development Programme, work started late, but the amounts saved have been regranted for expenditure in the next year.

Civil Works show a decrease of 13 lakhs and it falls mainly under communications financed from the Central Road Development Fund. This has been achieved by the postponement of certain works in order to augment the balance in the fund and the result is a saving of 9 lakhs. The remaining 4 lakhs is partly due to economy effected in expenditure on repairs and by postponement or slowing down of expenditure on certain works and partly to the surrender of 1 lakh provided for the improvement of village roads. The proposals for these improvements are being worked out separately in connection with the development scheme to be financed from the Government of India grant for rural reconstruction schemes and will be executed through the District officers.

The increase of 4 lakhs under Interest represents mainly the expenditure incurred on raising the new loan Punjab Bonds, 1958. Payment of half-yearly interest on this loan accounts for Rs. 1,60,000 and the balance is for discount, underwriting and other charges.

The increase in "Miscellaneous" consists of increases under Famine (Rs. 24 lakhs), Superannuation Allowances and Pensions (Rs. 4 lakhs), and Miscellaneous (Rs. 2½ lakhs). The expenditure on Famine has been explained in paragraph 3. The increase in pensions is mainly due to the retirement of more civil officers. Under Miscellaneous the increase would have exceeded 2½ lakhs but for savings to the extent of 1½ lakhs due to late setting up of Debt Conciliation Boards and late appointment of Panchayat Officers. Owing to a change in

the system of accounting, the guarantee to the North-Western Railway for the Kangra Valley and Shahdara-Narowal Railways has to be paid in the year to which it relates instead of in the following year as had been the practice so far. Accordingly, instead of paying guarantee only for 1937-38 in the current year, in accordance with the budget provision, payment had to be made for two years, viz., 1937-38 and 1938-39. This double payment caused an excess of Rs. 3,81,900. There has also been an increase of Rs. 47,400 by the extension of the Unemployment Committee and the Resources and Retrenchment Committee. Loans written off are adjusted under "Miscellaneous—Irrecoverable temporary loans written off" by *per contra* credit to the loan account. The famine and scarcity conditions in the various parts of the province are responsible for an increase of Rs. 20,800 in loans written off.

**Deficit in Revenue Account.**

24. When the budget was presented to the legislature the estimate of total revenue receipts was 11,41 lakhs and of revenue expenditure 11,36 lakhs. A surplus of 5 lakhs was expected. According to the estimates now revised, revenue receipts are likely to be 11,43 lakhs and revenue expenditure 11,70 lakhs showing a deficit of 27 lakhs, but if Extraordinary Receipts are taken into consideration, the deficit is 6 lakhs. The reason for this deficit, as explained in paragraph 6, is expenditure on Famine Relief and loss of revenue receipts due to Famine. The deficit is exactly the same as expenditure on Famine Relief, i.e., 27 lakhs. This result has been achieved in spite of the fact that additional revenue expenditure amounting to 40 lakhs, not foreseen at the time of framing the budget, was sanctioned during the year.

**Capital Expenditure.**

25. The expenditure in the Capital section of the accounts, as originally estimated, was 2,30 lakhs. Out of this 13 lakhs was shown as charged to Revenue, i.e., met from extraordinary receipts. Owing to heavy expenditure on famine relief extraordinary receipts have been utilized for meeting the deficit anticipated in the Revenue account on the working of the year. No portion of the Capital expenditure, as now estimated, has, therefore, been shown as charged to Revenue. The revised estimate is 2,36 lakhs and shows an increase of 6 lakhs over the budget estimate.

The Haveli Project, the most important of the Capital works at present in progress, as orginally framed was designed to be completed in 5 years at an estimated cost of 5,36 lakhs, but by adopting a largely reorganized system of carrying out work, for which the creation of a Central Designs Office is mainly responsible, the project will be almost wholly completed in two years at a cost of approximately 3,50 lakhs resulting in a saving of about 1,86 lakhs. The saving would have been greater, but 30 lakhs, not provided in the original estimate, are being spent on lining the main canal. This being the second year of construction it was possible to speed up work more than was anticipated at the time of framing the budget and has resulted in an increase of 44 lakhs over the budget estimate. In spite of this the Irrigation Capital expenditure shows an increase of only 28 lakhs because there is a decrease in expenditure on drainage works. Several of the drainage works for which provision was made in the budget, through the Schedule of New Expenditure, could not be started owing to unexpected delay in the acquisition of land.

This increase is, however, counterbalanced to the extent of 22 lakhs by savings in expenditure on Hydro-Electric Schemes and Commuted Value of Pensions. The Hydro-Electric Schemes show a decrease of 19 lakhs. Of this, 13 lakhs is due to delay in obtaining tenders and in the supply of material for the Sialkot-Gujranwala-Lyallpur Project owing to the unsettled state of international affairs in Europe and the pressure of the rearmament programme. The remaining savings are due to delay in the execution of works such as (*i*) construction of duplicate feeder to Lahore Grid and electrification of Royal Artillery Bazaar, Lahore Cantonment, and fourteen villages, (*ii*) the Lahore East Rural Electrification Project and (*iii*) the Jullundur North and West Rural Electric Supply Projects, etc. In the Commuted Value of Pensions the decrease is mainly due to larger recoveries now expected from other Governments. These recoveries depend upon the actual payments by this Government to Government servants of other provinces residing in the Punjab and are difficult to forecast with accuracy.

**Loans and Advances by Government.**

26. The original provision of over 39½ lakhs was supplemented by 40 lakhs during the course of the year (second instalment of Supplementary Estimates) to meet heavy expenditure on *taccavi* advances especially in the south-eastern districts. Against the modified grant of 79½ lakhs, loans likely to be given out amount to 75 lakhs. The *taccavi* loans are estimated to fall short of anticipations by 4 lakhs but out of 43 lakhs provided for this purpose 37 are for the famine area. The loans to municipalities and district boards have also fallen as compared with the original budget, mainly because the Municipal Committee, Dera Ghazi Khan, is not taking any loan and the District Board, Hissar, will take the loan of Rs. 30,000 next year instead of this year.

Recoveries of loans advanced are expected to amount to 19·14 lakhs against the original estimate of 20·46 lakhs. The drop of over 1¼ lakhs falls partly under the Land Improvement Loans Act and partly under the Agriculturists Loans Act and is due to famine conditions in the Ambala Division and drought elsewhere.

**Transactions under (a) Debt, (b) Deposits and Advances and (c) Remittance heads.**

27. Against 19 lakhs shown as surplus in the original budget the revised estimates show that the receipts will exceed outgoings by 1,40 lakhs. The proceeds of the new loan (Punjab Bonds, 1958) account for 1 crore. The State Provident Funds were anticipated to add 26 lakhs to the balances but larger withdrawals are likely to result in an addition of 19 lakhs only. The receipts under Famine Relief Fund show an increase on account of the credit given to the fund on the encashment of securities, but it has been wiped off by the transfer of the balance available in the fund to the Revenue account for expenditure on Famine Relief. The withdrawals from the Special Development Fund show a drop of 2 lakhs, but the amount not spent this year has been regranted for expenditure during the next year. According to the original estimate the receipts on account of Deposits of Local Funds were almost the same as the disbursements, and for Civil Deposits the disbursements were to exceed the receipts by 2 lakhs, but the revised estimates show that the transactions will result in a surplus of 4 lakhs and 8 lakhs, respectively. The Road Development Fund is also expected to show a surplus of 4½ lakhs against the net withdrawal of 5 lakhs in the original budget. The expenditure has dropped by 9 lakhs on account of the postponement of certain works, viz., reconditioning of roads, with a view to augment the balance in the fund for meeting expenditure next year on the construction of road bridges across the Trimmu and Sidhnai Headworks which are required in connection with the Haveli Project. Remittance transactions now show a surplus of 3 lakhs.

## The Year 1939-40.

**Revenue Receipts.**

28. The estimate for ordinary revenue receipts is 11,67 lakhs which is 1 lakh less than the accounts of 1937-38. The drop in receipts compared with 1937-38 looks small but in reality it is 17 lakhs when it is remembered (paragraph 1 (*f*) above) that transfer to the Revenue account from the deposit section was 29 lakhs in 1937-38 and is expected to be 45 lakhs next year. Receipts from Land Revenue and Irrigation, which are the principal sources of revenue in the Punjab, are estimated to be less by 37 lakhs in spite of the fact that there is a reduction of 12 lakhs in irrigation working expenses, which are treated not as expenditure but as reduction of receipts. Land Revenue alone is responsible for a decrease of 27½ lakhs. An increase of 12 lakhs under Civil Works is entirely due to a bigger transfer from the Central Road Development Fund. The increase of 11 lakhs under Beneficent Departments is the result of transfers from the deposit account of the Special Development Fund. Other Taxes and Duties show an increase of 7 lakhs but this is due to the proposed levy of a tax on the retail sales of motor spirit and lubricants used for motor vehicles. The increase of 3 lakhs under Excise is anticipated as the result of increase in the issue price of Excise opium and the levy of a transport pass fee of Rs. 20 per seer on Charas, but this is problematical because the increase in price may reduce consumption. The increase of 3½ lakhs under Taxes on Income is due to larger anticipated receipts from the divisible proceeds of income-tax. Hydro-Electric Schemes show a decrease of 4 lakhs, but excluding the provision of 11 lakhs for a depreciation fund there is really an increase of 7 lakhs in receipts, which is the result of gradual development of load. Stamps are again responsible for a drop of 4½

lakhs. Under Miscellaneous there is a decrease of $3\frac{1}{2}$ lakhs because there is nothing left in the Famine Relief Fund for transfer to the revenue account next year. Keeping this out of consideration the section Miscellaneous shows an increase of 7 lakhs which is chiefly due to the receipt of fees from cattle pounds and ferries. These receipts will form part of the provincial revenues with effect from the 1st April, 1939, but an equal amount has been provided on the expenditure side for grants to those local bodies which obtained these receipts prior to the 1st April.

29. The estimates of 1939-40 compared with the revised figures of 1938-39 show an increase of 24 lakhs. The main increases are :—

| | *Lakhs.* |
|---|---|
| Taxes on Income .. .. .. | $1\frac{1}{2}$ |
| Land Revenue (gross) .. .. | 3 |
| Excise .. .. .. .. | 7 |
| Stamps .. .. .. .. | 1 |
| Other Taxes and Duties .. .. | $6\frac{1}{2}$ |
| Beneficent Departments .. .. | 8 |
| Civil Works .. .. .. | 5 |
| Hydro-Electric Scheme (net) .. .. | 1 |
| Miscellaneous .. .. .. | |
| Total .. | 38 |

These are counterbalanced to the extent of 14 lakhs by the following decreases :—

| | |
|---|---|
| Forests .. .. .. .. | 1 |
| Interest .. .. .. .. | 1 |
| Administration of Justice .. .. | 2 |
| Transfer from Famine Relief Fund .. | 10 |
| Total .. | 14 |

Our share in the divisible proceeds of income-tax is expected to be $13\frac{1}{2}$ lakhs next year against 12 lakhs this year. The slight improvement in land revenue receipts will result only if famine does not extend beyond the Rabi harvest. The increase in Excise is expected from new duties and fees to be levied with effect from the 1st April, 1939. The increases under Stamps, Beneficent Departments, Civil Works and Miscellaneous are not real. Under Stamps the increase is due to an order of the High Court that process fee is leviable in non-cognizable cases instituted by public servants in the performance of their official duties and it means a corresponding increase in the Police expenditure. The increased transfer from the Special Development Fund is responsible for the increase under Beneficent Departments. Similarly there is an increased transfer from the Central Road Development Fund under Civil Works. The increase under Miscellaneous is due to the credit of ferries and cattle pounds receipts to the provincial revenues in the first instance. The amount received will be paid back to the local bodies concerned who have been in direct receipt of this income in the past. The new tax on petrol is responsible for the increase under Other Taxes and Duties. Under Hydro-Electric Schemes the increase is really 7 lakhs due to the steady development of load but including higher working expenses, and depreciation fund deposit, the net increase is only 1 lakh.

Among decreases, the main decrease is due to no transfer from the Famine Relief Fund because the Fund has been exhausted. There were two non-recurring items of receipts during the current year under Administration of Justice: in their absence there is a decrease. Smaller investments in treasury bills will result in a decrease in interest. Under Forests the decrease is anticipated due to a poor crop in the Chhanga Manga plantation, less outturn of firewood, and less launchings by the Hill Divisions. There is a decrease of 5 lakhs in Irrigation Direct Receipts, but this is counterbalanced by a decrease of the same amount in working expenses.

**Extraordinary Receipts.**

30. It is difficult to estimate Extraordinary Receipts with any degree of accuracy as they depend on the areas actually sold and the prices realized which vary with the keenness of the demand for land, but the estimate of 1939-40 (35 lakhs) is better by 14 lakhs compared with the revised estimate of the current year (21 lakhs). An increase of 6 lakhs is anticipated by the revival of the postponed sales of nazul lands at Lahore, Amritsar and Jhelum. Sale of town sites is expected to yield 8½ lakhs more than the current year's sale proceeds, because 80 per cent of the price of residential and shop sites to be sold towards the end of February will be realized in the beginning of the next year. Sites are also likely to be auctioned at a new mandi at Narang in the Sheikhupura district. From the sale of proprietary rights to Crown tenants an increase of half a lakh is anticipated over the very much reduced receipts expected during the current year.

**Expenditure.**

31. The table below shows the estimated expenditure in the year 1939-40 as compared with the revised estimate of 1938-39 :—

| | (IN LAKHS OF RUPEES.) | | |
|---|---|---|---|
| | 1939-40 Budget. | 1938-39 Revised Estimate. | Difference. |
| Revenue expenditure charged to Revenue .. | 11,96 | 11,70 | +26 |
| Capital expenditure charged to Revenue (i.e., met from Extraordinary Receipts). | .. | .. | .. |
| Capital expenditure not charged to Revenue .. | 1,68 | 2,36 | —68 |
| | | | —42 |

The increase in revenue expenditure and decrease in capital expenditure will be explained in the succeeding paragraphs. A certain amount of increase in revenue expenditure is inevitable on account of the accrual of increments but there is an increase of 14 lakhs in expenditure on Famine, and of 9 lakhs on Beneficent Departments excluding the amount transferred from the Special Development Fund. The decrease in capital expenditure is due mainly to the Haveli Project nearing completion. The figures of new expenditure are as follows :—

| | (IN THOUSANDS OF RUPEES.) | | |
|---|---|---|---|
| | Charged to Revenue. | Not charged to Revenue. | Total. |
| 1938-39 .. .. .. | 85,83 | 30,92 | 1,16,75 |
| 1939-40 .. .. .. | 77,96 | 23,12 | 1,01,08 |

**Analysis of Revenue Expenditure.**

32. (*a*) *Ordinary Revenue Expenditure.*—Revenue expenditure, which is estimated at 11,96 lakhs, is 26 lakhs more than the revised estimate for 1938-39. The variations are as follows :—

| | (*In thousands.*) |
|---|---|
| Direct demands on the Revenue .. | +64 |
| Irrigation expenditure financed from Revenue | —44 |
| Civil Administration .. .. .. | —5,29 |
| Beneficent Departments .. .. | +17,11 |
| Civil Works .. .. .. | —7,39 |
| Interest charges and reduction of debt (heads 17, 22, 23 and 51) .. .. | +3,08 |
| Miscellaneous .. .. .. | +18,06 |
| Total .. | +25,77 |

In spite of considerable economy in expenditure and reduction in new expenditure the revenue expenditure shows an increase. The main increase occurs under the Miscellaneous Section where Famine is responsible for an increase of 14 lakhs, Superannuation Allowances and Pensions 1 lakh, and Miscellaneous 3 lakhs. The last named includes grants to local bodies on account of ferries and cattle pounds receipts. The next increase of 17 lakhs in Beneficent Departments is due to new expenditure, part of which is to be met from the Special Development Fund. Interest charges include interest for the full year payable on the loan raised during the current year and depreciation fund for that loan at the rate of $1\frac{1}{2}$ per cent of the total amount. Under Civil Works economy cuts amount to 11 lakhs but an increased transfer of 4 lakhs from the Central Road Development Fund results in a net decrease of 7 lakhs. The decrease under Civil Administration is 2 lakhs each under General Administration and Administration of Justice and 1 lakh under Police. Under General Administration it is expected that next year expenditure on the travelling and daily allowances of the members of the Legislative Assembly will be less owing to the absence of special sessions. It is also expected that the Commission for the trial of election petitions will cease to function. Moreover, there is a drop of about half a lakh in the transfer from the deposit account of the Government of India grant for rural reconstruction schemes. Under Administration of Justice the general cuts applied to travelling allowance and contingencies, as a measure of economy, are entirely responsible for the decrease. The decrease under Police is also due to economy cuts. It would have been more but for expenditure included in the volume of New Expenditure and a larger recovery from the Railway Board for the Order Police, because next year there will be no refunds on account of past excess recoveries. Other variations are of a minor nature and have been explained in detail in Part B of the Memorandum.

(b) *New Expenditure.*—New expenditure charged to Revenue has been allotted to various departments as follows :—

| | (IN THOUSANDS OF RUPEES.) | | |
|---|---|---|---|
| | Non-recurring. | Recurring. | Total. |
| Direct demands on the Revenue .. .. | 3,18 | 17 | 3,35 |
| Civil Administration .. .. .. | 3,37 | 1,64 | 5,01 |
| Beneficent Departments .. .. .. | 21,80 | 4,50 | 26,30 |
| Miscellaneous .. .. .. .. | 2,66 | 4,21 | 6,87 |
| Buildings and Roads .. .. .. | 25,54 | 6 | 25,60 |
| Irrigation .. .. .. .. | 10,64 | .. | 10,64 |
| Hydro-Electric .. .. .. | 12 | 7 | 19 |
| Total .. | 67,31 | 10,65 | 77,96 |

Owing to financial stringency it was not possible to include in the volume of New Expenditure all the important development schemes worked out during the year. These will have to wait for better times. It will be observed that the largest share has been allotted to Beneficent Departments. This includes 6 lakhs from the Special Development Fund, 1 lakh having gone under Land Revenue for consolidation of holdings through the Revenue Department and 1 lakh under Miscellaneous for the Commissioner, Rural Reconstruction's schemes, women's work, discretionary grants and a reserve for unforeseen expenditure.

Under Education new expenditure includes 3 new middle schools and 180 new primary schools for girls and additional staff for several girls schools owing to increase in the number of students. There is also an increase of Rs. 75,000 in the maintenance grants to the district boards for vernacular education and a programme for the liquidation of illiteracy will be launched at a cost of Rs. 23,000. Under the Special Development Programme the scheme of converting one school in each tahsil of a district into a model school will be continued,

Medical includes the employment of two women Assistant Surgeons and seven women Sub-Assistant Surgeons and the provincialization of the Josephine Hospital for Women at Hazro. There is also provision for the provincialization of three tahsil headquarters hospitals and the opening of a Radium Institute at Lahore, which has become possible by a handsome donation of half a lakh from a philanthropist of Lahore. Two important schemes of opening subsidized dispensaries in rural areas in charge of medical practitioners, and the employment of part-time private practitioners in the out-door and special departments of the District headquarters hospitals will be introduced. The Special Development Programme will continue the scheme of more touring by medical officers in charge of rural dispensaries and there is a fresh scheme for making cheap and pure quinine available in both rural and urban areas.

Public Health includes new expenditure of 5 lakhs for sanitary schemes—3 for rural and 2 for urban areas. The Anti-Hookworm scheme will continue for two years more. The Special Development Programme includes 1·7 lakhs for the improvement of drinking water supply out of which Rs. 10,000 have been earmarked for wells for scheduled castes. The drainage and paving of streets will be carried out in 286 more villages.

Under Agriculture provision has been made for increasing the staff of Agricultural Assistants and Mukaddams and an important scheme relating to research in the water requirements of various crops will be undertaken. The Special Development Programme of intensifying the agricultural demonstration and propaganda work will be extended to another tahsil in each district.

New expenditure under Veterinary includes grants-in-aid to the district boards for the construction of four new Veterinary hospitals and schemes amounting to Rs. 69,500 under the Special Development Programme.

The Co-operative Department gets 1 lakh for consolidation of holdings and other Co-operative activities and Rs. 25,000 for better living societies under the Special Development Programme in addition to Rs. 28,820 for such societies in the ordinary new expenditure. Another important item of new expenditure is an increase of 1 lakh in the grant-in-laid to the Punjab Co-operative Union. There is a provision of Rs. 50,000 for loans to Co-operative House Building Societies, but this is not charged to Revenue.

The important items of new expenditure under Industries, besides Rs. 27,830 for Special Development Programme, are the opening of a Provincial Stores Purchase Department and a scheme for improving the pottery industry. There is also a provision for three more Assistant Superintendents of Industries for a better organization of work in the province. Two lakhs have been provided for assistance under the Punjab State Aid to Industries Act. The provision of 2 lakhs under the Industrial Loans Act is not charged to Revenue but is included in Loans and Advances.

Under Land Revenue new expenditure includes the re-settlement of the Pakpattan Tahsil and staff for the management of *guzaras* in the Rawalpindi Division, in addition to Rs. 78,250 for consolidation of holdings under the Special Development Programme.

Under Forests there is an important scheme involving new expenditure of 1 lakh for taking anti-erosion measures. This is the result of a recommendation of the Punjab Forest Committee and is likely to have far-reaching effects on the prosperity of the affected areas.

The main item in the new expenditure relating to the Police Department is the retention of the provincial additional police for another year. There is also provision for an increase in the prosecuting staff and in the strength of rural police stations and posts, and in the motor mobile patrol.

Under General Administration there is provision for the appointment of an officer with a small staff to investigate complaints of corruption in the public services. Owing to an increase in the district work it is proposed to add nine posts of Extra Assistant Commissioners to the Provincial Civil Service cadre.

The items included under Miscellaneous, besides the Special Development Programme, consist mainly of the continuance of activities already in operation or extension of the establishment already employed except that Rs. 25,000 have been provided for a special donation to the Anjuman-i-Himayat-i-Islam and it is proposed to extend the Local Self-Government Inspectorate to the

Rawalpindi, Jullundur and Ambala Divisions, but expenditure on this will be recouped from the local bodies concerned.

A major portion of new expenditure under Civil Works consists of communications financed from the Central Road Development Fund and the important items are road bridges over the Trimmu and Sidhnai Headworks (Rs. 6½ lakhs) and reconditioning of certain miles of Class II metalled roads (Rs. 9 lakhs). Another important item, although involving very little expenditure (Rs. 6,190), is the opening of civil engineering classes in the Maclagan Engineering College. This will in reality effect a saving of Rs. 34,500 in the subsidy at present paid to the United Provinces Government for the training of Punjab students at the Thomason Civil Engineering College, Roorkee.

**Capital expenditure.**

33. Capital expenditure in 1939-40 is estimated to amount to 1,68 lakhs compared with 2,36 lakhs in the revised estimates of the current year.

Under Irrigation there is a decrease of about a crore because of less expenditure on the Haveli Project. It is anticipated that expenditure on this project during the next year will amount to 72 lakhs against 1,92 lakhs in the current year because construction will be practically completed this year. The new budget provides for the construction of some of the distributaries and watercourses, for maintenance of head-works, for lining a portion of the main canal which remains to be completed, and for the payment of compensation for land acquired for the project. The decrease in Haveli is, however, counterbalanced to the extent of 52 lakhs by an increase in capital expenditure on open canals. Besides the drainage works which could not be undertaken this year new irrigation works costing about 8 lakhs will be executed next year. The important new works are the reconstruction of Jaba level crossing (Rs. 5 lakhs), constructing Isharke branch drain (Rs. 27,000), constructing Sago branch drain (Rs. 14,000), remodelling an extension of the Akalgarh-Saidnagar drain (Rs. 25,000), and constructing a railway bridge at R. D. 303,000 of the Maduana drain.

The capital expenditure on Hydro-Electric schemes is estimated at 50 lakhs. It exceeds the revised estimate of the current year by 30 lakhs. Expenditure on the Sialkot-Gujranwala-Lyallpur project is responsible for this increase.

Under Commuted Value of Pensions an increase is expected due to more demands on account of the commutation of pensions but it is partly set off by a decrease under " Deduct—Capital portion of equated payments out of revenue" in consequence of larger recoveries from revenue.

**Loans and Advances by Government.**

34. In the next year's budget provision is made for advances to the extent of 68 lakhs against 75 lakhs in the revised estimate of the current year. The decrease of about a lakh under the Land Improvement Loans Act is counterbalanced by an increase of half a lakh each under the Agriculturists' Loans Act and Co-operative Societies Act. The loans to municipalities have dropped by about 7 lakhs because the Lahore Improvement Trust will be taking a loan of 13 lakhs next year against 20 lakhs this year. Forty-two out of 68 lakhs are for *taccavi* loans and 38 lakhs is the provision for the famine areas.

Recoveries are estimated at 18 lakhs and are less by about 1 lakh compared with the revised estimate of the current year in spite of the fact that the credit on account of loans written off will be larger next year. The drop appears under the Agriculturists' Loans Act where there should have been an increase as a result of the large advances made during the current year. The prospect of recoveries does not seem to be bright in view of deficient rainfall this winter and continuance of famine conditions in the south-eastern districts.

**Transactions under (a) Debt, (b) Deposits and Advances, and (c) Remittance heads.**

35. The net effect of transactions under these heads is estimated to be 19 lakhs to the good. The transactions relating to the State Provident Funds are expected to result in a surplus of 22 lakhs. The Famine Relief Fund shows a net credit of 2 lakhs owing to the recoupment of the fund undertaken with effect from the next year. There is also a net credit of 12 lakhs in Depreciation Funds—11 lakhs in the depreciation fund for Hydro-Electric Schemes and 1 lakh in the depreciation fund for the Punjab Bonds.

Receipts from Civil Deposits are expected to exceed the outgoings by 8 lakhs. These credits are counterbalanced to the extent of 26 lakhs by withdrawals from the Special Development Fund, the Central Road Development Fund and the Rural Areas Improvement Fund. The outgoings in the Suspense accounts exceed the receipts by 2 lakhs but the net effect has been reduced to 1 lakh due to excess of recoveries over outgoings of advances not bearing interest. The transactions relating to Loans from the Central Government show a net debit of 1 lakh. The remittance transactions show a surplus of 3 lakhs.

Conclusion.

36. The year 1939-40 is expected to open with a balance of 1,22 lakhs and to close with a minus balance of 71 lakhs, but in considering this minus balance it must be remembered that the budget provides for expenditure on Famine Relief 39 lakhs, Loans and Advances amounting to 50 lakhs more than recoveries, and capital expenditure to the extent of 1,68 lakhs mostly for productive irrigation or Hydro-Electric schemes and residential buildings which are remunerative. In the past it has been possible to meet part of the capital expenditure from extraordinary receipts. For instance expenditure on the Haveli Project up to the end of 1938-39 is expected to be 2,54 lakhs but only 1,15 lakhs has been met from loans so far. In 1939-40 the entire extraordinary receipts have been utilized towards meeting the anticipated deficit in the revenue account. The capital expenditure will, therefore, have to be met from borrowed money but there is no objection to borrowing for productive projects.

As has been explained above the anticipated deficit in the revenue accounts of 1938-39 and 1939-40 is entirely due to famine which not only results in increased expenditure but also in reduced receipts. The expenditure is, however, non-recurring and decrease in receipts, transitory. It cannot be said that ordinary revenue expenditure has permanently outgrown ordinary revenue receipts. So long as this does not happen the province will remain fully solvent. The fact that in the Punjab there has been a surplus in the revenue account since 1933-34, with the exception of 1935-36 when there was a small deficit of 2 lakhs, shows that the province is in a stable financial condition in that it has been able to meet its ordinary revenue liabilities from its ordinary revenue receipts. The expected deficit in the two years is therefore not a matter for very great despondency. A good year like 1937-38 is capable of wiping off a major portion of the loss anticipated in 1938-39 and 1939-40. The need for economy is, however, apparent and every endeavour will be made to keep the expenditure below the budgeted provision.

## PART II.

### GENERAL.

**Review of the Annual Report on the Administration of estates under the Court of Wards in the Punjab for the year ending 30th September, 1937.**

THE report for 1936-37, can be very briefly reviewed as it presents no striking new feature. But it is well to emphasize once more the magnitude of the interests committed to the care of the Court of Wards in the Punjab. The court is responsible for the management of 67 estates with an area of 653,000 acres, an income of 18½ lakhs and assets of nearly 5½ crores. The report shows that this responsibility continues to be well discharged. The best evidence of this is that total liabilities have been reduced from 86½ to 60½ lakhs and over 8 lakhs of debts have been paid off. Moreover, three estates have been released with substantial balances, in one case amounting to nearly 19 lakhs as against an initial debt of Rs. 5,000.

2. Some interesting figures are given in the report regarding the return from land. On 225,369 acres of cultivated land the *gross* income (less land revenue) averaged only Rs. 3-13-0 an acre. The Financial Commissioner points out that if the average value of this land is put at only Rs. 150 an acre, the return amounts to little more than 2½ per cent and he estimates that in that case the *net* return would probably be round about 2 per cent. As he

GGP

justly remarks, these figures suggest that the return from land is substantially lower than the return from most other forms of investment.

3. The Financial Commissioner observes further that with more efficient tenants and with a wider use of improved methods of cultivation this return could be considerably increased. But as he also notes, this is easier said than done; for, firstly, Punjab custom is in general against the ejection of tenants not glaringly inefficient, and secondly, most tenants are small holders and must necessarily fight shy of change until convinced that it is really an improvement. The almost universal illiteracy in this class of cultivator is an added difficulty. As the report shows, however, changes are gradually being introduced, and the process is likely to receive a useful impetus from the questionnaire about rural reconstruction activities, which has now to be submitted with the annual report of every estate. The Financial Commissioner rightly insists in this connection that it is the clear duty of every manager to do everything in his power to promote the welfare of the estate and tenants for which he is responsible and so set an example to other landlords in the neighbourhood.

4. An essential way of promoting the welfare of an estate is to see that those who will have to control it in future are properly educated. It is satisfactory, therefore, to find that out of *142* wards and dependants all but *52* are at school or at college. The Punjab Government is particularly glad to find that the number at the Aitchison College has gone up from 14 to 19. There are 11 others at degree and intermediate colleges, and 14 at the Queen Mary College.

5. Government notes with pleasure the commendation bestowed on the Deputy Commissioners and managers mentioned in paragraph *18* of the report. It only remains to add that Mr. M. L. Darling, C.I.E., I.C.S., was in charge for eleven months of the year and Mr. C. C. Garbett, C.S.I., C.I.E., C.M.G., I.C.S., for the remaining month.

## PART II.

### GENERAL.

**Review of the Annual Report on the Punjab Colonies for the year ending 30th September, 1937.**

*Proceedings of the Governor of the Punjab No. 1425-C., dated 11th March, 1939.*

THE Punjab Colonies now cover an area of 4,545,973 acres. Their population in 1931 was about 5,500,000 and 35 towns located at appropriate distances from one another to serve as markets have grown up. The whole forms perhaps the largest Government estate in the world and all has been developed in little more than forty years.

The most recent tract to be colonised is that known as the Nili Bar lying between the Sutlej or Nili river and the so-called old bed of the Beas in the Multan and Montgomery districts. The first colonists reached this area in the year 1926-27 and have been pouring in as more and more irrigation has been being provided for the scrub-covered desert which has rapidly attained a fertility equal to that of the older colonies. This colony has now reached the stage at which it became necessary, in the light of the experience of the past years of its existence, to re-adjust the scheme upon which its development had been planned. For this purpose His Excellency the Governor summoned a conference of officials most closely connected with the colony. Since the colony began prices have

fallen and the decisions of the conference in lowering the rate of *malikana* or rent and in imposing the sliding scale system of land revenue assessment reflect the less prosperous conditions which now prevail. Important decisions with regard to the future administration of this newly populated tract also were taken ; but much must remain to be decided at settlement which is to be begun from the autumn of 1939.

2. In this report notice is for the first time taken of the effects of the system of short-term leases which in default of anticipated sales Government had been compelled to adopt to pay the interest on the capital expended on the canals. As the report notices, these leases were held, by a comparatively few lessees, considering that the area involved was nearly three lakhs of acres. Many of the latter were drawn from the commercial classes, who acted as middlemen between Government and the actual cultivator.

The system undoubtedly produced, as the figures in this report show, satisfactory financial returns ; but whether the returns, for which to a great extent the cultivator and the land itself must pay, are the most fruitful method of development is far from certain. Subsequent history has shown that the problem needs urgent attention which it is now receiving.

3. In its relation as landlord with its tenants in the Punjab colonies Government has always insisted upon a certain standard of neatness and cleanliness particularly in the home of the colonist. Villages and towns must be built upon a set plan and Government has always set store by the tidiness of the Punjab colony village or *chak* and by the planting of trees. To enforce more detailed rules is impracticable ; but such rules as exist offer a fruitful field for the rural reconstruction activities upon which Government has in recent years laid much emphasis. Nor has response been lacking and it is gratifying that to gain the privilege of becoming occupancy tenants colonists are ventilating their houses, using good seed and conserving their manure. It is believed that in more prosperous colonies the advantages of good seed are already very generally appreciated without any official propaganda.

This report shows that it is not only in villages that special care is required, owing to the position of Government as landlord for the health of the population. Many of the colony towns are out-growing the plans upon which they were designed and far seeing plans for drainage and layout are urgently required in many places to keep pace with building activity. Municipal authorities, it is feared, all too frequently fail to appreciate their responsibilities in this matter.

4. Finally, there is the grave problem of waterlogging which, if unchecked, might sooner or later reduce much of this most fertile land to a malarial morass or, where *thur* is prevalent, to complete sterility. The problem admits of no easy or rapid solution. Remedial measures, the chief of which is the construction of drains, can hardly yet be said to be

keeping pace with the spread of salts in the soil and the rise of the water-level in certain tracts. Nevertheless, Government is fully alive to the dangers and has added much to its experience in combating them. Schemes for drainage and reclamation are being pushed on with vigour and the possibilities of lining canals to prevent seepage are being explored afresh.

5. The above may be said to be the most outstanding general features of the colonies at the present time. It remains to notice briefly the particular circumstances of the year under report. Both the *kharif* and the *rabi* harvests were fair and prices not unfavourable but not of course to be compared with the boom period of 15 years ago. The most serious set-back was a disastrous hailstorm which caused widespread damage to the *rabi* crop just as it had reached maturity. Immediate and energetic steps were taken by local officers to ascertain the extent of the damage and remissions amounting to Rs. 15 lakhs were granted to relieve distress.

The Punjab Government has much pleasure in associating themselves with the Financial Commissioner's commendation of the prompt action of local officers in dealing with this calamity as well as with that of all other officers who were responsible for the administration of the Punjab colonies and who are especially mentioned in this report.

The office of Financial Commissioner, Development, was held for eleven months by Mr. M. L. Darling and for one month (July 25 to August 25) by Mr. C. C. Garbett.

---

*Order.*—Ordered that the above remarks be printed and circulated with the report; also that they be published in the *Punjab Gazette*, be communicated to Chief Engineer, Irrigation Works, Punjab, the Agent, North-Western Railway, the Inspector-General of Police and submitted with two copies of the report to the Government of India, Department of Education, Health and Lands.

By order of the Governor,

M. L. DARLING,

## PART II.

## GENERAL.

### THE ANNUAL ADMINISTRATION REPORT ON PANCHAYATS FOR THE YEAR 1936-37.

**Proceedings of the Punjab Government in the Local Government (Panchayats) Department, No. 7706-Bds.-38/13949, dated 11th April, 1939.**

READ—

The annual Administration Report on Panchayats for the year 1936-37.

Number. The total number of Panchayats, during the year, was 1,142, as against 1,083 of the previous year. During the period under review, 109 Panchayats were established and 50 were abolished. There was thus a net increase of 59 Panchayats which appears to be a record figure for many years. The increase was mainly in the districts of Rawalpindi (42), Lyallpur (18), Jullundur (9) and Multan (9). The number of Panchayats in Jhelum, Mianwali, Montgomery, Jhang and Dera Ghazi Khan districts continues to be comparatively small, and in Simla, Kangra and Shahpur districts there are no Panchayats at all. In the Ferozepore, Hissar and Rohtak districts, no less than 25 Panchayats were abolished on account of their unsatisfactory working. The Lahore Division continues to maintain its leading position as regards numbers as the following statement will show :—

| | |
|---|---|
| Ambala .. .. .. .. | 150 |
| Jullundur .. .. .. | 241 |
| Lahore .. .. .. .. | 368 |
| Rawalpindi .. .. .. | 159 |
| Multan .. .. .. .. | 224 |
| Total .. | 1,142 |

Elections.

In the Ambala Division, with the exception of Rohtak district, all the seats were filled without contest. In the Jullundur Division, the elections were, as usual, not keenly contested. In the Lahore Division, the natural leaders of the villages were generally returned unopposed, and on the whole the elections did not excite much interest. In the Rawalpindi Division, the percentage of voters varied from 36 to 80 per cent in the Gujrat district, and 8 to 14 per cent in the Rawalpindi district. In the Multan Division 97 general elections were held. Of all the seats involved, 12 only were contested, the candidates for the rest being returned unopposed.

Income.

2. The total income, including the opening balance, was Rs. 69,132 as compared with Rs. 62,135 for the previous year. The increase in income was mainly under the heads 'Fines levied under section 24', 'Process Fees' and 'Miscellaneous', which continue to be the main sources of revenue of the Panchayats.

The income from village rate has shown a gradual increase as the following figures will indicate:

| Year. | Rs. |
|---|---|
| 1935-36 ... ... ... ... | 399 |
| 1936-37 ... ... ... .. | 1,136 |
| 1937-38 ... ... ... ... | 1,660 |

In the Amritsar district, a village rate was levied in three Panchayats as an experimental measure, but nothing was realized as none of the Panchayats had the necessary strength to realize the tax that they imposed.

The Deputy Commissioner, Gurdaspur, reports that the business community of Sukko Chak, Kalanaur and Kanjrur levied 'Arhat tax' on all goods imported and sold within the limits of these estates, and placed the income derived thereform at the disposal of the Panchayats for the improvement and sanitation of the villages.

Expenditure.

The expenditure increased from Rs. 27,533 to Rs. 32,837, the largest item again being 'Other Expenditure'. The expenditure on 'Public Ways and Drains', under section 14 (1) (*a*), showed a 50 per cent. increase over the previous year's figures. This is a welcome feature, as it results in impoved sanitation and cleanliness in the villages. Five Panchayats managed to spend more than Rs. 500 on public buildings, and three others under the head 'Other Expenditure' which means works of public utility such as drains, wells, tanks, etc. In some cases, expenditure was also incurred on the relief of sick and poor, street lighting, libraries and agricultural improvements. It will thus be noticed that, with the increase in their resources, the Panchayats have also proportionately increased their expenditure.

Exercise of administrative functions.

3. The number of notices issued under section 18 (*b*) of the Panchayat Act, *viz.*, on drainage, removal of stagnant water and such like nuisances increased from 321 of the previous year to 1,112. The increase in the number of notices is also noticeable under clauses (*d*) to (*j*) (regulation of pure water, steeping of hemp, dyeing, tanning, excavations, brick kilns and the disposal of carcasses, etc.). The number of notices under section 19, relating to the supervision of Patwaries, increased from 33 to 154, and the number of enquiries about petty officials under section 20, rose from 1 of the previous year to 45. Bikhari Kalan,

a Panchayat in the Jhelum district, issued 663 notices under section 18. Another Panchayat, Joura, in Gujrat district, issued 230 notices under clause (c) of the same section. There were, in all, 11 Panchayats which issued more than 100 notices each.

The Panchayats in the Lyallpur district have evinced an active interest in the improvement of their villages. Seventy-two Panchayats in that district succeeded in getting 2,796 manure pits dug and 10,841 ventilators fitted. The panchayats in the other districts, in the Multan Division, practically confined their activities to civil and judicial cases. Two panchayats in the Multan Division enjoyed the confidence of the public to such an extent that civil suits amounting to Rs. 37,205 were referred to them for arbitration.

On the application of the Bhandana Panchayat, the District Board Rohtak transferred the cattle pound in the village to the local Panchayat. The experiment is being watched by the local officers with interest, as it would be a step forward if Panchayats could manage their own cattle pounds.

Judicial functions.

4. The total number of criminal cases tried was 3,055, of which 930 ended in conviction, as compared with the last year's figures of 2,974 and 651, respectively. The number of civil cases also increased from 12,126 to 13,186. The number of decrees awarded increased from 8,501 to 8,800. The number of suits retried, under section 31-A of the Panchayat Act, decreased from 151 to 31. This shows that some Panchayats have succeeded in winning confidence even of the aggrieved parties. There is, however, a general complaint that the Panchayats depend too much on the official machinery to recover the amounts decreed by them. In the Multan Division this year again, the Deputy Commissioner, Muzaffargarh, had occasion to take action under section 43 of the Act. The suspension orders of the Deputy Commissioner were confirmed by the Commissioner in all these cases.

General.

5. There seems an all round activity as a result of the paid and wholetime Panchayat Officers. It has now been decided to have a Panchayat Officer in each district with Assistant Panchayat Officers in each tahsil (except Simla district). To supervise their work, Government propose to appoint five Divisional Inspectors with a Provincial Inspector as the head. All these appointments will be made shortly, and it may be hoped that the Panchayat system will greatly help in the rural uplift, and secure complete self-government for the villages.

Rawalpindi district is proving congenial soil for the growth and development of these small local bodies. The Commissioner, Ambala Division, remarks:—'The working of the Panchayats is reported to have improved since the appointment of paid officers and is expected to improve still further. The reports also indicate that these officers, besides their own work, have also taken interest in the general rural uplift activities'.

The Commissioner, Rawalpindi, is also optimistic about the future of the Panchayats and says:—'Given a suitable Panchayat Officer and reasonable supervision by the Deputy Commissioner, there is no reason why the Panchayats should not flourish......and play a very important part in the spread of a sense of responsibility in public administration in the rural areas'. Other Commissioners, generally, have taken a dark view, and they consider that official guidance is necessary for their very existence.

It can only be hoped that, in due course, with the spread of education and enlightenment, the defects will be removed and the Panchayats will realise their responsibilities and justify their existence. The repeated visits and frequent encouragement from the members of the district staff, along with the close supervision of the Panchayat Officers, might result in a gradual and steady progress.

The Commissioner, Lahore, has again remarked :—" The usefulness of a panchayat does not necessarily depend on a record of executive action under certain sections of the Act, and a Panchayat, which can persuade all the inhabitants of a village to settle their disputes amicably without resort to formal proceedings, and which can keep a village clean and healthy by giving informal advice and seeing it acted on, would have justified its existence in a far greater measure than one, which could show large records of action taken under the Act, with no practical results"............................................................

' What is required is concentration on the improvement and consolidation of the existing useful Panchayats rather than expansion in numbers, and if this line is followed, it is hoped that the institutions that survive will serve as useful centres for fostering and developing local self-government in rural areas in the province.'

The reports as a whole, are encouraging and the Panchayat system has shown improvement which is mainly due to the appointment of paid Panchayat Officers. With the appointment of the staff mentioned in the beginning of this paragraph, Government hope that the system will receive a new impetus and will, in due course, prove its usefulness to the inhabitants of rural areas.

**ORDER.—Ordered that copies of this review be forwarded to all Commissioners of Divisions and Deputy Commissioners in the Punjab, and be supplied to the Government of India in the Department of Education, Health and Lands.**

**Ordered also, that the review be published in the *Punjab Gazette* and that copies of its Urdu translation be supplied to Deputy Commissioners for the information of the Panchayats.**

LAHORE, FRIDAY, MAY 12, 1939.

## PART II.

## GENERAL.

### REVIEW OF THE REPORT ON THE LOCAL AUDIT DEPARTMENT, PUNJAB, FOR THE YEAR ENDING THE 31st MARCH, 1938.

**Proceedings of the Governor of the Punjab in the Local Government Department, No. 1835-L. G.—Bds. 39—17212, dated the 6th May, 1939.**

READ—

The report of the Local Audit Department, Punjab, for the year ending the 31st March, 1938.

1. The number of accounts due for audit during the year was 557; the number actually audited was 489, and the cost, which is payable by the provincial government, was Rs. 1,87,711.

2. *District Boards.*—Most district boards maintained their financial position satisfactorily, and had adequate balances. The Multan board indeed had a balance exceeding seven and a half lacs of rupees, and has proposed to remit profession tax. At the other end of the scale the Mianwali board was unable to maintain the prescribed minimum balance for the whole of the year; it is (with Simla) the poorest board in the province.

The collection of taxes continues to be unsatisfactory, most boards having had arrears running into thousands of rupees. Longer the arrears of taxes are allowed to accumu-

late the more difficult becomes the work of recovery, and it is noted in this connection that the Gujrat board had during the year under report to write off Rs. 1,39,000 on account of old arrears dating back to 1931 which for one reason or another had become irrecoverable. The Ludhiana, Ambala and Amritsar boards have in s me years failed even to make out their profession tax assessment list before the end of the taxation year. It has been the experience of many years that if resolute arrangements for recovery are not made, district board taxes are always in arrears and have often to be written off eventually. There is, however, no reason why arrears should be allowed. Where boards have borrowed the services of a Government revenue official as their tax officer, there has as a rule been much improvement, and Government trust that all boards which are at present in arrears with collections will consider whether it will not be advisable to apply for the loan of a naib-tahsildar as tax officer. To the objection sometimes raised that the cost of a naib-tahsildar is greater than that of the usual type of district board tax officer, the answer is that the cheapness of a collecting agency is no recommendation if the agency fails to collect.

The provincial Government are glad to see from chapter II of the report that some district boards have kept their accounts well; others, however, have not, and Government note that in many cases objections raised at previous audits have not been satisfactorily attended to. Government request that when in future audit reports show either that old objections have not been energetically dealt with or that the current accounts are not being well maintained Deputy Commissioners will consider the advisability of moving the board concerned to take suitable action within a reasonable period against the officials responsible. Should a board fail to take appropriate action, it is desirable that Deputy Commissioners should themselves take steps under section 27 of the Act under which in suitable cases they are authorized to require a board to dismiss any of their servants who are unfit for their employment.

3. *Municipal Committees.*—The general mismanagement of municipal affairs in the province extends to the spheres of finance and accounts. The main source of income is terminal tax or octroi which from its nature does not admit of arrears. Some municipal committees, however, levy house tax while there are wheel taxes and the like in most municipalities: the examiner states in Chapter III of the report that in the case of these taxes assessment as well as collection is as a rule unsatisfactory, and Government know that to be true. Delays in assessment are usually to be ascribed to negligence on the part of the municipal staff while delays in the confirmation of assessment lists are, as the examiner states, the result of insufficient interest on the part of members. Delays in recovery are as a rule the fault both of the municipal establishment which fails to bring arrears promptly to notice, and of members who are often unwilling to enforce the simple recovery procedure prescribed by the Municipal Act.

No great improvement in the type of municipal commissioner who is at present returned can perhaps be expected until with the spread of education the people begin to desire an honest and efficient administration and to feel disposed to pay for them. Where by reason of the indolence of municipal commissioners or their feuds, municipal affairs have

fallen into chaos, committees are suspended if the circumstances are such that the position cannot be restored by the appointment of an executive officer, though such action is no more than palliative.

On the other hand Government believe that it is within their power to improve the quality of municipal employees, and they have recently ordered that no person shall be appointed the paid secretary of a municipality unless he has had previous official experience either under Government or a local body, or has satisfactorily completed a period of training. At the same time proposals are under consideration for amending the rules regarding the qualifications of municipal accountants, and it is probable that Government will in due course apply to the legislature for power to fix minimum educational qualifications for clerks.

As in the case of district boards so in the case of municipal committees Government request that when in future audit reports show either that old objections have not been energetically dealt with or that current accounts are not being well maintained Deputy Commissioners will move municipal committees to take effective action against those concerned. Where a municipal committee fails to take such action within a reasonable period, Government would be glad to consider proposals under section 41 of the act for the exercise of their own powers of punishment and dismissal.

4. *Small town committees and notified area committees.*—The finances and the accounts of these local bodies are discussed in Chapter IV of the report. Generally all the defects to which attention has been drawn in the case of municipalities are present, and Government request that Deputy Commissioners will in future on the reciept of unfavourable audit reports take steps under the relevant sections of the acts to secure the removal of incompetent officials where the committee itself is not prepared to take action. In the case of notified area committees, the members of which are all appointed, Government will also in future be prepared to remove from office members who are shown not to be paying attention to their duties.

5. *Court of Wards Estates.*—It is satisfactory to note an improvement in the financial condition, the upkeep of accounts and in the recovery of arrears of the Court of Wards Estates. The ward rate was again generally credited late and the budgetary control was defective. The report mentions instances of short or non-accounting of land produce in one estate while in another estate officials are reported to have retained money in hand unnecessarily. Government hope that the Financial Commissioners will not allow such irregularities to occur again. The financial position of some of the estates whose liabilities are reported to be much in excess of their closing balances require close attention.

6. *Judicial Department Accounts.*—The report reveals several irregularities in the various accounts of the Judicial Department. The more important are the lack of control on the undisbursed money remaining with the process-servers in the Sheriff's petty accounts in some districts, delay in the drawal of interest on investments and late realization of investments in the Guardian and Wards accounts, excess

drawal of administration charges in the Insolvency accounts and the failure of the Official Receiver, Ferozepore, to take suitable and prompt action towards the administration of estates in his charge. It appears necessary that all concerned must take immediate action to avoid recurrence of these irregularities.

7. Government take this opportunity of expressing their appreciation of the work done by Mr. K. L. Dargan, Examiner, Local Funds Accounts, and his saff under the guidance of the Accountant-General.

ORDERED that the Review be published in the *Punjab Government Gazette* and a copy of it be forwarded to all Heads of Departments, the High Court of Judicature and Deputy Commissioners in the Punjab, for information.

By order of the Governor of the Punjab,

AMIN-UD-DIN,

Secretary to Government, Punjab,

Medical and Local Government Departments.

### GENERAL.

REVIEW OF THE ANNUAL REPORT ON THE EXCISE ADMINISTRATION OF THE PUNJAB FOR THE YEAR 1937-38.

**Proceedings of the Punjab Government in the Department of Revenue (Excise) no. 2458-Ex., dated the 24th May, 1939.**

READ—

The annual report on the Excise Administration of the Punjab for the year 1937-38.

Income and expenditure.

Financially, the year, 1937-38 was an improvement on its predecessor, yielding a net profit of Rs. 95,61,072 or 4½ lakhs more than that of the preceding year, and the highest since 1931-32. On the other hand the cost of administration fell from Rs. 5,26,578 to Rs. 5,24,661 thereby reducing the already low percentage of expenditure to gross income from 4·7 to 4·5. Principal contributions to the increase in revenues were under the heads of country spirit and charas. Duty was raised in both cases, with results anticipated, and further comment is unnecessary.

Rewards.

2. The figures of expenditure are remarkable chiefly for a reduction in the cost of rewards. Government do not view the reduction under this head, from Rs. 57,399 to Rs. 51,481 with parti-

cular approval. It cannot be seriously doubted that illicit distillation is still practised extensively. During the year under report, 256 stills were captured and of the persons prosecuted, 978 were convicted. In view of the public sympathy for the illicit distiller and of the reluctance of village functionaries to report excise offences, detection is almost impossible without the aid of informers. An informer may occasionally be actuated by enmity, but more often he is actuated by love of profit. In the event of discovery, he runs no little personal risk. In order to attract him, therefore, rewards should be commensurate with the risk involved. Government trust that Deputy Commissioners will bear this in mind and reward reliable information liberally enough to produce the best results.

Raids.

3. Government note with interest the number of successful raids carried out by the Montgomery district excise staff. One such raid led by Mr. M. S. A. Baig, Sub-Divisional Officer, Pakpattan, resulted in the seizure of 40 maunds of lahan and 11 seers of illicit liquor. Government agree with the view expressed by the Financial Commissioner that the difficulties in the way of detection are not insurmountable and that the example of Montgomery shows what can be achieved by proper direction and careful planning. The number of stills captured was highest in Lahore (45) and Ferozepore (24) and the number of persons convicted also highest in Lahore (185), followed next by Amritsar (101). In bringing only 29 offenders to punishment for 24 stills seized, the Ferozepore authorities have set a rather unsatisfactory example. But with allowance for the elusive character of these offenders, the results are not bad.

Consumption.

4. Consumption of country spirit in the province fell from 415,866 L. P. gallons in 1936-37 to 409,844 L. P. gallons during the year under report. Allowing for the fact that last year's figures were unduly inflated by large purchases on the part of candidates for the provincial elections for the benefit of voters, sales appear to be normal. For some years spiced spirit had been growing in popularity and its consumption was on the increase. In furtherance of the Government policy to secure the maximum of revenue and the minimum of consumption, the rate of still head duty on this spirit was raised from Rs. 6-4-0 to Rs. 6-14-0 with effect from the 1st April, 1937. This step has been entirely justified by results. Consumption has decreased from 338,273 to 330,683 L. P. gallons, but receipts from duty have gone up from Rs. 21,14,206 to Rs. 22,73,446. On country spirit as a whole consumed in the province the increase in still head duty is from Rs. 48,77,018 to Rs. 51,39,168. The success thus achieved in improving revenue without increasing consumption is a matter for no little satisfaction.

Part (C) of the report deals with opium, in regard to which some important changes occurred. Hill opium had long competed with excise opium, thereby affecting revenue in several ways. Production of hill opium in the Punjab was accordingly stopped in 1936 and sale prohibited as from the 1st April, 1937. It was anticipated that consumption of excise opium would rise in consequence, but actual results have been different as stated

in the report. "Excise opium has done more than merely replace hill opium, 1,692 more seers having been consumed during the year than the combined consumption of excise and hill opium during 1936-37". This increase, and the enormous rise in the consumption of "poppy-heads" show to what extent contraband opium was being used in the province. There was an increase during the year in revenue from opium, amounting to Rs. 2,10,000.

It is noted in the report that the stock of unsold hill opium surrendered by the ex-licensees at the end of the year remains undisposed of. This case has, however, since been settled.

In the matter of hemp drugs, charas is of critical importance in view of its uncertain supply, though it still yields a substantial revenue. During the year, duty on *charas* was also raised from Rs. 20 to Rs. 40 a seer. Though the consumption fell from 17,654 seers to 10,694 seers, revenue from duty rose from Rs. 3,46,189 to Rs. 4,55,952.

There is nothing particular to record under the heads of beer, foreign spirit, and medicinal or commercial preparations with a basis of rectified spirit. But as a consequence of an increase in the rate of permit fee on denatured spirit from Re. 0-8-0 to Re. 0-12-0 from the 16th June, 1937, income from this source rose from Rs. 60,835 to Rs. 79,908.

The Punjab Government congratulate the Financial Commissioner on instituting changes, which have resulted so profitably without any relaxation of principle.

Sources of supply.

5. In the matter of liquor supply, the Amritsar Distillery retained its position as the principal suppliers of country production. Out of a total gallonage of 5.09 lakhs issued for consumption within the province this establishment supplied 3·30 lakhs. The issues from Karnal also increased, while those from Rawalpindi fell slightly, compared with the figures of the previous year.

All charas consumed in the province originates from Central Asia. On account of disturbed political conditions there, a speculative situation has arisen regarding continuance of supplies, as well as prices. This has in turn necessitated careful husbanding of the available stock. "The Punjab Government", to quote part D of the report, "as the administrative authority of the area, which serves as a distributing centre to the rest of India, has had therefore to take measures to restrict the issue of charas, both within and outside the province, to legitimate demand, calculated with reference to average monthly sales within a selected period. It has also sought to check local consumption by raising, with effect from the 1st April, 1937, duty on charas from Rs. 20 to Rs. 40 a seer, and the wholesale price, which during 1936-37 ranged round Re. 1-6-0 to Rs. 5-8-0 a seer. The result has been an all round decline in consumption". The effect in the Punjab has already been noticed.

For the supply of charas to retail licensees, the contract area system continued in force throughout the year. The system has been abolished with effect from 1st April, 1938, so that vendors are at liberty to purchase charas from any licensed trader in the province. To safeguard the interests of retail licensees, however, the maximum

rate for supply of charas was fixed at Rs. 4-8-0 a seer f. o. r., Hoshiarpur and Rawalpindi.

Temperance and prohibition.

6. There has been practically no organized move on the part of the public for the introduction of prohibition, and the only temperance society—The Punjab Temperance Federation of Amritsar—appears to have contented itself with the issuing of occasional protests against the grant or renewal of licenses in certain places. In the session of the Punjab Legislative Assembly held in March, 1938, a resolution was passed favouring its introduction as an experimental measure, in five districts of the province. The Government has since been actively engaged in working out details of the scheme with a view to its introduction from the 1st April, 1939. But the severe famine conditions now prevailing in certain parts of the province, combined with the necessity for pressing forward a widespread scheme of development, upon which the Government had embarked, have confronted the Government with serious financial difficulties, which the loss of revenue involved in a policy of prohibition, combined with the cost of enforcement, would only serve to increase. In the circumstances the Government have been compelled, with much regret, to postpone further consideration of this question until the financial position has eased.

Boards and Conferences.

7. The Punjab Excise Board was unable to meet during the year. This Board was constituted in 1923 with a view to the assimilation of excise policy in the province and adjacent Punjab States. Since its inception, the Board has met once nearly every year with advantage to all concerned. Questions affecting excise policy are discussed with the accredited representatives of the States and decisions taken. These are, however, not treated as finally binding upon the Punjab Government or the States, but form the basis of subsequent action by the administrations concerned. The annual conference with the distillers was held on the 28th October, 1937. These meetings have also been found to be of great use, and Government has pleasure in recording that its relations with the States and the distillers were cordial as ever.

The Punjab Government appreciate the good work done by the excise staff and other officers mentioned by the Financial Commissioner in paragraph 31 of the report. The Financial Commissioners in charge of the department during the year were successively Mr. Alma Latifi, Mr. C. C. Garbett, and Mr. B. H. Dobson. To each of them the Government are indebted for the satisfactory results recorded in this report.

B. H. DOBSON,
Secretary to Government, Punjab,
Revenue Department.

## PART II.

### GENERAL.

**REVIEW OF THE REPORT ON THE PUBLIC HEALTH ADMINISTRATION OF THE PUNJAB FOR THE YEAR 1937.**

**Proceedings of the Punjab Government in the Public Health Department, No. 413-M.-39/21238, dated 17th June, 1939.**

READ—

The report on the Public Health administration of the Punjab for the year 1937.

I.—VITAL STATISTICS.

The population of the province contiaues to increase, the estimated mid-year population for 1937 being 26,000,000 as against 25,500,000 in 1936. As the Director states, this annual increase raises questions with respect to standards of living and the economic development of the province which deserve consideration, and Government propose now to examine them.

II.—PRINCIPAL DISEASES.

*Fevers.*—The number of deaths in the province during the year from all causes was 556,000, of which 376,000 were recorded as deaths from fever as compared with 374,000 in 1936. The term 'fever' includes however a considerable group of diseases of which the predominant symptom only is fever, e.g., malaria, enteric, tuberculosis and influenza,

GGP

and as the Director explains, reports as to the diseases which may have caused death in particular cases cannot be regarded as accurate. Inaccuracies are in fact to a large extent inevitable in the rural area where there are at present few doctors to diagnose the exact nature of a disease but Government note that the Director is doing what he can to ensure more accurate classification.

*Small-pox.*—The province is never entirely free from smallpox. The disease does not as a rule assume serious epidemic form but it shows a tendency to increase every few years; there was, for example, a severe epidemic in 1932, and a further epidemic though of lesser intensity has to be recorded in 1937. In 1936 there was 6,000 cases with 2,500 deaths, and at the same time three and a half million vaccinations and revaccinations were carried out. In 1937 there were 10,000 cases with 4,000 deaths, and five and a half million vaccinations and revaccinations were carried out. During the two years therefore the number of persons vaccinated was eight millions which is nearly a third of the total population of the province but the disease showed a further increase in 1938 though exact figures for that year are not yet available. As regards the 10,000 cases which occurred in 1937, the number of villages infected was 1,350 as compared with 1,000 in 1936. Of the 4,000 deaths in 1937, 1,500 were of infants below one year of age, and 1,800 of children between the ages of 1 and 10. The figures seem to indicate that still greater effort is needed to ensure the vaccination of infants as soon as possible after birth, and Government would be grateful if the Director would give this matter his attention. They also suggest that further revaccinations in the early years of life are necessary: under the present act local bodies are only empowered to make primary vaccination compulsory, the Director has, however, submitted proposals for an amendment of the law so as to enable any local body which may wish to do so to make revaccination compulsory, and these are being examined.

*Cholera.*– Cholera is a disease of which a number of cases occur every year, and when streams or wells are infected it sometimes spreads with great rapidity. In 1936 there were 2,700 cases with 1,700 deaths. It is however, satisfactory to note that during 1937 there were only 184 cases with 105 deaths. As usual the infection was in an appreciable number of cases imported from outside the province, particularly from Hardwar.

*Plague.*—Plague is a disease from which the province has suffered much in the past. Wherever the disease has appeared mass inoculation has been undertaken; at the same time the public health department have for many years conducted a compaign against rats (the carriers of the disease) in areas in which the disease has constantly appeared. In 1936, only 153 deaths from plague were recorded, and in 1937 (for the first time after 40 years) no cases at all occurred in the province though 4 were imported from outside. The Director states that the factors which have caused this at one time most dreaded of all pestilences to disappear from the province (temporarily at any rate) cannot be determined. Possibly as the Director suggests the rat population is developing a natural immunity to the disease; it must also of course have been reduced by the destruction campaigns of late years.

*Tuberculosis.*—Very little is known about the incidence of tuberculosis in the province except that it is believed to be considerable. The people as a rule are not inclined to take notice of the disease in the early stages when it may be curable, and death when it occurs may be recorded as from fever or one of the respiratory diseases. As a matter of interest it is noted that during 1937, 5,000 deaths in the province were returned as on account of tuberculosis as compared with 4,800 in 1936 but the true figure is probably higher. The main causes are over-crowding and bad housing conditions combined with wrong nutrition and unhygienic ways of life. While what it has seemed possible to do to deal with the tuberculosis question has been done in the past, no concerted attack

has been instituted against the disease partly no doubt on account of the magnitude of the question and the difficulty of knowing where to make a beginning. A concerted attack is however now about to be launched on an all-India basis under the auspices of Her Excellency the Marchioness of Linlithgow's Tuberculosis Association of India with its affiliated provincial branches.

*Leprosy.*—A leprosy survey of the province has been proceeding for some years, and has now been completed in 18 out of the 29 districts. 2,000 cases have so far been observed, and the number of special clinics, which serve as both treatment and propaganda centres, is now 106. The 5 leper homes continued their excellent work, ministering to 646 inmates of whom however only a hundred are Punjabis. 264 doctors in the province have now received special training in the diagnosis and treatment of leprosy.

*Hookworm.*—A hookworm survey has also been in progress for some years, and has now been completed in 20 districts. In some as many as 30 per cent of the persons examined were found to be infected, and treatment is now being administered partly at the local hospital or dispensary and partly by special treatment units. Hookworm (like smallpox) is a preventable disease; infection enters the body through the feet from land contaminated by human excreta, and the disease would almost entirely disappear if latrines conforming to hygienic principles were to be generally adopted, alternatively if all persons wore shoes.

*Miscellaneous causes of deaths.*—1,900 deaths in childbirth were recorded during 1937, an increase of 600 as compared with 1936; the Director however believes that the increase is due to improvements in the notification of deaths and classification of causes. Suicides at 530 show an increase of 140, while deaths from wounds at 1,050 show an increase of 130. Other accidents at 5,000 show a decrease of 700 as compared with 1936. Deaths from snake-bite and the attacks of wild beasts were 900 as in 1936, and deaths from rabies were similarly unchanged at 120.

### III.—URBAN SANITATION.

The standard of sanitation in towns remains low. In the larger municipalities which employ a wholetime health officer, arrangements are on the whole as satisfactory as can be expected, regard being had to the insanitary habits of many classes of the people including the common practice of throwing out rubbish into the streets. In the smaller towns, however, which have not the funds either for a health officer or for roadside drainage, conditions are usually deplorable, and as the Director states the 3,000 cases of enteric with a thousand deaths reported from urban areas are almost certainly an underestimate. Insanitary practices could if desired be stopped in urban areas under the existing law; it seems however that public opinion generally is not yet in favour of such a step with the result that few municipal or small town committees enforce the law or their own regulations strictly.

### IV.—RURAL SANITATION.

Before public health conditions in a village can be regarded as satisfactory, the minimnm that is necessary is that the water supply should be safe from pollution, that the inhabited area should be properly drained, and that there should be a system for the regular removal of refuse to a distance; out of the 35,000 villages in the province only 1,960 attain this standard at present but improvement may be expected as education spreads. Propaganda in regard to refuse pits is of course the duty of officers of all departments, and during 1937 the public health staff concentrated their main effort on the provision of a protected water supply in the form of hand pumps, and on drainage. 6,000 new hand-pumps are reported to have been installed in villages during the year

while 450,000 feet of masonry drains were laid down as compared with 260,000 feet in 1936. It is also reported that 600 village sanitary committees were formed during the year, and though the Director notes that few seem to have functioned it is encouraging to see that villagers themselves in different districts subscribed over a lakh of rupees during the year for sanitary works and in addition contributed labour and material.

### V.—Maternity and Child Welfare.

It is probable that there is now no urban area in which there is not a sufficiency of trained dais, and municipal and small town committees are being encouraged to frame bylaws prohibiting practice by untrained women. In the rural area, however, there is still a shortage of trained dais. The women are trained at health centres of which during the year under report there were 89 with 128 sub-centres, the centres being under the charge of lady health visitors who are trained in the Punjab Health School at Lahore at the rate of about 14 a year. As the Director states, however, in section 10 of the report, the demand for lady health visitors exceeds the supply with the result that it has not been possible to open further centres for which funds existed ; it is evident that steps are necessary to increase the supply of lady health visitors, and the matter is one which will be taken up. About 2,000 trained dais are known to be practising in the province, while another 2,000 are at present under training. How many of these women are practising or are likely to practise in the rural area is not stated—it has, however, been mentioned above that there are 35,000 villages in the province. Judged on the population of the province the number of deaths in childbirth, recorded during 1937 (1,900) is not as a matter of faht excessive and might in the conditions of villages have been greater; it is, however, probable that the health of a great many women suffers from inexpert attendance at the time of confinement, and of course the death rate amongst small infants is distressingly high.

### VI.—The Pure Food Act.

The act was in force during the year in 71 urban areas. It does not however appear from section 13 of the report that much effort was made to work it except in Lahore, Amritsar and Rawalpindi, and Government trust that other local bodies will pay attention to this important matter.

### VII.—Inspection of Schools and School Children.

The inspection of schools is an important duty of the officers of the department. There are probably few schools, certainly outside the large towns, in which sanitary conditions generally and water supply are really good, and the expense to local bodies if a high standard were to be insisted on would be very great. The medical inspection of school children is still in the experimental stage, and here again the difficulty in arranging for defects noted to be regularly treated is for a number of reasons considerable. During 1937 the further experiment was started of supplying milk in certain schools to those children who being sickly or undernourished may be most in need of it : Government understand that a not unsatisfactory beginning has been made, and they would be grateful if the Director could notice the matter in his report of next year.

### VIII.

The department has many critics who see only how much remains to be done in the field of public health. Much admittedly remains to be done and could be done if further funds were available. But in the meantime it is fair to remember that the widespread epidemics of disease which in former times took toll of the province have for years been a thing of the past. Constant vigilance of course is still necessary, and the report shows the methods followed and how the department is discharging its primary duty,—the general improvement of the health of the people and the prevention of all disease.

Colonel Nicol held charge of the department during the year under report, and to him and his subordinate officers Government extend their appreciation of what they regard as a successful year's work. They take the opportunity to thank also the Commissioner for Rural Reconstruction, with his officers, and all those ladies and gentlemen throughout the province who have volunteered their aid in this important department of the administration.

*Order.*—Ordered that copies of this review be circulated with the report, and be furnished with the usual number of copies of the report to the Government of India, also that the review be published in the *Punjab Government Gazette.*

Ordered further that a copy be furnished to the Director of Public Health, Punjab, for information.

By order of the Governor of the Punjab,

AMIN-UD-DIN,

*Secretary to Government, Punjab,*
*Medical and Local Government Departments.*

LAHORE, FRIDAY, JULY 7, 1939.

## PART II.

### GENERAL.

(1) REVIEW OF THE ANNUAL REPORT OF THE CONTROLLER OF PRINTING AND STATIONERY, INDIA, ON THE CONSUMPTION OF STATIONERY IN THE OFFICES OF THE PUNJAB GOVERNMENT DURING THE YEARS 1936-37 AND 1937-38.

(2) REVIEW OF THE ANNUAL REPORT OF THE SUPERINTENDENT, GOVERNMENT PRINTING, PUNJAB, ON THE WORKING OF THE PUNJAB GOVERNMENT PRESSES DURING THE SAME YEARS.

---

**Proceedings of the Government of the Punjab in the Industries and Labour Department, No. 2438-I. & L.-39/22532, dated the 3rd July, 1939.**

REVIEW:

(1) The annual report of the Controller of Printing and Stationery, India, on the consumption of stationery in the offices of the Punjab Government during the years 1936-37 and 1937-38.

(2) The annual report of the Superintendent, Government Printing, Punjab, on the working of the Punjab Government Presses during the same years.

As suggested in the last Review an attempt was made to curtail the allotment for 1936-37 to the level of the actual expenditure of the previous year. The allotment was Rs. 5,16,112 against the allotment of Rs. 5,24,385 and actual expenditure of Rs. 5,10,091 in the previous year. Even so there was a saving of Rs. 26,395 against the saving of

GGP

Rs. 14,294 in the previous year. Of this total, the Reserved Departments were responsible for a saving of Rs. 16,897. Although the allotment is spread over a large number of Departments and Offices, it may be mentioned that the Irrigation Branch of the Public Works Department was responsible for a saving of about Rs. 8,000 while the High Court and the Printing Department on the Reserved side, and the Education, the Buildings and Roads and the Electricity Branches on the Transferred side were responsible each for a saving of Rs. 2,000 and over. While strict control in expenditure is commendable, it is clear that on the whole some Departments did not frame their budgets with due care. In 1937-38 owing to the advent of Provincial autonomy the allotment was increased to Rs. 5,19,970. Savings amounted to Rs. 9,165 only or about 1·8 per cent. Some saving in the case of Departments with a large number of offices under their control is inevitable. Government note with pleasure that in the first year of Provincial autonomy, there has been careful budgeting and trust that the same caution will be exercised in future.

2. The expenditure of the Government Presses was Rs. 4,81,903 and Rs. 4,88,0‑5 respectively, in the two years under review against the expenditure of Rs. 4,97,475 in 1935-36. In view of the considerable increase in work in 1937-38, the increase of about Rs. 6,000 in expenditure over the figure of the previous year is negligible. Indeed it is creditable to the Superintendent that the expenditure of this year is Rs. 9,430 below that of 1935-36. Receipts have steadily fallen being Rs. 1,63,009 and Rs. 1,49,327 in the two years under review against Rs. ‑,71,018 in 1935-36. The decrease is accounted for by smaller sale of other publications and less work executed for the Central Departments and Commercial Departments like the Irrigation Branch of the Public Works Department.

3. Government endorse the remarks of the Superintendent that indents for forms sent by various offices are not prepared with that care which is necessary. The Clearing Office of the Press makes large cuts in the indents on scrutiny ; but some indents are received so late that no proper scrutiny is possible. Owing to want of funds it has not been possible for the Clearing Office staff to go on an extended tour and check the stocks of forms in all the Departmental offices. Even so large surpluses of forms were detected by the touring staff in certain offices. Suitable action is being taken. There is reason to think that more widespread inspections would result in a greater saving on account of cost of surplus stocks of forms and registers than the money actually spent on the travelling allowance of the inspecting staff.

In spite of the best efforts of the Superintendent, stocking of forms of twenty-eight different Departments at headquarters is unsatisfactory owing to the limited accommodation available. Extension of premises at a cost of Rs. 19,000 is urgently necessary, but the proposal has been withheld on account of the present financial stringency.

4. In the Book Depôt the number of publications received increased by 12 and 13 per cent. in the two years under review as compared to 1935-36 and the value of publications increased by 11 and 16 per cent., respectively. These increases are largely due to a considerable number of correction slips having been taken on books which were not previously accounted for. The substantial decrease in the number and value of publications distributed free to Govern-

ment Departments is largely due to the reduction in the prices of annual departmental reports. In addition, fewer high priced publications were issued for free distribution. The revenue from sale of publications in 1937-38 (Rs. 53,570) is comparable to the figure for 1935-36 (Rs. 54,653.) The increase to Rs. 66,979 in 1936-37 was largely due to the sale-proceeds of electoral rolls for the Gurdwara and Assembly elections. The income from the sale of Indian Law Reports (Lahore series) has dropped by about Rs. 1,000 per year as compared to 1935-36. There is a decline in the number of subscribers probably due to rival publications having been placed on the market. As the cost remains steady round about Rs. 18,000, there is an increase in loss under this head. This is unavoidable unless the reporting and editorial charges can be reduced. In the last Review it was suggested that as these reports are compiled as much for sale as for use in Courts, an attempt should be made at least to secure a balance between the cost and the income. This does not seem possible.

5. The cost of the Central Jail Press increased from Rs. 1,36,926 in 1935-36 to Rs. 1,41,777 in the succeeding year, but came down to Rs. 1,23,243 in 1937-38. The increase of about Rs. 5,000 in 1936-37 was chiefly accounted for by railway freight. Savings in 1937-38 are substantial under railway freight and capital account items. The payments to convict labour have steadily decreased from Rs. 61,86[illegible] in 1935-36 to Rs. 59,781 in 1936-37 and to only Rs. 54,941 in 1937-38. The expenditure of the Borstal Institution Presses has decreased from Rs. 12,051 in 1935-36 to Rs. 8,591 in 1937-38. The decrease is due to the reduction in the number of inmates employed and to book adjustment on account of capital account and plant. The value of work executed has decreased from Rs. 23,000 in 1935-36 to Rs. 23,000. Nine finally released inmates are still working as compositors and galley proof press-men on the temporary or permanent establishments.

6. Mr. Muhammad Hussain, General Foreman; Lala Ramjas and Lala Radha Kishen, piece-hand compositors; Lala Babu Ram, Computor; Lala Pheru Ram, Reader; Mian Sher Muhammad, Section-holder; and Sardar Mehr Singh, Reader, retired after 45, 41, 40, 40, 37, 34 and 34 years approved service respectively, during the two years under review.

Mr. Abdur Rashid Khan officiated as Superintendent for about eight months. For the remaining period during the two years Mr. Davis, the Superintendent was in-charge of the Government Presses. It is creditable to him that in 1937-38 he managed, without extra staff, the great increase in accounting work consequent on the introduction of the Payment of Wages Act. Government endorse Mr. Davis's appreciation of the work done by the various Heads of Branches and the staff generally.

---

*Order*.—Ordered that a copy of the foregoing remarks be forwarded to all Heads of Departments (except the Accountant-General, Punjab), Superintendent, Government Printing, Punjab, and the Controller of Printing and Stationery, India, and also that the remarks be published in the *Punjab Government Gazette* for general information.

By order of the Government of the Punjab,

S. K. KIRPALANI,

Secretary to Government, Punjab,
Electricity and Industries Departments.

## PART II.

### GENERAL.

**REVIEW OF THE REPORT OF THE CHEMICAL EXAMINER TO GOVERNMENT, PUNJAB, FOR THE YEAR 1938, WITH INSPECTOR-GENERAL OF CIVIL HOSPITALS' REMARKS THEREON.**

**Proceedings of the Punjab Government in the Medical Department No. 2228/166-S.M.-39 / 24086, dated 18th July, 1939.**

READ—

The report of the Chemical Examiner to Government, Punjab, for the year 1938, with Inspector-General of Civil Hospitals' remarks thereon.

*Remarks.*—This year 4,095 cases were examined as compared with 3,871 in the year 1937, giving a net increase of 224 cases. The exhibits examined, however, showed a decrease of 190 from 11,905 in 1937 to 11,715 during the year under report, but this is accounted for by the smaller number of samples of Cocaine received for examination. As usual the increase in cases was mainly in the number of "stain cases". Human poisoning and cattle poisoning showed a substantial decrease. The percentage of detection showed an increase under all human poisoning, cattle poisoning and blood-stain cases. Opium, Dhatura, Arsenic and Alcohol were, as usual, the principal poisons used in

cases of human poisoning ; while in cases of cattle poisoning the poisons used were Arsenic and Strychnine only. Lahore was again responsible for the largest number of human poisoning cases (69) followed by Delhi (39), Phillaur (30), Amritsar (29) and Ferozepore (21); while most of the cattle poisoning cases were received from Lahore Cantonment, Rawalpindi and Lahore, viz., 11, 10, and 8, respectively.

2. Of the 2,406 articles examined under the head "General Analysis", 1,947 were excisable articles. The rest included 72 samples of drugs sent by the Medical Store Depot, 59 samples of ghee, of which only 27 were found to be fit for human consumption and 23 samples of water, of which 18 were found to be fit for drinking purposes.

3. During the year under report a three months' course of lectures by the Chemical Examiner to Police Inspectors has been inaugurated. It is hoped that this training would help them in estimating medico-legal evidence more scientifically at the scene of a crime and in selecting and despatching material for further examination.

4. The thanks of the Government are due to Lt.-Col. D. R. Thomas, O.B.E., I.M.S., and Dr. Udho Ram, P.C.M.S., for the efficient administration of the Department throughout the year.

*Order.*—Ordered that a copy of the review be forwarded to the Inspector-General of Civil Hospitals, Punjab, for information.

Ordered also that the review be published in the *Punjab Gazette* and that a copy of the report, together with Inspector-General of Civil Hospitals' remarks thereon and the review be forwarded to—

(1) the Government of India, Department of Education, Health and Lands, for information ;

(2) the Registrar, High Court of Judicature at Lahore, for the information of the Hon'ble Judges ;

(3) all Commissioners of Divisions, Deputy Commissioners and District and Sessions Judges in the Punjab, for information ; and

(4) the Inspector-General of Police, Punjab, for information.

By order of the Governor of the Punjab,

AMIN-UD-DIN,

Secretary to Government, Punjab,
Medical and Local Government Departments.

LAHORE, FRIDAY, AUGUST 11, 1939.

## PART II.

### GENERAL.

**(1) REVIEW OF THE REPORT ON THE ADMINISTRATION OF THE JAILS IN THE PUNJAB DURING THE YEAR 1938.**

**Proceedings of the Punjab Government in the Home (Jails) Department, No. 2651-J. L.-39/25669, dated the 3rd August, 1939.**

READ—

Report on the Administration of the Jails in the Punjab during the year 1938.

THE total number of prisoners in the jails of the province on an average day in 1938 was 19,760. The population of the Punjab jails reached its peak in 1932, at the end of the civil disobedience movement, when the daily average was 23,184. Since then the decline has been fairly constant. That it should have continued throughout last year, in spite of the fact that crime has been steadily rising, is not easy to explain. Two causes are apparent which have undoubtedly contributed. In the first place, the figure for 1938 was reduced by the release during the later part of the year of a number of prisoners on account of age or confirmed ill-health. A reference to these releases will be made later. Secondly, the measures taken to stimulate the flow of prisoners to the Andamans have not been without effect. In 1932 the number of prisoners volunteering for the Settlement was as low as 31, and in 1934 and 1935 it was still under sixty. In each of the last two years the

figure has been well over two hundred, and the fear that the jails of the province would soon be crowded with transportation prisoners seems likely to be falsified. These two causes, however, account for only a part of the fall in the jail population between 1937 and 1938. For the rest, a likely explanation is that the proportion of cases in which the offenders escape punishment is increasing. Whether this is so will become apparent when the Police Administration Report and the judicial statistics for 1938 come under review.

2. As the Inspector-General has pointed out, the large number of prisoners sentenced to terms of less than one month (6,061) is one of the features of the report. The figure is actually the highest for any year since 1932. It has been swollen, doubtless, by sentences awarded in connection with the revived Shahidganj agitation during the first five months of the year, and later by convictions resulting from the Kisan *morcha* and the strike of textile workers in Amritsar. In cases of this type short sentences are often unavoidable, but Government trust that the pronouncements made in the past regarding the undesirability of sending convicted persons, particularly youthful offenders, to jail for short terms will not be forgotten. The report further shows a distinct increase in the number of prisoners sentenced to simple imprisonment. In the review for 1936 it was suggested that an analysis indicating the class of offences for which simple sentences had been awarded might be found instructive. The Inspector-General will perhaps bear this in mind next year. Attention is also drawn in the report to the figures relating to unconvicted criminal prisoners. The average daily total of such prisoners, 3,674, is considerably higher than for several years past. It is, however, still below that for such years as 1931 and 1932, and if account be taken of the increase in the number of criminal cases sent for trial it does not seem unduly large.

3. Perhaps the most important feature of the year was the release of a number of elderly and infirm prisoners. These releases were ordered by Government, after careful consideration of each individual case, mainly on compassionate grounds. Altogether 450 prisoners were thus ordered to be set at liberty during the year. These releases have naturally had a marked effect on the figures of deaths and sickness in the jails, and in comparing the statistics for 1938 with those of previous years they must be kept constantly in mind. The year was moreover an unusually healthy one throughout the province. Even so, Government cannot but feel satisfaction that the death rate has fallen from 8·66 *per mille* in 1937 (a figure which was itself a record) to 5·75, and the sickness rate from 21 *per mille* to 17. Particularly gratifying is the fact that cerebro-spinal fever, which since 1931 has been endemic in the Punjab jails (it is said to have first come in with the Ahrar prisoners from Kashmir), appears at last to have been controlled. Between 1932 and 1937 the number of cases averaged 38 a year: it has now been reduced to 5. The figures in paragraph 23 of the report, showing the remarkable and continuous fall in the number of dysentery cases in the jail hospitals, are also proof that other causes have been at work to reduce the sickness level, as well as the special releases. A reference should perhaps be made here to the mass hunger-strike of certain convicts in January and February, in connection with a demand for the release of all "political" prisoners. From beginning to end the hunger-strike lasted over six weeks, twenty-three prisoners (in the Old Central Jail at Multan and the Central Jails in Lahore and Montgomery) being involved. The arrangements made for the medical treatment of the prisoners in all three jails were commendable.

4. Measures are to be taken in the near future to enlarge the facilities provided for the education of prisoners. The paragraph

of the report in which these are described contains an interesting history of the action taken in the past, showing that the desirability of providing some kind of education for prisoners in the jails in India was recognised as far back as the middle of last century. Enthusiasts for prison reform are indeed apt to find, when they have an opportunity of studying conditions in the Punjab jails, that many if not most of the changes which they advocate have already been carried out, and that these institutions are by no means as backward as they are sometimes represented. None the less, the officers at the head of the department are constantly on the look-out for opportunities to effect improvements and change methods which are unsuited to the present day. For example, steps have been taken during the last two years to get rid of unsuitable forms of prison labour. In 1937 the employment of prisoners on cotton and wool spinning was extended, in place of the old *ban* twisting; and during the year under report the use of prisoners to work heavy grinding mills and oil presses has been abolished. Several new industries have at the same time been introduced.

5. As a result of the special attention devoted during the last few years to the industrial side of the jail administration—since 1937 a former Jail Superintendent has been on special duty as Supervisor of Jail Manufactures—the outturn of the workshops is steadily improving, both in quality and quantity. In congratulating the Inspector-General and his officers on the results obtained in this direction, Government wish to make it clear that the efficiency of the jail workshops ought not to be judged exclusively, or indeed mainly, on the volume and financial value of their output. The criticism is sometimes made that with better management every prison could be made to pay for itself, the suggestion being that Government should develop the jails on the lines of commercial factories, with power-driven machinery. Such criticism fails to take account of the fact that the making of profits is not the only, or even the primary, object of those in charge of jail factories. The need of finding work which will provide suitable exercise for body and mind, and the desirability of training the prisoners in trades that may be of use to them on release, are considerations at least as important. Moreover, if the department is sometimes condemned for failing to develop the jails as industrial factories, it has on other occasions to face the attack of another set of critics, who maintain that jail products ought not to be put on the market in competition with those of the commercial manufacturer, employing free labour. This is an argument which is certain to be pressed more and more strongly as trade combinations grow in influence. The prison authorities are accordingly devoting special attention to the development of industries which cater for the needs of the various Government departments—the domestic market in which it is universally recognised, even in western countries, that jail-made goods can be used without objection.

6. In the review for 1936 reference was made to a number of schemes which Government had in contemplation for improving the efficiency of the jail establishments and for the elimination of the temporary element whose presence has in the past facilitated corruption in the department. These schemes are well on their way to completion. A great part of the warders' posts in the camp jails which were formerly treated as temporary have now been recognised as quasi-permanent, and a scheme has been introduced under which men will be recruited against them on five year contracts instead of in the old haphazard way. Further, with effect from October next vacancies occurring among warders as the result of sickness, the grant of leave and the like will be filled from a regular contingency reserve instead of by the enlistment of temporary men. It is hoped, if funds permit, to complete the process next year by

the constitution of a similar contingency reserve of Assistant Superintendents. The presence of the temporary element among the staff—men without settled prospects—has been an obvious weakness, and with its removal an important reform will have been accomplished. The year under report also saw the completion of the scheme for providing a regular clerical staff for each jail. Formerly the clerical work was done by the Assistant Superintendents, helped in some cases by temporary clerks: an unsatisfactory and by no means economical arrangement.

7. Lieutenant-Colonel F. A. Barker, C.I.E., O.B.E., I.M.S., who since the report was written has proceeded on leave preparatory to retirement, could probably claim a wider experience of prison work in India than any other official of his day. His term of office as Inspector-General, extending more or less continuously from August 1931, saw many reforms effected in the Punjab prison system, and he himself will be remembered not only as an administrator of unusual ability but for his strong humanitarian sympathies. Throughout his tenure he has had the valuable support of the Deputy Inspector-General, Lieutenant-Colonel N. D. Puri, I.M.S., who has acted as Inspector-General on a number of occasions and who will succeed Colonel Barker on his final retirement. The concluding paragraphs of the report contain acknowledgments of the work done by a number of officers in the department, by name. The Punjab Government gladly associate themselves with these remarks. They wish to add their appreciation of the valuable help rendered to the department by a number of non-officials, both as jail visitors and as members of the Prisoners Aid Societies.

---

ORDERED—That a copy of the report with the review thereon be forwarded to the Home Department of the Government of India. Also that a copy of the report and the review be forwarded to the Registrar of the High Court of Judicature at Lahore for the information of the Honourable Judges; and that the review only be forwarded to the Inspector-General of Prisons, Punjab, for information and guidance.

ORDERED also that the review be published in the *Punjab Government Gazette.*

By Order of the Governor of the Punjab,

A. V. ASKWITH,

*Home Secretary to Government, Punjab.*

(2) REVIEW ON THE REPORT ON THE OPERATIONS OF THE DEPARTMENT OF LAND RECORDS FOR THE YEAR ENDING 30TH SEPTEMBER, 1938.

**Proceedings of the Government of the Punjab in the Revenue Department No. 2943-E, dated the 3rd August, 1939.**

READ :—

Report on the operations of the Department of Land Records for the year ending 30th September, 1938.

THE Director of Land Records had a busy time throughout the year owing to expansion in the activities of the department. He made a special report on the condition of maps and records of the Gurgaon district in connection with the resettlement of that district, supervised the difficult work of partition of forest *shamilat* in Murree tahsil of the Rawalpindi district, and inspected the work of consolidation of holdings in the districts of Rohtak, Sialkot and Gujrat. Settlement operations in the Jhelum and Amritsar districts and patwar training schools started in Ludhiana and Jhelum districts also were inspected.

A post of special tahsildar was sanctioned to help him in the inspections, particularly with reference to consolidation and settlement. This officer started his work in March, 1938.

2. At the close of the year there were 1,785 patwari candidates, as against 1,815 at the end of the previous year ; the names of 409 candidates were removed from the register and 379 new candidates were accepted. This total is still 5 per cent. in excess of the prescribed limit of 15 per cent.

Of these 1,785, the educational qualifications of 965 are above the middle standard, 1,223 candidates belong to agricultural tribes and the proportion of agriculturists is not below the prescribed minimum of 50 per cent. in any district.

Two patwar schools were opened during the year, one each at Ludhiana and Jhelum, and 531 candidates were admitted.

3. The total number of patwaris and assistant patwaris was 9,152, of whom 61 per cent. belonged to agricultural tribes. The number of such agriculturist patwaris is, however, below 50 per cent. in the districts of Lahore, Gujranwala and Jhang. As opportunity occurs, the difference is being corrected. Three hundred and seventy-five vacancies occurred as compared with 323 last year. Fifty-four patwaris were dismissed for major and 2,783 punished for minor offences : a testimony to the vigilance of the superior revenue staff.

4. The Governor of the Punjab observes with satisfaction that the improvement made in the accounts of the special provident fund for patwaris last year has been maintained. It is very gratifying to note that in Gurgaon nearly all the patwaris have joined this fund. Government trusts that similar efforts will be made in other districts : and that other Collectors will be as careful to have explained to the patwar staff the benefit of the fund as has been done by the Collector of Gurgaon.

The work of 68 per cent. of the patwaris was checked during the year against 66 per cent. last year. Under the rules the work of each patwari should be inspected at least once a year. There is, therefore, considerable room for improvement.

5. No kanungo escaped inspection and this is satisfactory. Inspection revealed nothing of special note. Of the 149 candidates 70 per cent. are agriculturists.

6. The number of *jamabandis* prepared was 9,647 as compared with 10,179 in the preceding year. The decrease is due to the fact that in the districts of Lahore, Amritsar and Jhelum no *jamabandis* were necessary because of the current settlements. It is regrettable that only 198 *jamabandis* were filed in the tahsils by the due date. Disciplinary action where required is being taken.

Two thousand three hundred and seventy-eight *jamabandis* were attested by Collectors and their assistants. This represents an increase of 160 over the last year's figure. The total number of

*tatima shajras* checked by tahsil revenue officers was 42,087. The revenue officers of Kangra checked the highest number (3,133). This check was adequate in other districts also except in Hissar, Karnal, Sheikhupura, Lyallpur and Jhang.

7. The total number of mutations for disposal during the year was 942,296 of which 790,047, *i. e.*, about 84 per cent. were decided, leaving a balance of 152,249. There are heavy arrears in the division of Jullundur (except Kangra) and in the districts of Lahore, Amritsar, Gurdaspur, Sialkot, Gujrat and Rawalpindi. Checking of mutation work at the time of tahsil inspections has been generally satisfactory. The Collector of Gurgaon checked most, *viz.*, 2,550.

8. Seven thousand six hundred and twenty-seven partition cases were completed, an increase of 672 over the figure of last year. In the districts of Montgomery and Jhang very large areas, *viz.*, 43,782 and 33,907 acres, respectively, were involved. Village notebooks received the attention of Deputy Commissioners in all districts except Sialkot, Ferozepore, Lahore and Jhelum. In Sialkot the settlement notebooks were destroyed by fire. New books are being prepared. In Lahore and Jhelum settlements are in progress. In Ferozepore attention has been drawn to this defect in revenue administration. The Deputy Commissioner, Gurgaon, and his assistants, as last year, are again to be commended for recording remarks in 553 village notebooks, an advance on their good record of 448 last year.

9. With the enforcement of the Punjab Consolidation of Holdings Act many of the difficulties which had hitherto been experienced by the Consolidation staff in the field have been solved. Consolidation was started in Jhelum, thus adding one more district to the list of Rohtak, Sialkot and Gujrat where the work was already in progress. The fact that at the close of the year consolidation operations were in hand in 41 villages involving an area of 32,635 acres and that 117 applications were pending with the Consolidation Officers is a clear proof that the scheme is popular with the zamindars. The area consolidated was 18,471 acres at a cost of Rs. 51,711-11-0. The cost per acre in Rohtak was Rs. 4-7-8, in Sialkot Rs. 2-13-8, in Gujrat Rs. 2-4-0 and in Jhelum Rs. 2-0-7 : and is decreasing. Next year the Revenue Department will be in charge of 7 districts, instead of 4, as extension of the scheme to the districts of Gurgaon, Mianwali and Muzaffargarh has been sanctioned. This is of course in addition to and separate from consolidation under the auspices of the Co-operative Societies.

10. The Governor has read with pleasure the remarks in the report that the patwari staff maintained their former level of efficiency and performed their legitimate duties satisfactorily in spite of the fact that the weight of their work continues to increase. He is pleased to observe the commendation accorded by the Financial Commissioner to Khan Sahib Mirza Muhammad Ihsan Ullah and his assistants for the efficient

administration of the department during the year under review, and gladly acknowledges their good work.

*Order.*—Ordered that a copy of the foregoing be forwarded to the Director of Land Records, Punjab, for information.

Ordered also that the review be published in the *Punjab Gazette*, and be circulated with the report and copies be sent to the Government of India, Department of Education, Health and Lands.

C. C. GARBETT,
*Secretary to Government, Punjab,*
*Revenue Department.*

### GENERAL.

**REVIEW OF THE REPORT OF THE LAND REVENUE COMMITTEE AND THE MINUTES OF THE MEETINGS OF THE COMMITTEE ASSEMBLED BY THE HON'BLE MINISTER FOR REVENUE TO CONSIDER IT.**

**Proceedings of the Governor of the Punjab in the Department of Revenue no. 413-S., dated September 9th/12th, 1939.**

READ—

The Report of the Land Revenue Committee and the minutes of the meetings of the Committee assembled by the Hon'ble Minister for Revenue to consider it.

REMARKS.

THE original copy of the Report of the Land Revenue Committee was signed on the 16th May, 1938. But the finished volume did not reach Government from the Press till the 12th of December, 1938. The report came under the active consideration of Government in consultation with their expert advisers, when they moved to Simla. It was difficult to start detailed consideration earlier owing to the pressure of Assembly business and the great complexity of the problems investigated in the report. The Committee's comprehensive and far-reaching recommendations have now been studied in detail by an official Committee attended both by the Ministers and by the experts of the departments concerned.

2. Some of the most important recommendations, especially those relating to the relief of the small-holder,

are linked with and dependent on problems which have been referred to other Government Committees, in particular the Resources and Retrenchment Committee. When the report of that Committee is available, these recommendations will have to be most carefully weighed. But till then final decisions cannot well be taken.

This applies particularly to the Committee's fundamental finding that the principles of income-tax assessment cannot satisfactorily be applied to the assessment of land revenue. It is clear from the report that this question has been most thoroughly and carefully examined. The Committee's other recommendations also involve the consideration of some highly technical problems, such as the sliding-scale system of granting relief. This difficult question is still being examined by the experts.

3. Government have, however, decided not to delay any longer the publication of the Report of the Land Revenue Committee, as they are anxious to have the views of the Legislature on the general principles involved and wish therefore to give members of the Assembly time to study the report before the Assembly meets for its next session.

4. The Punjab Government desire to take this opportunity of expressing their gratitude to Sir Malcolm Darling and his colleagues and their high appreciation of the meticulous care with which every aspect of the difficult problems referred to them has been considered. They desire also to thank the distinguished experts (including several retired officials) who contributed written statements of their views for the consideration of the Committee. These well thought out and interesting statements have been printed as appendices to the report, which not only covers the questions referred for solution but will remain as a permanent and most valuable contribution to the literature on the Land Revenue System of the Punjab.

---

ORDER.

ORDERED that a copy of these remarks be published in the *Punjab Gazette*.

## PART II.

### GENERAL.

**1) REVIEW OF THE REPORT ON THE WORKING OF HOSPITALS AND DISPENSARIES IN THE PUNJAB FOR THE TRIENNIUM 1935—37.**

**Proceedings of the Punjab Government in the Medical Department, No. 983-M-39/29859, dated the 18th September, 1939.**

READ—

The report on the working of hospitals and dispensaries in the Punjab for the triennium 1935—37.

REMARKS.—In spite of the financial stringency and economic depression the activities of the Medical Department during the triennium 1935—37 were not restricted, but were necessarily directed towards consolidation rather than extension and expansion. The triennium opened with 961 dispensaries (687 in rural and 274 in urban areas) and closed with 968 (693 in rural and 275 in urban areas). The total number of State public hospitals in the Province at the close of the year 1937 was 53 as compared with 51 in 1936 and 50 in 1935. The increase of two was due to the provincialization of three hospitals (*i*) the Civil Hospital, Hoshiarpur, (*ii*) the Tahsil Head quarters Hospital, Phalia, and (*iii*) the Female Hospital, Sargodha, in 1937 and the closure of the Civil Dispensary at Mashobra in the Simla district in the same year. Out of 110 hospitals to be provincialized at district and tahsil headquarters under the 1925-26 scheme

for the expansion of medical relief, only 46 were taken up to the end of 1937. It is intended to provincialize the remaining 64 hospitals as funds permit. It is, however, regrettable that local bodies hitherto responsible for the maintenance of these institutions have in many cases exhibited a tendency to postpone necessary improvements in the expectation that the hospitals will be provincialized before long.

2. There were 364 rural dispensaries including nine subsidized dispensaries functioning in the Province on the 31st December, 1937, viz., 360 out of 375 provided under the 1925 scheme for expansion of medical relief in rural areas, and four maintained by the District Boards of Kangra, Jhang, Montgomery and Muzaffargarh, one each. The difference in the annual cost of maintenance of these two classes of dispensaries is considerable; Government have decided that in future the expansion of medical relief in rural areas should be by means of opening subsidized dispensaries. In 1937 the rural dispensaries in the five districts of Karnal, Hoshiarpur, Lahore, Gujrat and Montgomery, were transferred as an experimental measure to the courtol of the Public Health Department so that medical officers in charge of the dispensaries should do public health work also in their respective areas. That experiment has proved a success and is being extended to one tahsil in each of the remaining districts excepting Simla. As at present organized, a rural dispensary serves only a few villages in the immediate vicinity. To increase the usefulness of these dispensaries and to bring modern medical relief within easy reach of villages, it is essential under present conditions, when very few private practitioners have settled in the rural areas, that doctors in charge of rural dispensaries should periodically visit large villages within their areas. A beginning has been made in this direction and a scheme under which medical officers of rural dispensaries are required to tour in the surrounding villages has been successfully tried in selected tahsils of 23 districts. These medical officers are given a small fixed travelling allowance and are required to visit certain villages within five miles of their headquarters in rotation after their morning dispensary hours.

3. As compared with the last year of the previous triennium 1932—34, the total number of patients treated fell by 165,571 in 1935, but increased by 619,920 in 1936 and by 715,668 in 1937. The decrease in 1935, which was in the number of out-patients only, was due to a lower incidence of malaria in that year. There was, however, a steady increase in the number of in-patients, viz., 6,050 in 1935, 6,956 in 1936 and 16,300 in 1937 as compared with the figures for the year 1934. The principal diseases during the triennium under review were malaria, dysentery, cataract, pneumonia, influenza, enteric fever and tuberculosis. The total number of surgical operations performed rose from 569,671 in 1934 to 592,442 in 1935, 606,720 in 1936 and 630,969 in 1937. This steady increase in surgical work is a sure indication of the growing popularity of hospitals and dispensaries. Government have read with pleasure the names of the medical officers mentioned in paragraph 25 of the report who performed the largest number of surgical operations, mainly cataract extractions.

4. The expenditure of the Department increased from 47 lakhs in the last year of the previous triennium 1932 -34 to 51·17 lakhs in 1937, the increase being mainly accounted

for by the annual increments of the staff and the execution of certain works. It is a matter for regret that the local bodies have not followed the lead given by Government in regard to the charging of fees from well-to-do patients treated in hospitals and dispensaries. There were, however, numerous instances of private charity during the triennium under report in which philanthropic and charitably disposed persons gave handsome donations for the establishment of special hospitals and dispensaries, including maternity, tuberculosis, eye diseases, etc., and for the provision of X-ray and other special apparatus. This shows that the people of the Punjab have begun to realize that it is difficult for any Government however favourably disposed, to supply adequate medical relief for all sections of the public unless assisted by voluntary effort.

5. The Government is satisfied from the report that the chief Government hospitals, viz., the Mayo and Albert Victor Hospitals, Lahore, the Civil Hospital, Amritsar, the Lady Willingdon and Lady Aitchison Hospitals and the Dental Hospital, Lahore, continued to be satisfactorily administered and maintained a high standard of efficiency. The Ripon Hospital, Simla, for which the Municipal Committee is responsible, did good work but is handicapped by lack of accommodation. Similarly the Lady Hailey Women's Hospital, Bhiwani, suffers from lack of accommodation, the daily average of in-patients being far in excess of the number for which it was intended to provide. The Memorial Mission Hospital, Ludhiana, also maintained its popularity and efficiency.

6. In addition to the five Leper Homes, managed by the Mission Organizations and subsidized by Government and the Punjab Branch of the British Empire Leprosy Relief Association, there are 100 leprosy out-door clinics in the Province. Accommodation in these Leper Homes is, however, becoming inadequate, partly as the result of "burnt out", i.e., non-infectious cases remaining at the Homes and partly owing to the large number of lepers coming from places outside the Punjab. The question of asking other administrations to contribute towards such lepers was considered in 1935, but, as Punjab lepers are also accommodated in Leper Homes outside the Punjab, this was found to be impracticable. The scheme for the establishment of a settlement for "burnt out" cases, to which lepers from the Leper Homes could be transferred, did not prove a success and had to be dropped. The question of applying the Indian Lepers Act to the cities of Lahore, Amritsar and Simla was considered, but had to be shelved pending the completion of the leprosy survey of the whole Province or at least of the districts where the disease is endemic.

7. During the triennium under review Government gave a total grant-in-aid of Rs. 1,30,000 to local bodies, Mission societies, etc., for improving and equipping their existing hospitals and dispensaries. Besides this a sum of Rs. 89,000 was spent on additions and alterations carried out in the King Edward Medical College, Lahore, Medical School, Amritsar, and the Mayo Hospital, Lahore.

8. The scheme inaugurated in 1925 for providing medical aid to women by lady assistant surgeons in separate hospitals at each district headquarters and by women sub-assistant surgeons at each tahsil headquarters has not so far been completed. During the triennium under review seven

new women's hospitals or sections were opened involving an addition of one woman assistant surgeon and six women sub-assistant surgeons to the existing cadre, which now consists of 10 women assistant surgeons and 55 women sub-assistant surgeons. There is, however, still one district headquarters, namely, Jhelum and 52 tahsil headquarters in the Province which are without a lady doctor. Steps are being taken to appoint, as finances permit, a woman assistant or sub-assistant surgeon to each of the district and tahsil headquarters hospitals maintained by Government, and it is hoped that in the near future 13 hospitals with female sections under woman sub-assistant surgeons will be added to the list of institutions where arrangements exist for the treatment of women by doctors of their own sex. In order to provide medical aid for women in rural areas, especially for maternity cases, and to encourage nurse dais and trained dais to settle in villages, Government have sanctioned 200 scholarships of Rs. 10 per mensem each for a period of one year for the training of women as trained dais and 100 scholarships at Rs. 15 per mensem each for a period of two years for the training of women as nurse dais. These scholarships have been reserved for award to women of the rural areas only and measures have been taken to select candidates and arrange for their training.

9. Government note with satisfaction that medical education among girl students is becoming increasingly popular, so much so that many are refused admission in medical colleges and schools for want of accommodation. During the triennium under review 127 midwives, 189 nurse dais and 1,056 trained dais qualified themselves for the diploma and certificates of the Punjab Central Midwives Board.

10. The schemes for the medical inspection of school children both in rural and urban areas, and the anti-rabic work at the provincial centre at Lahore and also at district and tahsil headquarter hospitals continue to function satisfactorily.

11. The Department was administered by Col. C. H. Reinhold, M. C., F.R.C.S.E., I.M.S., throughout the period 1935—37, except for short periods when he was on leave in 1935 and 1937. He made over charge of the Department to Col. G. G. Jolly, C.I.E., V.H.S., I.M.S., on the afternoon of the 15th November, 1937, on retirement from the service. Government are indebted to Col. Reinhold, in whose capable hands the Department continued to make gratifying progress in spite of continued financial stringency. Government are also grateful to Col. Jolly for the present excellent report.

*Order.*—Ordered that a copy of the foregoing review be forwarded to the Inspector-General of Civil Hospitals, Punjab, for information.

Ordered also that the review be published in the *Punjab Gazette* and be circulated with the report, the usual number of copies of the review and the report being communicated to the Government of India in the Department of Education, Health and Lands.

By order of the Governor of the Punjab,

AMIN-UD-DIN,

*Secretary to Government, Punjab,*

*Medical and Local Government Departments.*

(2) REVIEW ON THE ANNUAL REPORT ON THE LAND REVENUE ADMINISTRATION OF THE PUNJAB FOR THE YEAR ENDING THE 30TH SEPTEMBER, 1938.

**Proceedings of the Punjab Government in the Department of Revenue (Revenue) No. 3382-R., dated the 20th September, 1939.**

READ—

The annual report on the Land Revenue Administration of the Punjab for the year ending the 30th September, 1938.

Prices.

REMARKS.—The improvement in the economic situation of the province which was noticed during the last two years received a severe setback during the year ending the 30th September, 1938. This followed the fall in prices of all staples. Gram failed and the market price rose slightly, as did that of bajra and tobacco while jowar remained stationary. But Lyallpur wheat fluctuated from Rs. 3-5-0 at the end of September, 1937, to Rs. 1-13-6 in May and Rs. 2-0-3 at the close of the year. Desi cotton fell from Rs. 7-8-0 to Rs. 4-4-0 and American from Rs. 8-10-0 to Rs. 5-12-0.

Season and Crops.

2. Climatic conditions were generally not favourable. The total sown and matured areas decreased from 32·66 and 28·02 million acres, respectively, in the last year to 31·57 and 26·12 million acres, respectively, in the year under report. The percentage of the failed area showed a marked increase in kharif, being 24 as compared with 16 last year—the normal average being 21. The percentage of crop failure was particularly high in the districts of Hissar, Gurgaon, Mianwali, Jhelum, Dera Ghazi Khan and Rohtak, being roughly about 60 per cent in Hissar, Gurgaon and Mianwali, and about 40 per cent in Jhelum, Dera Ghazi Khan and Rohtak. In rabi the increase in the percentage of failed area was 12 only. Though the corresponding figure for the preceding year was 11, yet the average percentage is 15. Failures reached 30 to 40 per cent in Hissar, Mianwali, Gurgaon and Dera Ghazi Khan. Taking the whole year together the percentage of failed on sown area was 17 as compared with 14 in the previous year and the average of 18 of the last ten years.

Rainfall was deficient, and the total irrigated area consequently showed an increase of 3 per cent. There were, however, some redeeming features. Not only did the total area under most of the valuable crops in particular wheat, cotton, rice, barley, tobacco and maize increase, but the yields increased too. The outturn of cotton was 52 per cent, wheat 23 per cent, rice 22 per cent, and sugarcane 12 per cent above what is recorded as normal. The increase in the area under cotton (both Desi and American) was due to high prices prevailing last year and satisfactory supply of canal water at sowing time. The area under sugarcane, however, fell from 5·54 lakh acres in 1937 to 5·10 lakh acres this year. This was obviously due to fall in the prices of gur. The total area under gram decreased from 49·09 lakh acres in the preceding year to 37·55 lakh acres. It was due to unfavourable climatic conditions at the time of sowing and to the fear of gram blight. The outturn in the case of gram, bajra, rabi oilseeds, jowar and

barley was below normal; and the total area under gram, bajra, rabi oilseeds and jowar decreased as compared with the preceding year.

Some damage was caused by excessive rains, severe cold, hailstorms and strong winds. Slight damage was also done to a few villages in the Khadar area of the Palwal tahsil of the Gurgaon district on account of floods in the Jumna river. Necessary steps were taken to give relief to the sufferers.

As in the previous year, remissions were liberal and amounted in all to over Rs. 24 lakhs. Approximately Rs. 12¼ lakhs were granted as fresh advances of taccavi.

Health and rural economy.

3. The health of the agricultural population was on the whole satisfactory. There were sporadic cases of smallpox, malaria, typhoid and pneumonia. Cholera was fatal to many pilgrims who had returned from the Hardwar Kumb fair, but prompt action taken by the Public Health Department prevented the spread of an epidemic such as might have interfered with agricultural operations.

Seasonal calamities, and the fall in prices have combined to cause a general deterioration in the economic condition of the province: but these difficulties notwithstanding Government continued to expand its activities directed to the betterment of village life, conducted for the most part under the auspices of the Co-operative Department and the Commissioner, Rural Reconstruction.

Revenue demand and collections.

4. The total fixed land revenue of the province amounted to Rs. 236·51 lakhs, of which Rs. 17·28 lakhs were suspended and Rs. 1·33 lakhs remitted. A sum of Rs. 215·97 lakhs representing 99·1 per cent of the recoverable demand was collected, leaving a balance of Rs. 1·93 lakhs at the close of the year.

The total amount under suspension on account of previous years was Rs. 20·02 lakhs, out of which Rs. 1·27 lakhs were collected and Rs. 6·95 lakhs were remitted, leaving a balance of Rs. 11·80 lakhs. This added to Rs. 17·28 lakhs suspended during the year brings the amount under suspension at the end of the year to Rs. 29·08 lakhs.

Revenue demand and collections.

5. The total demand of fluctuating land revenue for the year under report was Rs. 232·93 lakhs as compared with Rs. 219·58 lakhs for the previous year. The collections amounted to Rs. 230·44 lakhs or 98·9 per cent of the total demand against 99·3 per cent in the previous year. The increase is particularly noticeable in Montgomery, Lyallpur and Multan where crops were good and the canal supplies satisfactory.

The total uncollected balance, including arrears of previous years was Rs. 2·70 lakhs as compared with Rs. 1·74 lakhs last year.

Processes and notices.

6. The Governor notes with regret that the number of processes issued for the realisation of arrears of land revenue increased from Rs. 17,211 last year to Rs. 20,462 during the year under report.

Service by post.

7. It is gratifying to note the increasing popularity of the system whereby notices and summonses in revenue cases are served by post. About 23,000 notices and summonses were served in this manner as compared with 20,000 last year. In the districts of Mianwali, Ludhiana and Rohtak as many as 6,336, 3,300 and 3,105 processes, respectively, were issued. The Governor hopes that this system will be encouraged in the districts which have not so far derived full benefit from it.

Record rooms.

8. Improvement of record rooms is receiving due attention and necessary precautions are being taken for the airing and dusting of the records. The reports do not show to what extent the electric vacuum cleaners have proved successful.

Copying Department.

9. The income and expenditure of the Copying Department for the year ending the 30th September, 1938, was Rs. 5,11,185 and Rs. 2,68,035 as against Rs. 4,99,368 and Rs. 3,48,416, respectively, last year, the net profit increasing from Rs. 1,50,952 to Rs. 2,43,150.

The system of supplying copies of records to the litigant public at reduced rates and of paying for copies in court-fee stamps was extended to all districts in the province.

Spread of *sem* and *thur*.

10. The Waterlogging Board held one meeting in June, 1938, and the annual Waterlogging conference met in January, 1938. Particulars of *sem* and *thur* were collected by a special *girdawari* in 1,987, estates as compared with 1,870 last year in 14 districts. *Thur* continues to increase at an alarming rate. *Sem* seems to have been arrested, as there has been a diminution of 634 acres. In particular the drains have been successful in Lahore, Sheikhupura, Gujranwala and Shahpur districts.

In the Rechna and Chaj *Doabs* work on the five years' programme of drainage construction continued throughout the year and a beginning was made with the new two years' programme, which provides for the enlargement and improvement of some of the existing drains as well as the construction of numerous new branch drains.

On the scientific side research was continued by the Irrigation Research Institute and a Waterlogging Investigation Circle was formed to investigate more closely the problem of staunching.

The converse problem, viz., the fall in the water-table in the Bist *Doab*, which has been under review for many years was also before Government and a scheme to effect improvement was accepted. A special sub-division was opened in the summer of 1938 for the survey of the area: and this will be followed by construction.

Consolidation of holdings.

11. Progress was made with consolidation of holdings in Rohtak, Sialkot and Gujrat. Work was opened in Jhelum. Except in Rohtak the results are very encouraging.

Settlements.

12. The Lyallpur settlement closed on November 30, 1937, having lasted 4 years and 2 months. The cost amounted to Rs. 4,96,987 against the earlier estimate of Rs. 5,04,118. Settlement operations in Lahore, Amritsar and Jhelum were in progress during the year.

Acknowledgments.

13. During the year under report the office of Financial Commissioner, Development, was held by Sir Malcolm Darling, K.C.I.E., I.C.S., and Mr. C. C. Garbett, C.S.I., C.M.G., C.I.E., F.R.G.S., I.C.S., and that of Financial Commissioner, Revenue, by Mr. B. H. Dobson, C.I.E., O.B.E., I.C.S. The control of the land revenue department proper falls, however, almost entirely upon the Financial Commissioner, Revenue. Mr. Dobson has held this charge for altogether 3 years, up to the date of his retirement in 1939. Government desire to place on record their appreciation of his devotion to duty, and the success he attained.

C. C. GARBETT,

*Secretary to Government, Punjab,*

*Revenue Department.*

## PART II.

### GENERAL.

**(1) REVIEW OF THE REPORT ON THE WORKING OF CO-OPERATIVE SOCIETY IN THE PUNJAB FOR THE YEAR ENDING 31ST JULY, 1938.**

**Review of the report on the working of Co-operative Societies in the Punjab for the year ending 31st July, 1938.**

*Progress.*—In 1917-18, twenty years before the year under report, there were in the Punjab a little over 4,000 Co-operative societies with 135,000 members and about 2 crores of working capital. At the time this seemed a remarkable achievement, and the movement was described in the Government review "as a potent lever for the uplift of the rural population". Yet 20 years later there were 23,657 societies with about 900,000 members and a working capital of 18 crores. Nearly 50 per cent. of the 34,000 villages of the province had a society—in Jullundur the percentage was over 70—and between 4 and 5 million of the population of the province were in contact with the movement. These are the fruits of a generation of effort, and there is no inherent reason why in another generation, if the effort is sustained, the movement should not be gradually extended to embrace all who are willing to help themselves and each other to a higher level of well-being. It is one of the great objects of the movement to stimulate this willingness to the utmost, and upon its success or failure depends to a large extent the future welfare of the

province, for, as recently remarked by Mr. Calvert, there is "a sharp limit to State help but practically no limit to self-help".

*Government assistance.*—In 1917-18 Government spent less than a lakh on the movement. In 1937-38 it spent over 14 lakhs. The times clearly call for further expansion, and if this is to proceed on sound lines, an even larger expenditure will be required to ensure the necessary supervision and guidance, without which no movement based upon a largely illiterate population can prosper. It is, however, to be remembered that the whole object of this assistance is to make it ultimately superfluous: in other words, to make the movement self-supporting and self-controlled.

Thrift and credit societies, which form much the largest group, are divided into five classes based upon the measure of their capacity for managing their own affairs efficiently without official assistance, and it is the whole endeavour of the official staff to help societies to rise from one class to another, so that when they reach class A, which is the highest, they may be free of all departmental control except what is involved in the annual audit. In class B, too, the control is of a most modest character, and if the success or failure of the credit movement is to be measured by any single factor, it is by the number of societies in these two classes. In the case of agricultural societies the percentage is only 16 : for non-agricultural societies, for which no figures are given, it is believed to be substantially higher ; and the number of members in societies of both types may be put, roughly, at a lakh. Very broadly, therefore, the Punjab may be said to have at least a lakh of genuine co operators in its thrift and credit societies. This no doubt represents only about one out of every six members, but considering that only one in seven can read and write it is an achievement which carries with it a good hope for the future. Convinced that without Co-operation its programme of rural reconstruction must largely fail, the Punjab Government are determined to build on this hope to the utmost extent of their resources.

*Agricultural credit and the depression.*—Since the fall in prices the co-operative credit movement throughout the world has found itself in serious difficulties. The Punjab is no exception but there are some welcome signs in the report under review that the worst effects are gradually passing. Since 1930-31, the first year of acute depression, membership in societies of all types has increased by 28 per cent. In agricultural thrift and credit societies recoveries are slowly but surely improving, i.e., from 13 per cent. of the principal on loan in 1932-33 to nearly 18 per cent. in 1937-38. Loan business, which for some years remained fixed at about 16 lakhs, has gone up to 107 lakhs, and owned funds are increasing.

There is unfortunately much to set against this—the heavy arrears of interest and overdues of principal ; the formidable number of societies in class D (the lowest of the five classes referred to above), even larger than in class A and B ; the ever increasing number in liquidation, now amounting to 1,413 ; the frequency of dishonesty—379 cases came to light during the year ; and finally the fact, most properly emphasised in the report, that as a result of "the

propaganda which accompanies modern political campaigning" and the misunderstanding of the real object of the recent debt ligislation, "the sense of moral obligation to repay is getting weaker and weaker in almost every corner of the province". This is most serious for in Co-operation credit is based fundamentally upon this obligation. As the Registrar observes, the remedy is "more and more constant and intensive teaching of the members". Fortunately this has been made possible by the generous grant of the Government of India for this purpose in 1935, and it is beginning to bear fruit in a wider and more rational understanding of the principles and practice of Co-operation.

*Thrift.*—Most of the features mentioned in the last paragraph have been frequently commented on in past reviews and there is no need this year to refer to them in detail, for they are the subject of unceasing concern to the Registrar and his staff. But there is one point which it is necessary to emphasize. The melancholy experience of the last six or seven years shows that, if the province is to have a healthy system of rural credit, thrift and credit must be closely allied. It is not that thrift has been neglected in the past—the fact that societies own 36 per cent. of their funds and that there are 1,484 non-agricultural thrift societies is proof to the contrary—but in the minds of members, and even of many of the staff, it has definitely taken second place. The reason is sufficiently obvious: the ordinary cultivator of a small holding, who forms the bulk of the members, has great difficulty in making both ends meet with his present manner of living. But this difficulty is not insuperable. This is shown by the savings effected in almost any A class society, and on a larger scale by the two thrifty districts of Jullundur and Hoshiarpur, where members have over 17 lakhs on deposit with their village societies. This is more than the total amount deposited in the remaining 27 districts of the province. Taking agricultural credit societies as a whole, only one member in 21 is a depositor. It is, however, some consolation to read that during the year the number increased by 2,600.

*Women's societies.*—The means of encouraging thrift are far from having been exhausted, and the first step in this direction is everywhere to draw the thrifty into the movement and encourage them to make some deposit, however small, with their society. Every society is the better for having a depositor or two amongst its members if only to keep a watch on those who borrow, and many villages are quite capable of producing them; yet many thousand village societies have no depositors at all. Another line of approach is to start more societies for women, since whether a family is solvent or not often depends upon the way a woman manages her household, and it is one of the chief functions of a co-operative society for women to teach this. It is for this reason that a second Inspectress was sanctioned during the year. This should ensure a higher standard of work amongst the 11 Sub-Inspectresses. There were at the end of the year 233 societies with over 5 000 members and a working capital of 2·68 lakhs. This would have been considered highly satisfactory ten years ago when it was difficult to find any village woman both qualified and willing to work as a Sub-Inspectress and village women generally were as apathetic as they were ignorant. But in the more developed districts at least they are beginning

to be touched by the general awakening. The time should, therefore, be ripe for considerable development in this field. If the Punjab Co-operative Union is prepared to take the lead in this, Government will do their best to support it.

*Savings Bank accounts for children.*—In addition to the societies for women there are 11 for children. Children offer an almost untouched field for the development of thrift. In Bulgaria, a peasant country very like the Punjab but with a population of only 6 millions, a crore has been deposited in co-operative societies by children under 15. It is for consideration whether a systematic effort should not be made on the same lines amongst the children of the Province, for if thrift is to be taught teaching can hardly start at too early an age. The savings bank account is an example of what may develop out of small beginnings. Ten years ago Central Banks were urged to encourage this type of account by special concessions. The result in 19 7-38 was the accumulation of over 91 lakhs in about 24,000 accounts. These accounts are no doubt mainly urban, and it might be advisable to experiment first with children's savings accounts in the larger villages or townlets, which nearly always contain a more or less prosperous agricultural element.

*Town Banks.*—It is sometimes supposed that the co-operative movement is almost entirely rural. This is far from being the case in the Punjab. About 25 per cent. of the total number of members belong to non-agricultural societies. Thanks to their members' more assured sources of income, and doubtless too to their thriftier ways, the urban credit societies, which number 739, have done markedly better during the depression than the agricultural. Though their membership is only 50,000 as against over 500,000 in agricultural credit societies, they advanced 57 lakhs during the year, or mo e than half the amount advanced by the latter, and they recovered 78 per cent of the amount on loan. Some years ago, on the advice of the Punjab Banking Enquiry Committee, three Inspectors were appointed specially for work in the towns. This has led to a considerable development of the urban movement, notably in Jullundur where there are now over 60 societies serving, it is said, one-third of the population. In 17 of them membership is mostly drawn from the trading classes. It is all to the advantage of the movement that the trading classes should take part in it, for they should bring to it a certain variety of activity and also a much needed business acumen. Even in the village, societies are often the stronger for including a shop-keeper or two in their membership. Now that many members of this class are being compelled by circumstances to give up money-lending, it should be possible to enlist many more. Incidentally this will serve to demonstrate in practical fashion that Co-operation takes no account of caste, community or creed. This is one of the best services that the movement can render the Province at the present time.

*Non-credit Societies.*—It is a frequent subject of criticism that the credit side of the movement is overwhelmingly dominant. The reasons for this belong to the history of the movement, and it dates from the days when the money-lender was all-powerful in the village and the most pressing problem was to deliver the peasant from his

clutches. In those days, too, all the beneficent departments were in their infancy—one even did not exist—and were not in a good position to give the assistance required for tackling the other problems of the village. Even more important, the peasant himself was only just beginning to awake from the sleep of ages. Twenty years ago, of the 4,000 societies mentioned above less than 50 were non-credit. In 1937-38 the number was 5,142 out of 23,657. Even this, however is only 22 per cent. It would undoubtedly be a great advantage to the movement if this percentage could be considerably increased, if only because the illiterate peasant is at a disadvantage in a credit society, having still almost everything to learn in the proper use of money. He is seen at his best in an arbitration society, but there are only 115 of these, and 67 of them are in the single district of Kangra. Their great merit is that they bring a whole village together in a common desire to avoid litigation, which is one of the curses of the Punjab village.

*Consolidation of holdings.*—Even more beneficent in its immediate effects is the society for the consolidation of holdings. There are 1,360 of these societies and the work which they have done with the help of the department—5 Inspectors and 240 Sub-Inspectors are employed—challenges comparison with any co-operative achievement in Europe, since it involves a complete redistribution of innumerable, and often minute, parcels of land amongst a great variety of owners with their *unanimous* consent. During the year, 132,313 acres were consolidated, and at the time of writing, the total area consolidated since the first society was started in 1921 exceeds a million acres. No greater benefit has been conferred on the Punjab peasant since the war, and the benefit is largely due to Mr. Calvert's initiative and foresight. It has led to the sinking of 4,000 new wells and the repair of several hundred others. In Hoshiarpur alone, in 1937-38, 763 acres of waste were brought under cultivation and 688 more, which had previously depended upon a capricious rainfall, were given irrigation (by well) for the first time. In addition, 174 miles of roads and pathways were made; 143 acres were reserved for grazing and 2,600 plots for village extension, and many others were set aside for schools, playgrounds, cattle pounds and manure pits.

*Better-living Societies.*—After consolidation societies the largest group of non-credit societies are the Better Living Societies. Always important, they have become doubly so with the rural development campaign inaugurated last year. The object of this campaign is to bring the means of better living to the gates of every village in the Province, and the Better-Living society is the best means that can be employed for the purpose, since the whole rural reconstruction programme on its social side is included in its objects. It is satisfactory, therefore, to find that 164 societies were started during the year and that at the end of it there were nearly 1,100 with over 50,000 members.

*Miscellaneous Societies.*—In the brief compass of a review it is difficult to do justice to the varied activities of the movement. But a few points must be very briefly mentioned. Societies for breeding cattle, sheep or mules increased by 62 during the year and numbered 296 at the end of it. In Ferozepore 60 Veterinary First Aid centres were at work and treated over 10,000 animals. Fifteen fruit-growing societies have been started in the remote and im-

poverished district of Muzaffargarh. A number of societies have been formed at Hoshiarpur to combat erosion ; bee-keeping societies have been started in Kulu, and the first house building-society to be started is doing well at Gurdaspur. Steady progress is also being made by the 329 industrial societies, 88 per cent. of whose members are weavers, shoemakers and carpenters. During the year their sales a ounted to 4½ lakhs.

*Central Banks and village societies.*—In the field of banking some interesting points must also be noted : namely, the 234 lakhs of Government securities held by the Provincial Bank and the Central Banking institutions, their 507 lakhs of deposits, and the low rates of interest paid on these deposits, in some cases no higher than those paid by the Imperial Bank. Against this, however, must be set the 47 lakhs of outstanding interest and the 124 lakhs due from societies classed D or under liquidation, partially covered, however, by special reserves amounting to 34 lakhs. The position in the south-east Punjab still gives cause for anxiety, but it is refreshing to read of a marked and much needed improvement in the operations of village societies in Rohtak, and also in Sialkot. Sardar Iqbal Singh and Mian Fateh Singh, Assistant Registrars, are mentioned creditably in this connection. The Registrar complains that the work of recovery " falls more and more upon the shoulders of departmental officials " and he comments severely upon the increasingly irresponsible attitude of many members, often the most influential, towards their obligations. This in an alarming feature which should engage the attention of all true co-operators throughout the Province for there is an obvious limit to what can be collected departmentally, and if departmental collections become the rule, this must gravely affect the development of the credit movement, never more necessary than to-day now that the old channels of the money-lender are drying up. Moreover, it is opposed to the whole conception of Co-operation as a popular and independent organization that societies should leave their collections to official agency. Incidentally, too, it is making it difficult for the department to pursue its traditional policy of interfering as little as possible with the internal management of societies.

*The Punjab Co-operative Union.*—It is one of the best features of the movement in the Punjab, that in pursuance of this policy official and non-official have always worked side by side, so equally devoted to the cause of Co-operation that it would often be difficult to say which was the better co-operator of the two. The Punjab Co operative Union is the outward and visible sign of this harmony, and it is pleasant to be able to congratulate it on its twentieth birthday. It is some indication of the extent to which co-operators are prepared to help themselves that in 1937 38 they provided 83 per cent. of the funds of the Union. The Union's backbone is to be found in the 100,000 co-operators mentioned above, amongst whom are many who, unrewarded, have for years led their societies from strength to strength.

The Registrar mentions the names of three persons who have been specially prominent in this respect, *viz.*, Major Sardar Sir Mohammad Nawaz Khan of Kot Fateh Khan, Pandit Bhagat Ram Airy of Bhanupli, and Subedar Thakur Singh of Lil Kalan. The Punjab Government cordially

endorse his acknowledgments. They also associate themselves entirely with his tribute to Mr. P. D. Macpherson who retired during the year from the post of Financial Adviser after holding it for ten years to the great advantage of the movement. It is a difficult post to fill and no one could have filled it better or made himself more universally respected. His name appropriately appeared in the last New Year's Honours List.

This is the sixth report to be submitted by Mr. Wace, and it will unfortunately be his last. Though he remained in charge of the Department during most of the ensuing year, it will be not out of place to record forthwith Government's deep sense of obligation to him for his wise and successful steering of the movement through 6 years of depression. The post of Registrar is one of the most responsible in the Province, and he has discharged this responsibility with unfailing judgment and devotion. He has earned a high place in the annals of the movement in the Punjab and was deservedly made a C. I. E. last January. In his difficult work he has been greatly assisted, as he is the first to acknowledge, by a highly trained and competent staff. It is sometimes said that the missionary spirit is not as prominent in the staff as it once was. The Financial Commissioner, Development, who has for many years been in touch with the movement, sees no sign of this beyond what is inevitable in a greatly expanded department. Government notes this with pleasure, since without this spirit the movement will fail of its high and most necessary purpose.

M. L. DARLING,

*Secretary to Government, Punjab,*

*Development Department.*

---

**(2) REVIEW ON THE REPORT ON THE ADMINISTRATION OF THE POLICE IN THE PUNJAB FOR THE YEAR 1938.**

## Proceedings of the Punjab Government in the Home (Police) Department, No. 5614-H.-39/28425 (H.—Police), dated the 3rd September, 1939.

READ—

Report on the Administration of the Police in the Punjab for the year 1938.

THE statistics for 1938 show a general rise in the level of crime. There are indeed reassuring features. For example, the number of dacoity cases (92)—the dacoity figure is generally regarded as a particularly reliable index of the general state of crime—was the lowest for any year in the last decennium except 1936. In the peak years 1931-32 the figure was more than double what it is now. It is also noticeable that while the Inspector-General has had to complain of the effect on crime of anti-police propaganda by political agitators, cases of active resistance to men of the Force were fewer than in 1935 and 1936. In face of these facts there is no occasion to take an alarmist view or to anticipate any general loss of control. None the less the position is sufficiently disturbing. The total number of true cases of all kinds reported during the year (59,140) showed an increase of 3,213 over the figure for 1937, which was itself a record. Robberies are up to 567, against an average for the last quinquennium of 482, and burglaries to 1,561, the highest figure since 1931, the civil disobedience year. Worst of all, the murder figure (1,041) constitutes a new high record for the province. When studying the murder statistics, allowance has always to be made for the increase in the population of the province, which has been growing at the rate of something like 15 per cent every ten years, but it is impossible to regard the present figure with complacence when it is remembered that in 1929 and 1930 it was well under seven hundred.

2. A number of causes are mentioned in the report as having contributed to the rise in crime. In the first place account must be taken of such fortuitous circumstances as the comparative failure of the monsoon, causing famine in certain south-eastern districts and a lowering of economic standards everywhere. It is noticeable in this connection that the rise in crime is for the most part in the Eastern and Western Ranges, where a deficiency in the rainfall is felt more acutely than in the central districts. Secondly there can be little doubt, as the Inspector-General has pointed out, that political agitation, involving eulogy of terrorists and other criminals and attempts to discredit the police, has had its effect in engendering a spirit of lawlessness. It is doubtful, however, whether the rise in crime is due to these extraneous causes so much as to the difficulties experienced in obtaining convictions in the courts. The question whether the percentage of convictions was in fact declining was examined in 1934-35, with particular reference to the murder figures, which even then gave cause for concern. The inquiries made at that time failed to establish that the proportion of convictions had materially decreased. The examination was not, however, a thorough one, and the figures are now being studied afresh. So far as the re-examination has gone, it seems to show that there has been a decided drop in the proportion of convictions during the last four or five years—a conclusion which the figures in paragraph 16 of the present report tend to confirm.

3. If it is correct that the proportion of convictions is falling the principal reason is probably to be found in the measures taken by Government during the last two or three years to get rid of discredited methods of investigations and in particular the abuse of "padded" evidence. It was realised, at the time when the orders were issued, that they would make the work of investigating officers more difficult and might lead in the first instance to a fall in the proportion of convictions. Clearly there can be no question of reverting to the irregular methods which were sometimes used in an early period, and the only course open is to press forward with measures to raise the standard of efficiency in investigation work and prosecuting work. Here, unfortunately finance is a hampering consideration. The investigation of cases on scientific lines demands not only a more highly trained but also a numerically stronger staff than was necessary with the older methods. The report refers particularly to the valuable results obtained by the Central Investigation Agencies in certain districts in the working out of burglary cases, and it seems certain that the investigation of this and other special forms of crime will have to be carried out more and more by specialists rather than by the regular station house officers. Success in investigation and prosecution is thus to a large extent a matter of funds, and while reluctance will doubtless be felt in diverting money which might otherwise be used to develop the social services, considerable increases in police staffs appear to be inevitable in the near future. In the mean time it is essential, as the Inspector-General has pointed out, that the superior officers in the force should be on the watch to check any tendency on the part of subordinates to seek a refuge from criticism in inaction and excessive caution.

4. Government note with satisfaction that the improvement in the duration of trials which has been a feature of the statistics for the last five years has been well maintained. Delays in court not only entail serious inconvenience to parties and witnesses but lead only too often to a failure of justice. In congratulating both magistracy and police on the results that have been achieved in this direction, Government would like to draw attention once more to the basic principle that the police must not be expected to bear the whole responsibility for the maintenance of good order. As was emphasized in some striking paragraphs in the review of the Police Administration Report for 1924 the magistracy and the public have an active part to play in the suppression of crime. One passage from that review, relating to the responsibility of the Ilaqa magistrate, may well be reproduced here:—

"A magistrate's duties do not end with the methodical treatment of cases in court. The responsibility for the peace and

security of the Ilaqa rests with him. He is armed with many more powers than those required for hearing cases, and he is interested in every crime in his Ilaqa from the moment of its commission. The preventive sections of the Criminal Procedure Code confer upon him powers whose greater or less use are at his discretion. That discretion carries with it a heavy responsibility which a good magistrate will anxiously discharge. The Governor in Council is aware that very many magistrates recognise that responsibility and have discharged it with great staunchness in troublous times, but he expects of all Ilaqa magistrates a close acquaintance with their charges, a feeling of personal responsibility for its condition, a wise discretion in the prevention of crime, a well-informed interest in all cognisable offences from the moment of their commission and a methodical, punctual and businesslike handling of cases in court."

These principles have since been affirmed in the Rules and Orders of the High Court, where it is emphasized that the Ilaqa magistrate is not a mere judge whose duty it is simply to decide cases produced before him, but is at all times responsible for the maintenance of the peace in the area made over to his charge. To enable him properly to discharge his duties it is essential for every magistrate to take a personal interest in and gain a thorough knowledge of the police stations with which he is concerned.

5. A paragraph of particular interest in the report contains an analysis of the figures of motor accidents. As the Inspector-General has pointed out, it is impossible to disconnect these high figures from the present disorganised state of public motor transport. The new Motor Vehicles Act, 1939, has recently come into force and during the next few months action will be taken to bring into operation the new system of control. It will now for the first time be possible to limit the number of permits issued to transport vehicles and end the cut-throat competition which has been the cause of so much distress among owners and drivers. As has been explained in previous reviews, care will be necessary in introducing measures of limitation: drastic action which would have the effect of throwing numbers of men out of employment must obviously be avoided. But there is every reason to hope that the new system of control will soon begin to show results, not only in the form of improved conditions in the trade, but in a reduction of the accident figures. It is of interest to note, in connection with the complaint in the report regarding the work entailed on the police in serving processes, that the new Act includes provisions enabling persons accused of petty motor offences to plead guilty by post, remitting a fine fixed in advance by the magistrate. The adoption of this procedure should have an appreciable effect in reducing the amount of process-serving work.

6. During the course of the year a further step was taken towards completing the scheme recommended by the Lumsden Committee of 1925-26 for the replacement of the old investigating head-constable by a new class of officers known as assistant sub-inspectors, fifty more posts in this rank being created. Financial considerations have so far stood in the way of the large expansion of the prosecuting establishment which is undoubtedly necessary, but a step in this direction was taken by the addition to the cadre of seven more appointments of prosecuting sub-inspector. An increase of 67 constables, with the appropriate complement of superior officers, was also made in the strength of the city police at Amritsar. Criticism has sometimes been expressed in the legislature in regard to the comparative paucity of non-Muslims in the lower ranks of the police. Members interested in this subject will be glad to read the description in one of the later paragraphs of the report of the measures taken in Lahore and elsewhere, to secure Hindu and Sikh recruits. Government have read with concern the observations in the same paragraph regarding the disappointing quality of the candidates coming forward for appointment as assistant sub-inspectors. These are the investigating officers of the

future, and it would be a disaster to the Force and the province if any but the best material were accepted. If there are clear signs of a falling-off Government hope that the Inspector-General will come forward at once with proposals to put matters on a proper footing. One of the most importtant reforms which has been in process of execution during the last few years is in regard to the training of the newly recruited constable. In the Central Range a scheme has been in force for some time under which all recruits, with the exception of those from the Amritsar district, are trained in a central depôt, located at Sialkot. In the Eastern and Western Ranges the scheme for centralised training is not yet fully developed, but it is hoped that funds will shortly permit the establishment of permanent schools, with an appropriate establishment of instructors, in all three Ranges. Critics of the Force will notice that the courses in the schools for constables include special training in the duties of the police in their relations with the public. Officers who pass this course with credit are regarded as marked men, to be kept in view for accelerated promotion.

7. The report contains a special tribute to the assistance rendered to the department over a number of years by Lieutenant-Colonel D. R. Thomas, O.B.E., I.M.S., the Chemical Examiner. The Punjab Government associate themselves with this appreciation of Colonel Thomas's work, as also with the remarks in the report regarding the invaluable help given on a number of occasions by members of the public. As was perhaps inevitable in the early days of the new constitution, the efficiency and conduct of the police have during the last two or three years been subjected to a scrutiny even closer than usual. The Force has been fortunate in having at their head, during the transition period, an Inspector-General with the sound judgment of Mr. Orde. Under his wise leadership officers and men have adapted themselves without difficulty to the new conditions, while preserving intact the traditions of courage and loyalty for which the Punjab Police have always been famed.

ORDERED that a copy of the review be forwarded to the Inspector-General of Police, Punjab, for information and guidance, and that the report and review should be circulated as usual to the Home Department of the Government of India, and to the Registrar, High Court of Judicature at Lahore, for the information of the Honourable Judges.

By order of the Governor of the Punjab,

A. V. ASKWITH,

*Home Secretary to Government, Punjab.*

## PART II.

### GENERAL.

**(1) REVIEW ON THE REPORT OF THE DEPARTMENT OF AGRICULTURE, PUNJAB, FOR THE YEAR ENDING 30TH JUNE, 1938.**

**Proceedings of the Punjab Government, Development Department, No. 3412-D., dated the 9th September, 1939.**

READ—

The Report of the Department of Agriculture, Punjab, for the year ending 30th June, 1938.

*Finance.*—This isthe first report of the Department of Agriculture to be submitted under the new constitution, and is a document of great importance, dealing as it does with the development of over 31 illion acres of cultivation. The great possibilities of tihs development are abundantly illustrated by the varied and fruitful activities of the Department, of which a good account is given in the report. These activities, which benefit millions of cultivators, cost the province in 1937-38 only a little over 20 lakhs net. Another $2\frac{3}{4}$ lakhs were spent as the result of grants from such outside sources as the Imperial Council of Agricultural Research and the Indian Central Cotton Committee. The Punjab Government gratefully appreciate this assistance, which follows much similar assistance given in the past.

2. *Lyallpur College.*—One of the basic functions of the Department is agricultural education and training. This is mainly given at the Lyallpur Agricultural College. Founded 30 years ago with a single three years' diploma course and only 16 students, the College now has over 20 courses, varying in length from four years to a fortnight and embracing such *diverse* subjects as dairying, bee-keeping, lac cultivation and poultry breeding, the growing and preservation of fruit, the control of insect pests and fungal diseases, the training of *malis* in fruit-growing and of village blacksmiths in the running of engines, and also estate management. Before the war there was little demand for agricultural education, and in 1913 not a single person applied for admission to the College. The position is now completely reversed and competition for admission is so keen that in 1937, for the degree class alone, there were 290 applications for 94 vacancies. A pleasing feature of this demand is that it comes largely from the cultivating classes and from a type of student greatly superior in educational qualifications to the student of a few years ago. Of those admitted last year 84 per cent were statutory agriculturists. Altogether 569 students took one or other course, and though this was a record number, it represented only a fraction of the demand for admission. Consequently, the College laboratories and hostels were filled to overflowing and could probably have been filled twice over had the necessary accommodation existed.

An interesting feature of the College is its dairy. This was started in 1914-15 and the average daily milk yield was then only 5·6 lbs. per cow. Thanks to the application of proper dairying methods, the yield has steadily risen and in 1937-38 was over 19 lbs. a day. The result is, the dairy not only fulfils its educational purpose but is run at a profit.

3. *Crop Research.*—Even more important than agricultural education is research, and it was never more important than it is now since the rapid increase in population makes it vitally necessary to increase production. In this field the Department has deservedly gained a great reputation. High yielding and high quality varieties of wheat, cotton, sugarcane and rice, and improved fodders, oilseeds and millets have all been made available to the cultivator to his unmistakeable benefit. The Punjab has long been famous for its medium and long staple Punjab-American cottons, and now a country cotton called 39 Mollisoni has become so popular on account of its yield and lint that in 1937, which was only the fourth year of its existence, it was sown on over 500,000 acres.

4. *Wheats.*—Amongst improved wheats C.591 and C.518 are now the most keenly sought after. C.591, which is described in the report as one of the world's best wheats, is in special favour with the small grower because it makes a very good *chapati*. The discovery of these two wheats with their high yield is a matter of considerable economic importance to the cultivator, especially as in one case the exceptional quality of the grain obtains for it a higher price in the market, an advantage not to be despised in these days of low prices. For this important discovery Rao Sahib Chaudhri Ram Dhan Singh, Cerealist to

the Punjab Government, was awarded the Maynard-Ganga Ram prize of Rs. 3,000.

5. *Gram blight.*—Another signal achievement is the discovery of a variety of gram which resists blight. Of late years the gram crop over a large part of the province has been increasingly affected by blight and in the north the crop has more than once been almost completely wiped out. When the menace became apparent, over 400 varieties of gram were obtained from many different countries and tried on the farm at Campbellpur, but only three proved blight-resistant. One of these—F. 8—has been selected for multiplication and out of the half dozen grains sent from the United States it is hoped to have 25,000 maunds of seed available for distribution next year. The importance of this almost spectacular achievement lies in the fact that gram is grown on over 5 million acres in the province.

Only a passing reference can be made to other crops, on many of which, however, important work is being done. The area under groundnuts has risen from 241 acres in 1931 to over 34,000 acres in 1937-38. The Rice Farm at Kala Shah Kaku has been increased by 234 acres. In the Murree Hills the variety of potato known as 'Factor' is displacing other varieties, and at Palampur in the Kangra district the Department is concentrating on producing a good seed potato which will make it unnecessary to import far more expensive seed potatoes from outside the province.

6. *Fruit.*—A branch of activity that is rapidly increasing is the preservation of fruit. This is as it should be in a country of small holders, for the small holder, if he is to maintain any standard of living, must cultivate his land intensively and one of the best ways of doing so is to grow fruit and vegetables. It is most satisfactory, therefore, to learn that fruit-growing is rapidly spreading. The fruit shows held at important centres, notably at Lahore, have contributed to this; and even more stimulating has been the distribution of 34,000 nursery plants of known origin at cheap rates under a scheme inaugurated in 1935. Meanwhile demand is outstripping supply, and to meet this a progeny garden of 27 acres has been established at Risalewala (Lyallpur) for the supply of bud wood from fruit trees of outstanding merit. Research into fruit culture is also being developed and two experimental gardens, *viz.*, at Attari and Palampur, have been added to the one at Lyallpur, which so far has been the foundation of the Department's work in fruit-growing. Lyallpur is also the departmental centre for fruit preservation. A canning hall has been installed there to demonstrate the possibilities of preserving fruit on a commercial basis. It is also an excellent centre for the training of students. During the year, about 5,000 bottles of squashes, 650 bottles of tomato ketchup, 800 tins of pears and 400 lbs. of pear jam were manufactured, and their quality is said to have been generally approved by consumers.

Although the primary object of the Department in this field should be the encouragement of fruit-growing by the small holder for the variety it adds to his fare,

there is undoubtedly great scope for its development on more commercial lines by the larger holders. Their interest are well represented by the Punjab Provincial Co-operative Fruit Development Board, which in spite of its short life already has a membership of well over 400. It receives a grant-in-aid from Government (Rs. 2,500 in 1938-39) and with the help of this it issues a quarterly bilingual journal, containing many useful and interesting articles. It has also published bulletins on the fruit industry of Egypt, Palestine, Italy, Sicily, France and Switzerland.

7. *Seed distribution.*—The Department's research is done on seven experimental farms. Eight seed farms are their necessary complement, their object being to multiply the seed of the varieties which have proved their superiority on the experimental farms. This seed is now in such demand all over the province that the supply has to be supplemented from large private farms where purity can be guaranteed. Its distribution is now one of the most important functions of the Department's district staff. The quantities handled from year to year continue to increase and the following figures show that they have reached a scale which would have been considered impossible a few years ago :—

| | | *1933-34.* | *1937-38.* |
|---|---|---|---|
| | | Mds. | Mds. |
| Wheat | .. | 88,150 | 278,000 |
| Cotton | .. | 32,750 | 94,800 |
| Rice | .. | 3,358 | 5,700 |
| Gram | .. | 4,700 | 29,700 |
| Total | .. | 128,958 | 408,200 |

Yet even so there are still innumerable cultivators who grow the unimproved varieties from ignorance, apathy or lack of supply. Government will be prepared to consider any well thought out scheme for increasing the supply. There is, however, a limit to what departmental organization can do.

8. *Marketing.*—The staff engaged on the investigation of marketing problems has made good progress, and reports on the marketing of barley, gram, potatoes and butter have been completed. A marketing bill was also prepared for the better regulation of the many markets of the province. It has since been passed but not yet brought into force. Government is also contemplating legislation to stop the adulteration of *ghee*, which is a widespread evil. Graded *ata* was manufactured and sold during the year, and the experiment showed that there was a keen demand for *ata* of guaranteed purity and quality. Efforts are also being made to establish a few egg grading centres.

9. *Demonstration and propaganda.*—The demonstration and propaganda work of the Department is done by

its district staff. This staff tours the villages and demonstrates the advantages of improved seeds and better methods of cultivation, and how to control crop pests and diseases; and it also delivers lectures at fairs and other popular gatherings. It consists of 101 Agricultural Assistants and 187 Mukaddams, and there are in addition 28 Agricultural Assistants and 56 Mukaddams who have been appointed temporarily in connection with the Rural Development Scheme. The object of this scheme on the agricultural side is gradually to intensify demonstration and propaganda work throughout the province, tahsil by tahsil, and a special grant has been made to the Department for the purpose.

Village Farmers' Associations are a useful factor in this process and increased from 3,129 in 1936-37 to 3,482. "Farmers Weeks" are another means to the same end and were held, as usual, at the headquarters of the experimental farms (except Hansi). They serve a double purpose, for they bring home to the ordinary cultivator the activities not only of the Department of Agriculture, but also of the other beneficent departments.

10. *Fisheries.*—In the Fisheries Section research has received a healthy stimulus through the acceptance by Government of various schemes put forward by the Department. The Municipal Committee, Batala, has also provided funds for the installation of a tube-well for supplying water to a large and ancient tank, in which experiments on carp culture are being started. Another tank at Khori was taken over from the Public Works Department for promoting fish culture. On the administrative side, the total revenue from fishing licenses and leases rose by Rs. 5,497 to over Rs. 60,000 and the return on the section was Rs. 20,735.

11. The Director gratefully acknowledges the assistance given to the Department by the Revenue, Co-operative and Irrigation departments, and he mentions appreciatively the practical interest which most Commissioners and Deputy Commissioners are taking in the work of the Department and also the assistance given in various ways by North-Western Railway, the University of the Punjab and the Lahore Municipality. The Punjab Government desire to associate themselves with these acknowledgments and take this opportunity of expressing their cordial appreciation of the part played during the year under review by Mr. Stewart, the Department's very able Director, K. B. Maulvi Fateh-ud-Din, who has written a report of great interest, and K. B. Mian Afzal Hussain, and by the many others who have contributed to the very valuable work done by the Department for the province. Shortly after the close of the year K. B. Mian Afzal Hussain was appointed Vice-Chancellor of the University of the Punjab. This is a heavy loss to the Lyallpur College, of which he was Principal for 4 or 5 years.

(2) REVIEW ON THE ANNUAL ADMINISTRATION REPORTS ON SMALL TOWNS FOR THE YEAR 1937-38.

**Proceedings of the Punjab Government in the Local Government (Small Towns) Department, No. 2898-Bds.-39/30923, dated the 28th September, 1939.**

READ—

The Annual Administration Reports on Small Towns for the year 1937-38.

1. *Number and Constitution.*—The number of Small Towns at the close of the previous year was 104. The Notified Area Committee of Mandi Baha-ud-Din in the Gujrat district was converted into a Small Town Committee during the year under report. Thus the number of Small Towns at the end of the year was 105. The Lahore Division with 38 has the largest number of Small Towns and Ambala Division with 14 the lowest. Simla, Jhelum and Montgomery districts have no Small Towns.

The total population of Small Town areas was 455,910 and the number of members 674 as compared with 452,328 and 667, respectively, of the previous year.

Of the 674 members 528 were elected and 146 nominated, of whom 46 were officials. All the Presidents of the Town Committees were elected, 29 of them being officials. Elections were held during the year for 242 seats, of which 202 were contested. The contests were generally keen and in one case 91 per cent of the voters went to the poll. In the Multan and Dera Ghazi Khan districts and Kot Adu in the Muzaffargarh district general elections took place in all the Town Committees. In Vehoa (Dera Ghazi Khan) no seat was contested, influential persons being returned unopposed.

Seven election petitions were presented, one from Dasua, three each from Lala Musa and Malakwal. All of them were rejected or withdrawn. No cases of personation were detected.

With a few exceptions the Committees held the prescribed number of meetings and the attendance of members was satisfactory. The number of meetings adjourned for want of a quorum was 145 as compared with 173 in the previous year.

2. *General and Special Orders.*—The number of special orders issued under section 35 of the Small Towns Act was 1,037 as compared with 682 of the previous year. Out of these as many as 540 were issued in the Multan division. The Town Committees responsible for the issue of the highest number of orders are :—

| | | | |
|---|---|---|---|
| Ahmadpur Sial (Jhang) | ... | ... | 199 |
| Samrala (Ludhiana) | ... | ... | 117 |
| Kallurkot (Mianwali) | ... | ... | 99 |
| Kot Adu (Muzaffargarh) | ... | ... | 91 |

The use of powers under the general orders by the Town Committees is reported to have been adequate on the whole, but in the Multan division the Town Committees were slack in enforcing them. The Town Committee of Budhlada in the Hoshiarpur district is again reported to have failed to take adequate action in respect of encroachments against the general orders under clauses (*ii*) and (*m*) of section 35. Enforcement of general orders was commendable in the case of Kot Adu (Muzaffargarh), Mailsi (Multan) and Vehoa (Dera Ghazi Khan). The reports indicate that powers to use special orders were not abused in any case.

3. *Income.*—The income for all Small Towns for the year under report was Rs. 7,83,343 as compared with Rs. 7,51,882 in the previous year. Town rate and the income from rent continue to be the main sources of income. The incidence of taxation per head of population was

Re. 0-13-6 as compared with Re. 0-12-3 of the last year. It was highest at Mandi Baha-ud-Din in the Gujrat district (Rs. 4-13-7) and lowest at Zafarwal in the Sialkot district (Re. 0-3-3).

The Town Committees are reluctant to tap new sources of income. The Deputy Commissioner, Karnal, pertinently remarks "The question is not easy of solution. Direct taxation is unpopular and an increase in the pitch of town rates has its limitations. Civic improvement must naturally wait for windfalls or, at any rate, till the new centres of trade formed by the exigencies of motor traffic have acquired a reasonable permanency." Large arrears are reported from Mandi Dabwali in the Hissar district, Hidayatpur Chhaoni in the Ambala division and Srigobindpur in the Gurdaspur district. Arrears represent a considerable percentage of the yearly demand in a number of cases and in consequence the Committees concerned are confronted with financial difficulties. The Committee of Srigobindpur in the Gurdaspur district has not been able to pay the establishment for over a year. The imperative desirability of timely and fair assessment and of the use of their powers under the Act for recovery of their dues is a matter, which should receive the earnest consideration of all the Committees.

4. *Supervision and Control.*—There was, as usual, little intervention by the Deputy Commissioners in the affairs of the Committees. The Deputy Commissioner, Gujrat, used his powers under section 48 of the Act by assuming charge of the management of the Anglo-Vernacular Middle School at Malakwal. In another case of the same Committee it was found necessary to suspend a resolution in respect of leasing of certain Government land. The Deputy Commissioner, Gujranwala, had to use his emergency powers on two occasions in the case of the Town Committee of Akalgarh, one regarding encroachments and the other in regard to the reduction by the Committee of the pay of its Secretary. In both these cases Government reversed the orders of the Deputy Commissioner. Almost all the Committees were inspected by the Deputy Commissioners, their Assistants or the Divisional Inspector of Local Bodies. The results were satisfactory. It is interesting to note that, though most of the Town Committees in the Sialkot district have employed trained Muharrirs, the working of the Town Committees, as revealed by the audit objections, has not shown any marked improvement. The Deputy Commissioner, Amritsar, however, considers the training classes of the Muharrirs to have generally improved the general standard of the working in the Town Committees.

5. *General.*—The position generally in the various Divisions has been summed up by the Commissioners, and it may be of interest to quote their opinions.

The Commissioner, Ambala Division (Mr. Hearn), reports that the working of the Act has been generally satisfactory, but quotes the view of the Deputy Commissioner, Gurgaon, that the members of the Town Committees take very little interest in matters of public welfare and that elections are fought simply to achieve personal ends. The Town Committees, he considers, are unfit to function without official control and guidance.

The Commissioner, Jullundur Division, reports marked improvement in the administration. The Deputy Commissioner, Ferozepore, has remarked that the efficiency of general administration of a Town Committee depends largely on its paid staff, as the members are generally ignorant and seek elections more for personal aggrandisement than from any real desire to serve the interests of the Town.

The Commissioner, Lahore Division, takes a pessimistic view and remarks: "On the whole there has been no marked improvement in the administration of Small Towns during the year under report and the general remarks recorded in my review for 1936-37 hold good with equal force for 1937-38. New members elected to various Committees during the course of the year are no better than their predecessors and none will risk popularity and votes, by imposing or enhancing taxation in any shape

or form. The result is that even though expenditure may be curtailed to the irreducible minimum, leaving no room for extravagance of any sort, nothing really productive of any good can be achieved on any appreciable scale."

The Commissioner, Rawalpindi Division (Mr. Anderson), has concluded his report with the following remarks : "Members being mostly uneducated, party factions are reported in almost all the towns of Gujrat district and this is apparently the case more or less everywhere although it does not in all towns interfere with the proper transaction of business."

The Commissioner, Multan Division (Mr. Marsden), has noted on the work of the Committees of his Division in the following words.: "The increase in income, and in the number of meetings held, the more frequent attendance of members at meetings, and the decrease in the number of cases requiring official interference, are gratifying features and denote improved administration, and to a large extent this is doubtless due to the advice and assistance which the Committees have received from the Inspectorate. But it is still very necessary that members of Committees should educate the voters up to the need of enforcement of general and special orders, and not shrink, as they do at present, from offending voters by making use of the orders."

Government has noted with regret that in spite of the best efforts of the local officers the working of the Small Town Committees is not as satisfactory as it should be. It is, however, hoped that by the guidance of the local officers and the Inspectors of Local Bodies who have now been appointed in the rest of the Divisions of the Province, improvement will follow in due course.

ORDER.—Ordered that copies of this review be forwarded to all Commissioners of Divisions and Deputy Commissioners in the Punjab, and the Secretary to Government, Punjab, Public Works Department, Buildings and Roads Branch, and be submitted to the Government of India in the Department of Education, Health and Lands.

Ordered also that the review be published in the *Punjab Gazette*, and that copies be supplied to Deputy Commissioners for the information of Town Committees.

By order of the Punjab Government,

AMIN-UD-DIN,

Secretary to Government, Punjab,

Medical and Local Government Departments.

---

(3) REVIEW ON LETTER NO. 4468-G-II, DATED THE 5TH APRIL, 1939, FROM THE INSPECTOR-GENERAL OF CIVIL HOSPITALS, PUNJAB, FORWARDING THE PUNJAB MENTAL HOSPITAL REPORT FOR THE YEAR 1938.

**Proceedings of the Punjab Government, in the Medical Department, No. 2238-M.-39/31121, dated the 29th September, 1939.**

READ—

Letter No. 4468-G.-II, dated the 5th April, 1939, from the Inspector-General of Civil Hospitals, Punjab, forwarding the Punjab Mental Hospital Report for the year 1938.

*Remarks.*—The population of the Punjab Mental Hospital increased from 1,153 patients in 1937 to 1,235 patients in the year under review. This increase is reflected in the figures of admission and of average daily strength which show an increase of 92 and 34·5, respectively, over the figures of the last year. The new barracks providing additional accommodation for 300 male patients have been

completed, and when occupied will relieve congestion on the male side of the Hospital. A double-storeyed block for 100 female patients has been sanctioned, and is now under construction.

2. There were 32 deaths in 1938, compared with 29 in 1937, giving a death rate of 3·16 and 2·97, respectively. Pneumonia, which claimed the largest number of deaths by one disease, accounted for 6 and Tuberculosis of the lungs for 5. It is, however, satisfactory to note that there were no cases of suicide, escape, or death by violence during the year under review.

3. Excluding a sum of Rs. 1,19,431 spent on 'original works', the expenditure by Government on the maintenance of the Hospital was Rs. 3,08,054, compared with Rs. 3,20,647 in the year 1937. The decrease of Rs. 12,593 is mainly due to—

(1) a P.C.M.S. officer officiating as Medical Superintendent of the Hospital during the absence on leave for a period of six months of Lieut.-Colonel C. J. Lodge-Patch;

(2) a fall in the price of food-stuffs; and

(3) postponement of payment of certain bills relating to the period under review to the following year.

4. The amount recovered from the local bodies was Rs. 2,24,143-10-8, against Rs. 2,68,657-14-4 in the previous year. The decrease is the result of the old outstandings having been realized and the recoveries assuming normal proportions. The net cost to Government of the maintenance of the Hospital was Rs. 83,910 against Rs. 51,989 in the previous year.

5. The Punjab Government concur in the acknowledgment of the Inspector-General of Civil Hospitals to Lieut.-Colonel C. J. Lodge-Patch, M.C., I.M.S., and to Dr. R. S. Sharma, P.C.M.S., who officiated as Medical Superintendent for six months while Lieut.-Colonel Lodge-Patch was absent on leave.

ORDER.—Ordered that a copy of the report and of the review be forwarded to the Government of India, Home Department, for information, also that the review be published in the *Punjab Gazette*.

Ordered also that a copy of the review be forwarded to the Inspector-General of Civil Hospitals, Punjab, for information.

By order of the Governor of the Punjab,

AMIN-UD-DIN,

Secretary to Government, Punjab,

Medical and Local Government Departments.

REVIEW ON THE ANNUAL REPORT ON THE WORKING OF THE FACTORIES ACT IN THE PUNJAB FOR THE YEAR 1938.

No. 4241-I. & L.-39/27175.

FROM

S. K. KIRPALANI, Esq., I.C.S.,
*Secretary to Government, Punjab,*
*Electricity and Industries Departments,*

To

THE DIRECTOR OF INDUSTRIES,
PUNJAB.

*Dated Lahore, the 19th August, 1939.*

*Subject*:—ANNUAL REPORT ON THE WORKING OF THE FACTORIES ACT IN THE PUNJAB FOR THE YEAR 1938.

SIR,

I AM directed to acknowledge receipt of your letter No. G./2/2/11899, dated the 10th July, 1939, forwarding the annual report on the working of the Indian Factories Act for the calendar year 1938.

2. The year 1938 may be characterised as a period of consolidation rather than one of expansion. Although the number of registered factories has risen from 862 to 887, the number of factories actually working during the year has fallen from 798 to 780. Only 47 new factories were established as compared to 98 established last year. Amongst the new factories, the Starch Factory at Abdullapur in Ambala district is an entirely new venture in the Punjab. The Dry Ice Factory at Lahore, the Biscuit Factory at Multan and the Glass Factory at Amritsar deserve special mention. Textile mills had a very busy year. Four factories extended their premises and the scope of operation. These are the Bankteshwar Mills, Bhiwani, the Sutlej Mills, Okara, the Delhi Cloth Mills, Lyallpur and the New Egerton Woollen Mills, Dhariwal.

Twenty-two factories have been removed from the register. The closing down of one chemical factory at Lahore is a matter of some regret.

3. Congestion in the factory areas at Badamibagh, Lahore, Amritsar and Ludhiana has a tendency to intensify. A proposal, for the compulsory acquisition of new factory area outside Ludhiana, on behalf of the Hosiery Manufacturers Association, is under consideration. The rapid development of new factory areas at Chheharta and Verka near Amritsar and at Moghalpura near Lahore, offers opportunities for the establishment of model industrial townships. Government will welcome concrete proposals on the subject from the Chief Inspector of Factories and the Director of Industries.

The improvement in ventilation, lighting and water supply in factory premises has been well maintained. At Amritsar and Ludhiana a number of unsuitable and badly equipped premises have been replaced by modern factory buildings away from congested areas. Factory inspections by officers of the Public Health Department have helped materially in securing better sanitary conditions generally.

4. The extensions to some of the larger established factories have contributed substantially to the increase in the total number of operatives from 69,473 to 72,268. The number of women workers has risen from 8,288 to 8,594, mostly in cotton ginning factories, even though this industry has experienced a comparatively dull year. Stricter medical inspections coupled with the slump in the cotton ginning industry, account for the sharp decline in the number of adolescent workers from 2,146 to 1,453 only. There is a small increase in the number of juvenile workers, partly because many prospective adolescent workers were passed fit only for the juvenile class and partly because children were in demand for lighter tasks in the new metal works.

5. Even though the number of inspections has increased from 562 to 725, as many as 265 factories remained uninspected during the year Government cannot emphasise too strongly the necessity of inspecting each working factory atleast once a year. The increase in the number of inspections is largely due to the fact that, during the year Assistant Directors of Public Health, who were appointed additional Factory Inspectors only recently, have performed their duties with great zeal. The number of inspections by the Chief Inspector may well have been larger but for the fact that this officer was on leave for six months and the duties of the post were performed by the Chief Inspector of Boilers in addition to his own. Twelve district revenue officers have done only eleven inspections. It would appear that the observations in the Review on the Report of the last year, in this behalf, have not had the desired effect. The attention of district magistrates is being drawn specially to the desirability of a much larger number of inspections by the superior revenue staff. The number of such additional inspectors may be increased usefully by investing all Assistant Commissioners, Sub-Divisional Officers and Revenue Assistants with the necessary powers under the Factories Act.

6. Wages of skilled operatives, except in the case of 'fitters', have either risen above or maintained the level of last year. Greater industrial development may be expected to secure a more marked improvement in the wages of this class.

The wages of unskilled workers have fluctuated according to seasonal requirements, but on the whole, unhappily, they betray a tendency to decline.

Except in the case of the larger mills, housing conditions of factory labour continue to be unsatisfactory. As persuasion and advice have failed to secure any tangible improvement, the necessity of enacting suitable legislation will have to be considered seriously. It is to the credit of the owners of the larger mills that they have evinced increasing interest in the general welfare of their employees.

7. Hours of work have again generally remained within the prescribed limits. The Railway workshops have

maintained a forty-seven hour week, and certain Departments were able to observe a fifty-two hour week much to the benefit of the operatives.

Government note with pleasure that as many as 676 factories have observed the one hour rest interval.

8. Every effort appears to have been made to secure adequate fencing of machinery. It is a healthy sign that owners and managers have generally co-operated with the Chief Inspector in this matter. Steps were taken to ensure that the workers themselves understood and observed the necessary precautions to avoid accidents. Posters were issued and, in some cases, demonstrations were arranged for the benefit of the operatives. Inspite of this, the total number of accidents per hundred operatives has risen from 2·40 to 2·45 largely due to the negligence of the workers in textile mills. Except for 1930, the number of fatal accidents is the largest during the decade. The number of serious as well as minor accidents is the largest during the 10 years. The Shree Gopal Paper Mills at Abdullapur are in the unenviable position of accounting for the largest percentage of accidents in the Province. The management of the Railway workshops may be congratulated on the decrease in the number of accidents on their premises, although unfortunately there were three fatal accidents. Government trust that the Chief Inspector will intensify his efforts not only to secure proper fencing of machinery but to instruct the workers as regards necessary precautions, especially in the handling of new types of dangerous machinery.

9. Only 148 prosecutions were filed against 65 factories as compared to 249 prosecutions against 86 factories in the previous year. One hundred and thirty-seven convictions were obtained. Government are not satisfied that the reduction in the number of prosecutions is due entirely to the dull conditions experienced by cotton ginning factories. In many cases where the Chief Inspector administered only a warning, Government would have desired to see the offenders prosecuted. It must be realised that for each case detected there must be many that escape unnoticed. Instructions have now been issued that all cases in which the Chief Inspector proposes to refrain from prosecution should be submitted for the orders of Government with a full statement of reasons. Although fines inflicted by magistrates are not yet quite satisfactory in all cases, there is a welcome tendency to inflict adequate punishment. The fine of Rs. 200 imposed by the Sub-Divisional Magistrate, Kaithal, for overworking women is an instance in point. The total sum of Rs. 3,436 inflicted in 137 cases is comparable to the sum of Rs. 3,923 imposed in 215 cases last year.

10. There is some danger that the increasing organisation of labour on trade union lines may lead to misunderstanding and conflict with Capital in the larger industrial areas. Government therefore contemplate the appointment of a Labour Officer to secure co-ordination and harmony between the two interests, which must co-operate to mutual advantage, if industrial development is to proceed smoothly.

11. Government endorse the Director's appreciation of the work done by the officers of the Public Health Department, the Chief Inspector and his subordinates.

I have the honour to be,

SIR,

Your most obedient servant,

S. K. KIRPALANI,

*Secretary to Government, Punjab,*
*Electricity and Industries Departments.*

### GENERAL.

**REVIEW ON THE ADMINISTRATION REPORT OF THE PUNJAB PUBLIC WORKS DEPARTMENT, ELECTRICITY BRANCH, FOR THE YEAR 1938-39.**

**Proceedings of the Punjab Government in the Industries and Labour (Electricity) Department, No. 2086-El.-39/37572, dated 11th November, 1939.**

READ—

The Administration Report of the Punjab Public Works Department, Electricity Branch, for the year 1938-39.

1938-39 was the sixth year of the commercial operation of the Electricity Branch. The improvement in load conditions, though not so marked as in the previous year, is yet substantial. The connected load increased by 8·7 per cent from 30,386 kW to 33,056 kW while the peak load increased by 9·8 per cent from 12,200 kW to 13,400 kW The number of units transmitted increased by 13·1 per cent from 59,741,151 to 67,572,998 and the total revenue assessed (including the revenue from the Renala Hydro Electric Installation) rose by 21·4 per cent from Rs. 24,69,313 to Rs. 29,99,355. The number of consumers increased by 15·4 per cent from 15,042 to 17,369. Notable improvement took place in Ludhiana where the connected load and revenue increased by 665 kW and Rs. 83,192 ; in Lyallpur by 227 kW and Rs. 70,350 ; in Lahore suburban area by 482 kW and Rs. 54,846, and in Amritsar suburban area by 76 kW and Rs. 46,176.

2. The load curve of units generated has followed practically the same course as in the last year. There was a steady rise from April to

August (5,955,000 units) followed by a gradual fall till November (56,40,000 units) just above the level of May. Then there was a steady rise until the peak was reached in January (62,30,000 units). February registered a sharp decline (52,60,000 units) which was the lowest record of the year. March again witnessed an improvement (57,30,000 units).

3. The administrative accounts for the year show a net revenue of Rs. 15,16,110 being only 57·7 per cent of the simple interest charges of Rs. 26,26,629 on capital. Last year the net revenue of Rs. 17,27,769 represented 67·7 per cent of the simple interest charges amounting to Rs. 25,64,479. This apparent deterioration of the financial position is due to the debit of depreciation charges of about Rs. 7·4 lakhs for the first time. If this item is ignored the net revenue amounting to Rs. 22,57,110 represents 85·9 per cent of the interest charges on capital.

4. The Development Report dealing with the question of augmenting of power and prospective load in the Province was received during the year. Four proposals have been examined :—

(a) Construction of dams in the Uhl Valley to increase the present winter discharge of that river;

(b) exploitation of canal falls ;

(c) exploitation of the waters of one or more of the main rivers of the Province ; and

(d) construction of one or more large Steam Power Stations to supplement the power available from the Uhl River Hydro Electric Scheme during the winter months only.

It was expected that with the gradual loading up of the system during the first stage, the load factor would gradually fall. This expectation has not materialised and the load factor curve is almost a straight line at 73 per cent. With a minimum discharge of 100 cusecs during the winter months, the output of power from the Shanan Power House at 73 per cent load factor is limited to 16,500 kW against the previous estimate of 24,000 kW at 50 per cent load factor. The unusually low discharges in the Uhl River at Brot, during the winter months of 1938-39, caused grave anxiety and the augmenting of power became a problem of urgency. Therefore, pending a fuller examination of the alternative proposals suggested in the Development Report, it was decided to establish a Steam Power Station raising the output of primary power, in the first instance, by 12,000 kW and ultimately by 24,000 kW or a total of over 40,000 kW. The reduced output of the Shanan Power House must necessarily affect adversely the profit and loss account of the first stage of the Uhl River Hydro Electric Scheme. It is now expected that the operations of the Branch will show a small net profit after paying all expenses, including interest, when the maximum demand on the system exceeds 40,000 kW This prospect is not capable of achievement until the Thermal Station has been erected and put in commission. Designs and working plans for the Thermal Station are being drawn up but the outbreak of war has rendered it impossible to obtain the necessary plant at an early date. With normal development, the system, as operating at present, will be loaded to capacity in the winter of 1940-41. Accordingly, it has become necessary to discontinue the bulk supply of over 3,000 kW to the North-Western Railway, and under the terms of the agreement with that Administration two years' notice for the discontinuance of the supply has now been given.

5. The plant and equipment of the Branch worked entirely satisfactorily throughout the year and the supply to the 132 kV system was continuous. There were three stoppages on the 22 kV line to Mandi, for two minutes on each occasion, due to overloading.

6. Measures for maintenance and test functioned successfully. The inspection of tower foundations referred to in the last Report has now been completed. It appears that extensive work will have to be undertaken without delay on all tower foundations, at least in the plains to arrest serious damage by corrosion. Inspection has also revealed extensive damage to wood poles on local distribution lines, by white ants. It will probably be necessary to replace all wood poles by steel poles.

7. During the year the Construction Division was re-named as the 1st Construction Division and a second Division was created for the construction of the Sialkot-Gujranwala-Lyallpur Project. Owing to the circumstances explained in paragraph 4, this Division is now being abolished.

Expansion of the operations of the Branch has necessitated re-organization of the administration of stores. A Central Stores Purchase Agency has been created and the post of Stores Officer has been made permanent. This Agency will also carry out the scheme for central price fixing of stores. In the short time that the new scheme has been in operation, it has been found possible to reduce the stock limit of stores from 21 lakhs to 20 lakhs. The position is being carefully watched and a further reduction may be possible.

8. Work on many local distribution schemes has had to be suspended and the programme of future development will have to be restricted until it is possible to proceed with the construction of the Thermal Station. Meanwhile with steady development of available power the cost of generation per unit was reduced to 3·85 pies per unit in 1937-38 as compared with 5·44 pies in 1936-37 and as much as 12·80 pies in 1934-35.

9. The commercial side of the Branch continues to receive close attention. Reductions have been approved in the rental of service lines both in the case of general and industrial consumers and certain changes have been sanctioned in the schedules of Service and General charges. These reductions are expected to help considerably in augmenting the sales of energy. The amount outstanding against the construction contracts of the main scheme has been further reduced from Rs. 7,617 to Rs. 5,772.

10. Mr. H. P. Thomas, C.I.E., was in charge of the Branch until October, 1938, when he proceeded on leave preparatory to termination of his contract. Mr. Critchley held charge of the post of the Chief Engineer for the rest of the year. Government thank Mr. Critchley for an interesting report and record their appreciation of the good work done by all the officers of the Branch.

*Order.*—Ordered that a copy of the foregoing review be forwarded to the Chief Engineer, Punjab, and the officers of the Branch.

*Order.*—Ordered that a copy of the foregoing review be forwarded to the Chief Engineer, Punjab Public Works Department, Electricity Branch, for information.

Ordered also that the review be published in the *Punjab Gazette* and be circulated with the report.

By order of the Governor of the Punjab,

S. K. KIRPALANI,

Secretary to Government, Punjab,
Electricity Industries Departments.

**REVIEW ON THE REPORT OF THE DEPARTMENT OF INDUSTRIES FOR THE YEAR ENDING 31ST MARCH, 1939.**

**Proceedings of the Punjab Government in the Department of Industries, No. 7463-I. & L.-39/38579, dated 18th November, 1939.**

READ :—

Report of the Department of Industries for the year ending 31st March, 1939.

PART A.—PROVINCIAL SUBJECTS.

THE year has been one of expansion and increased activity. Industrial development has now reached a stage when planning is essential and a comprehensive industrial survey of the Province has accordingly been undertaken. In pursuance of the special programme of Rural Development a number of Travelling Demonstration Parties have been set up to foster and modernise decadent cottage industries. An Industrial Research Fund has been started to finance investigation of scientific problems and technical processes in order to enable large scale industries to meet economic competition both in and outside India. A notable event which will add substantially to the work and usefulness of the Department was the decision to inaugurate a Provincial

Stores Purchase Department with effect from the 1st April, 1940. The new Department will function as a section of the Industries Department.

The total expenditure for the year was Rs. 18,98,230 as compared to Rs. 14,88,035 in 1936-37. The figure of Rs. 20,31,504 for 1937-38 was inflated owing to extraordinary expenditure on the All-India Exhibition of Arts and Industries held in December, 1937. The revenue of the Department has increased from Rs. 5,42,231 in 1936-37 to Rs. 6,30,654. The revenue of the last year at Rs. 7,96,840 was higher on account of receipts from the All-India Exhibition.

2. The number of registered factories increased only from 862 to 887, while the number of those actually working fell from 798 to 780. But the number of workers rose from 69,473 to 72,268. Of the 47 factories brought on the register, 29 were new concerns. The starch factory at Abdullapur deserves special mention.

Woollen mills experienced a normal year. The two rayon goods factories at Amritsar worked under full pressure and the output was substantially higher than in the previous year. All the metal working trades made steady progress; in particular, factories manufacturing electric fans improved the quality of goods and increased their production.

The match industry of the Province which was working on a small margin of profit has practically disappeared on account of the burden of the excise duty and severe competition from foreign companies in India, particularly the Western India Match Company.

3. Amongst the cottage industries, handloom weaving made appreciable progress. This was assisted by the restricted imports of piece goods, particularly from Japan. The experience gained by the marketing organisation and improvements effected in technique and design have helped both production and sales.

The marketing scheme financed by the Government of India is now in its fourth year of operation. In all probability the grant will be discontinued next year. The marked success of the scheme demands that it should operate for at least another five years if permanent improvement of this industry is to be secured. The business convassed by the staff in 1938-39 far exceeds the figures of the previous year; but owing to uncertainty of the political situation in the first six months, large orders were obtained only towards the end of the year. It is for this reason that the business actually transacted fell below the level of the previous year. The marketing organisation secured several prizes at exhibitions in other provinces. The award of the first prize—a handsome silver cup—at the Patna Exhibition, was a notable achievement.

The woollen carpet industry received a set-back owing to the reduction of demand from foreign countries. Export to the United Kingdom alone fell by 30 per cent. as compared to the previous year.

The hosiery industry has experienced a dull year. Even though design and quality of goods have improved, prices are lower owing to uneconomic competition. A few unscru-

pulous manufacturers who are mixing cotton with woollen yarn are jeopardising the market for this class of goods.

The cottage industry for the manufacture of iron and metal-ware is decaying owing to its inability to compete with large factories. One or two centres are enjoying a measure of prosperity but the industry at places like Rewari-Jagadhri, Panipat and Pind Dadan Khan must disappear in a year or two.

The sports industry of Sialkot continues to flourish. In spite of unsettled political conditions in Europe, the export of the cheaper qualities of tennis and badminton rackets, intestinal gut, hockey sticks, cricket and hockey balls, to Europe, the United States of America, Australia and New Zealand was substantially higher than in the previous year. The important cricket bat industry, however, has been almost crippled by the embargo placed by the Kashmir Government on the export of willow wood. Other sources of supply are being investigated.

4. Apart from the general industrial survey of the Province, on which work has been started in Lahore, Amritsar, Sialkot, Ludhiana and Multan districts, many industries came under special survey including oil seed crushing, tanning, pottery, sericulture, animal casings and hardware. The calls on the Department for supply of commercial and industrial intelligence continued to increase. The demand for technical advice and assistance is also increasing. Valuable research work was done on edible oils, including groundnut, castor, gram and mustard and on the manufacture of *banaspati ghee* from indigenous vegetable oils.

5. The Department is doing useful propaganda work through radio broadcasts and by participation in industrial exhibitions in and outside the Province. The stalls of the Department at the All-India Industrial Exhibitions at Delhi and Karachi, in particular, elicited much praise and secured several prizes.

6. Industrial awakening is reflected in the growing demand for State Aid in the shape of loans. The annual provision of Rs. 2 lakhs for this purpose is proving inadequate. This year the sum was disbursed to 43 applicants as compared to 35 in the previous year. Substantial loans were given to promote new industries for the manufacture of fruit juices, biscuits, brass cocks, surgical dressings and ribbons and trimmings. Subsidies were given for the conduct of research in the manufacture of superior card board and celluloid goods.

Two applications for the guarantee of a minimum return on capital are under the consideration of Government.

Recoveries of principal and interest were more satisfactory than in the previous year, but even so the total amount outstanding at the close of the year was Rs. 6,41,000 against Rs. 5,25,000 at the close of the last year. Twenty-two suits are pending in the courts for recovery of loans.

7. Of the larger departmental institutions the Mayo School of Arts maintains its reputation as the premier art institution.

The Government Hosiery Institute, Ludhiana, is becoming increasingly popular. The addition of Workshop towards the end of the year is proving useful for imparting commercial training to the students.

The Government Tanning Institute, Jullundur, has completed another successful year. Of the 13 students sent up, 12 passed the Higher Class Examination of the City of Guilds Institute of London. The report submitted by Mr. B. M. Das, Tanning Expert of the Bengal Government, for reorganisation of the Institute and the development of the industry in the Province, is under consideration.

The Government Institute of Dyeing and Calico Printing at Shahdara is attracting much attention. The students admitted during the year included one M.Sc., one LL.B., and five Graduates in Arts and Sciences. The income from the Dye House increased from Rs. 23,715 to Rs. 36,500. The Government Central Weaving Institute, Amritsar, the Government Technical School, Lahore, and the Emerson Institute for the Blind continue to render useful service.

8. Apart from these major institutions, there are 22 Government schools, 3 metal institutes and 11 private schools recognised by the Department for imparting industrial education to boys. The number of students in the Government institutions rose from 1,083 to 1,326. The reorganisation scheme which resulted in a temporary decrease in the number of students is now in full operation. All the departmental schools are popular because qualified students find ready employment or can set up business on their own. As an example of the high standard of the training imparted, it may be mentioned that qualified pupils from the Government Metal Works Institute, Sialkot, can easily pass the entrance examination at the heavy automobile repair workshops at Chaklala.

The total expenditure on Government schools and institutes rose from Rs. 4,06,000 to Rs. 4,91,000; but owing to an increase in the number of pupils the *per caput* expenditure was only Rs. 371 as against Rs. 375 last year. Government appreciate the very valuable work of Mr. Cowie, the Inspector, in this connection.

9. The industrial education of girls is receiving all possible attention. The number of Government institutions has increased from 4 to 6 and the number of recognised private schools has risen from 13 to 15. The Department is aiming not so much at increase in the number of students as at improving the quality of the training imparted. The scheme of studies is being revised so as to reduce the number of subjects taught and to restrict the number of pupils to about 15 per teacher.

10. The Sericulture industry which came under the control of the Department quite recently is making remarkable progress. 1,493 ounces of seed were distributed during the year. Much more could have been distributed but for the difficulty in securing adequate supplies of mulberry leaf in certain localities. The Department is alive to the need for increasing plantations. 56,400 one-year old plants of approved varieties were supplied free to zamindars against 46,400 last year.

Against only 146 ounces last year, the Department produced 456 ounces of seed. It is interesting to note that only 1½ per cent of this seed failed to hatch, while the failure in the case of foreign seed is as high as 6½ per cent. The Department is aiming at producing 1,000 ounces next year. Local seed is more satisfactory than foreign seed and is also substantially cheaper.

11. The Government Demonstration Weaving Factory has achieved extremely creditable results in spite of the fact that the textile industry as a whole has experienced difficulties in effecting sales at the price levels of last year. The total production of cloth amounted to over 1,300,000 yards as against 1,081,000 yards last year. The net profit has risen from Rs. 31,320 to Rs. 56,210. K. S. Marzban, the Superintendent, is entitled to high praise for this achievement.

This factory could be converted into a first class paying commercial concern if a spinning section and some more looms were added. With an extra expenditure of Rs. 7½ lakhs on reorganisation the factory should yield a net return of 10 per cent and more.

The commercial operation of the Punjab Arts and Crafts Depôt was not as satisfactory as in the past year. This was partly due to the general economic depression. But the Depôt cannot function successfully until it is thoroughly reorganised and shifted to a place where it can attract more business. A reorganisation proposal is under consideration. It may, however, be pointed out that the value of an institution of this nature cannot be assessed in terms of the monetary return. Its real value lies in the assistance that it can render to art and craft workers in producing articles which, while retaining the individual artistic touch, meet the modern taste of prospective purchasers.

12. The Joint Development Board is rendering useful service. Particularly valuable work has been done by the sub committees on land acquisition, electricity, pottery, leather, marketing of industrial products and measures to facilitate credit for industrial concerns.

PART B.—CENTRAL SUBJECTS.

13. The total number of boilers inspected was 1,068 against 1,076 in the previous year; but the fees realised amounted to only Rs. 59,453 against Rs. 60,940. The reduction in fees is due to the installation of a large number of small boilers, especially in the textile works for bleaching and finishing processes.

Although many new certificates of approval were granted for mining of coal, there was no appreciable change in production.

As for mineral oil, the supply from the rich Dhulian field more than doubled the production of petroleum by the Attock Oil Company. The revenue from coal and oil concessions amounted to Rs. 3,21,772 against Rs. 1,87,157 in the previous year.

14. Government wish to express their keen appreciation of the valuable work done by Rai Bahadur Lala Ram Lal, the Director, and his staff during the year.

---

ORDER.—Ordered that a copy of the foregoing review be forwarded to the Director of Industries, Punjab, for information.

Ordered also that the review be published in the *Punjab Government Gazette* and circulated with the report.

By order of the Punjab Government,

S. K. KIRPALANI,

*Secretary to Government, Punjab,*

*Electricity and Industries Departments.*

LAHORE, FRIDAY, DECEMBER 15, 1939.

## PART II.

### GENERAL.

**REVIEW ON THE REPORT ON THE ADMINISTRATION OF THE INDIAN ELECTRICITY ACT IN THE PUNJAB FOR THE YEAR 1938.**

**Proceedings of the Government of the Punjab, Industries and Labour Department (Electricity), No. 1873-El.-39/35742, dated 31st October, 1939.**

READ—

Report on the Administration of the Indian Electricity Act in the Punjab for the year 1938.

THE year has been marked by rapid progress. Although only four new licences were granted, raising the total number from 59 to 63, the number of electrical supply undertakings actually in operation rose from 44 to 54. In addition, the Public Works Department, Electricity Branch, was supplying energy in 45 towns against 42 in the previous year. Altogether 100 towns are now enjoying the benefits of electricity against 84 in the previous year. Since the close of the year 1934 no less than 62 additional towns and rural centres have been electrified.

The total number of units sold to the public now stands at 92,194,840, of which 53,818,474 units were generated by the Electricity Branch. Corresponding figures for 1937 are 80,306,336 and 46,399,143 units, respectively. The number of consumers increased by 15,199. The number of medium pressure installations rose from 2,948 to 3,557, increases being noticeable at Jullundur (32) and at Gujranwala and Amritsar (23 each). Connected power load increased by 7,819 H. P. As

GGP

before, flour and rice mills continue to hold the first place as best users of power. Wood-working concerns, cotton ginning factories, oil presses, metal workshops and textile factories rank next in the order indicated. 145 factories were generating energy for their own use.

2. Five applications were received under section 27 of the Act for supply of energy outside the 'area of supply' specified in the licences. Only two were accepted. It has been repeatedly impressed on the licensees that advantage cannot be taken of this section to give electrical connections to distant places outside the area of supply and that in such circumstances the proper course is to apply for amendment of the licence to extend the 'area of supply'.

In two cases sanction for supply of energy was accorded under section 28 of the Act.

3. The report of the Electricity Advisory Board regarding the reduction of maxima rates under the Amritsar Municipal Electric Licence is now under the consideration of Government. The Jullundur case is still under preliminary examination. The question of reducing the maxima rates prescribed under the Sialkot Electric Licence has been postponed for the present.

4. The total number of accidents was 82 against 86 in the previous year. In 35 cases there was no injury to human life. For the rest, the number of fatal accidents was 15, the same as last year. Government note with satisfaction that once again no accident was due to any breach of the Indian Electricity Rules.

5. The Electric Inspector and his staff carried out 3,085 inspections against 2,538 last year and only 1,745 in 1936.

Eight meter tests were carried out at the Maclagan Engineering College. Two meter disputes were referred to the Electric Inspector, one of which was amicably settled. In 9 cases methods of construction were submitted for approval to the Electric Inspector and sanction was accorded in 6. Seventeen street light agreements were scrutinised. Voltage and earth tests were carried out in 33 and 24 places, respectively.

Two examinations were held by the Provincial Advisory Committee under rule 48 of the Indian Electricity Rules, 1937. Of the 219 candidates who appeared only 125 were successful. In addition, 151 certificates were granted to candidates who were exempted from the examination.

6. Mr. Stowers, the Electric Inspector, and his assistants deserve credit for the useful work done during the year and in particular for the substantial increase in the number of inspections carried out by them.

ORDER.—Ordered that the above review be published in the *Punjab Gazette* and be circulated with the report.

Ordered also that a copy be forwarded to the Director of Industries, Punjab, for information.

By order of the Governor of the Punjab,

S. K. KIRPALANI,

*Secretary to Government, Punjab,*

*Electricity and Industries Departments.*
